

[Revised draft] Transpower Individual Price-Quality Path Determination 2025

[2024] NZCC XX

The Commission:

Vhari McWha
Dr Derek Johnston
Bryan Chapple
Nathan Strong

Date of decision:

[day] [month] 2024

[signature]

[name], Commissioner

Dated at Wellington this [day] of [month] 2024

COMMERCE COMMISSION

Wellington, New Zealand

Document version history		
Publication date	Decision number	Determination name
XX November 2024	[2024] NZCC XX	Transpower Individual Price-Quality Path Determination 2025

CONTENTS

PART 1: GENERAL PROVISIONS	4
PART 2: DEFINED TERMS	5
PART 3: PRICE PATH	22
PART 4: QUALITY STANDARDS AND PERFORMANCE MEASURES	23
PART 5: COMPLIANCE AND INFORMATION REPORTING	34
SCHEDULE A: SUMMARY OF FORECAST MAR AND FORECAST SMAR	53
SCHEDULE B: EV ACCOUNT SUMMARY	54
SCHEDULE C1: LOW INCENTIVE RATE BASE CAPEX SUMMARY – COMMISSIONED BASIS.....	55
SCHEDULE C2: STANDARD INCENTIVE RATE BASE CAPEX SUMMARY – COMMISSIONED BASIS	56
SCHEDULE C3: LOW INCENTIVE RATE BASE CAPEX SUMMARY – EXPENDITURE BASIS.....	57
SCHEDULE C4: STANDARD INCENTIVE RATE BASE CAPEX SUMMARY - EXPENDITURE BASIS.....	58
SCHEDULE D: FORECAST MAR BUILDING BLOCKS CALCULATION	63
SCHEDULE E: WASH-UP BUILDING BLOCKS CALCULATION	68
SCHEDULE EA: DELIVERY RISK ADJUSTMENT	73
SCHEDULE F: POINT OF SERVICE SUB-CATEGORIES – MEASURES OF GRID PERFORMANCE GP1 AND GP2 POINTS OF SERVICE	76
SCHEDULE G: QUALITY STANDARDS - HVAC ASSETS FOR ASSET PERFORMANCE MEASURE AP2 ...	84
SCHEDULE H: SUMMARY OF ACTUAL PASS-THROUGH COSTS AND RECOVERABLE COSTS	86
SCHEDULE I: LISTED PROJECTS	87
SCHEDULE J: DIRECTORS’ CERTIFICATE – PRICING COMPLIANCE STATEMENT	88
SCHEDULE K: DIRECTORS’ CERTIFICATE – ANNUAL COMPLIANCE STATEMENT.....	89
SCHEDULE L: CHIEF EXECUTIVE OFFICER’S CERTIFICATE – PROPOSAL TO UPDATE FORECAST MAR AND FORECAST SMAR.....	90
EXPLANATORY NOTE.....	91

Pursuant to Part 4 of the Commerce Act 1986, the **Commission** makes the following determination:

Part 1: General provisions

1. Title

1.1 This determination is the Transpower Individual Price-Quality Path Determination 2025.

2. Commencement

2.1 This determination takes effect on 1 April 2025.

3. Application

3.1 This determination applies to **Transpower** in relation to the supply of **electricity lines services** during **RCP4**.

4. Interpretation

4.1 Unless the context otherwise requires—

4.1.1 terms appearing in bold type in this determination have the meaning given to those terms in clause 7.1;

4.1.2 terms used in this determination that are defined in the **IMs**, but not in this determination, have the meaning given in the **IMs**;

4.1.3 terms used in this determination that are defined in the **Act**, but not in this determination, or in the **IMs**, have the meaning given in the **Act**;

4.1.4 financial items must be measured and disclosed in accordance with **GAAP** at the time it is applied, unless otherwise required by this determination or the **IMs**;

4.1.5 non-financial items must be measured and disclosed in accordance with standard industry practice unless otherwise required in this determination, or the **IMs**;

4.1.6 an obligation to do something is deemed to include an obligation to cause that thing to be done; and

4.1.7 materials incorporated by reference into this determination, including standards promulgated by other bodies, are incorporated in accordance with Schedule 5 of the **Act**.

4.2 If there is any inconsistency between the main body of this determination and any attachment or schedule to this determination, the main body of this determination prevails.

