Subject: Re electricity

I feel these points should be noted

How much has aurora banked as profits over the years it has had lines up and running and I'd so profits were kept why they did not invest it back into maintenance

Also for the large amount they are expecting our farmers and countrymen to pay you would expect this company to invest in putting all lines underground for future proofing thus stopping the added cost of tree trimming???

I feel they cannot be trusted to utilise the added monies in correct and meaningful way as surely for this amount to be needed they have obviously neglected maintenance and since being Co trolled by the council this shows double uses.

Where is the transparency from monies spent prior?

At the moment our countrymen farmers and outskirts lying peoples cannot afford this hike and added bill.

Perhaps the company should take a loan from the government?
