Dear Keston

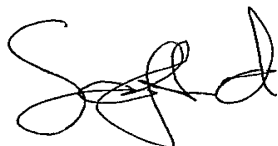

Input Methodologies Review – Invitation to contribute to problem definition

I refer to the Commission's 16 June discussion paper setting out the key issues and defining the specific issues to be addressed by the Commission in its review of input methodologies, and seeking input from interested stakeholders.

Air New Zealand has been party to, and fully supports, the submission from BARNZ in response to the Commission's invitation.

We look forward to the opportunity to review submissions from other parties, and to the next stage of this process.

Yours sincerely

Sean Ford
Manager Aeronautical Suppliers
