In a time when we are loosing jobs due to my company re structuring and the on going pandemic overseas that is affecting our economy it is an imposition on the community to inflict such price increases on those already struggling.

This has mainly come about because of gross mismanagement by Aurora o. over many years, this is not the consumers fault or a direct result of economic factors.

I beg the commission to say no to this application due to the increased hardship and stress it will cause to a wider community.
