Subject: Aurora CPP

Hello

As I understand it Aurora is justifying a "revenue increase" under the CPP to carry out specific projects for network improvement.

The Commerce Commission says that they don't get involved in day to day running of the business. Therefore what over site is there, if any, by anyone, that these projects actually get carried out or completed.

If they are not carried out or only partially completed what happens to the consumer money that has been put forward to fund these uncompleted or cancelled projects put forward as justification for the CPP?

Thank you
