Dear Commissioners,

I urge you to stiffen your findings and be genuinely aggressive with your final recommendations. For example when a local privately owned generator and line company owner / operator can replace poles for a third of Auroras then I suggest you insist Aurora tenders out its pole replacement programme ,segment by segment or sub district by sub district. Not a single huge tender. Give the local contractors a fair opportunity.

My second recommendation is the shareholder (DCC) concedes it's responsibility for taking past profits at the expense of the maintenance of the power lines and agree to a single consistent price to all consumers across the network .

As individuals you have your reputations to enhance. Failure to satisfy the Central Otago consumer you will unfortunately be recorded in history along with Minister Max Bradford.....Conversely stand up for the consumer and set in place rules and processes which make this monopoly more efficient and competitive on a comparative basis. We will remember your success as will New Zealand benefit. Yours sincerely, John Rowley.