5. Individual price-quality path and information disclosures
- 5.1 **Transpower** must comply with the individual price-quality path, which consists of:
- 5.1.1 the price path in Part 3; and
- 5.1.2 the quality standards in clauses 14, 16, 18.1, 19.1, and 22.
- 5.2 **Transpower** must comply with the requirements to provide compliance statements and information disclosures in Parts 3, 4 and 5.
6. Applicable input methodologies
- 6.1 **Transpower** must apply the requirements set out in the following **IMs** where applicable when complying with this determination:
- 6.1.1 the **Transpower IM**; and
- 6.1.2 the **Capex IM**.

Part 2: Defined terms

7. Defined terms
- 7.1 In this determination:
- A**
- | | |
|------------------------------------|---|
| Act | means the Commerce Act 1986; |
| actual opex | has the meaning given in the Transpower IM ; |
| actual transmission revenue | means the revenue (net of rebates) received by Transpower in a pricing year from customers for electricity transmission services , excluding: <ul style="list-style-type: none"> (a) revenue received by Transpower for electricity transmission services performed by Transpower as system operator; and (b) revenue received by Transpower from new investment contracts; |
| AHI | means Transpower's asset health assessment index for the relative health of an asset; |
| annual compliance statement | means a written statement made by Transpower under clause 25 and associated information; |

asset health measure	means the percentage of assets in an asset health measure asset class with an AHI of 8 or more;
asset health measure asset class	means an asset class that is subject to the asset health quality standards and is one of the following: <ul style="list-style-type: none"> (a) conductors; (b) insulators; (c) power transformers; (d) outdoor circuit breakers; (e) protection relays; (f) tower grillage foundations; (g) tower protective coatings;
asset performance measure	has the meaning given in the Capex IM and, for the purposes of this determination, means: <ul style="list-style-type: none"> (a) the revenue-linked grid output measures specified in clause 13; and (b) the non-revenue linked grid output measures described in clause 27.1.1 to 27.1.4;
asset refurbishment	has the meaning given in the Capex IM ;
asset replacement	has the meaning given in the Capex IM ;
assurance auditor	means a person who: <ul style="list-style-type: none"> (a) is qualified for appointment as auditor of a company under the Companies Act 1993; (b) complies with Professional and Ethical Standard 1 (PES 1) issued by the New Zealand Auditing and Assurance Standards Board of the External Reporting Board in December 2018, under s 12(b) of the Financial Reporting Act 2013; and (c) does not have a relationship with or an interest in Transpower that could give rise to an actual or perceived conflict of interest in respect of the person providing an independent assurance report;

B

base capex	has the meaning given in the Capex IM ;
base capex allowance	has the meaning given in the Capex IM ;
base capex expenditure adjustment	has the meaning given in the Capex IM ;
base capex incentive rates	means the base capex low incentive rate and base capex standard incentive rate ;
base capex low incentive rate	has the meaning given in the Capex IM ;
base capex programme	has the meaning given in the Capex IM ;
base capex project	has the meaning given in the Capex IM ;
base capex standard incentive rate	has the meaning given in the Capex IM ;

C

cap	has the meaning given in the Capex IM and, for the purposes of this determination, values are specified in Tables 4.2 and 4.3;
Capex IM	means the <i>Transpower Capital Expenditure Input Methodology Determination</i> [2012] NZCC 2, including, for the avoidance of doubt, any amendment applicable to RCP4 ;
capital expenditure or capex	has the meaning given in the Capex IM ;
catastrophic event	has the meaning specified in clause 3.7.4 of the Transpower IM ;
civil commotion	means riots or similar civil disturbance;
code	has the meaning given in the Transpower IM ;
collar	has the meaning given in the Capex IM and, for the purposes of this determination, values are specified in Tables 4.2 and 4.3;
Commission	has the meaning given in the Act ;

commissioned	has the meaning given in the Transpower IM ;
commodity instrument that is not an effective hedge	means an instrument acquired by or entered into by Transpower in accordance with its policy on capital expenditure hedging in respect of an exposure to commodity prices, and the instrument does not qualify for hedge accounting in accordance with GAAP at the date of being entered into or acquired and that results in a gain or loss being incorporated into its Statement of Comprehensive Income or equivalent audited statement of income and expenses for financial accounting purposes;
contamination	means radioactive contamination, toxic contamination, dangerous biological contamination or chemical contamination;
corporate tax rate	has the meaning given in the Transpower IM ;
CPI	has the meaning given in the Transpower IM ;
customer	has the meaning given in the Transpower IM ;
	D
delivery risk adjustment	has the meaning given in the Transpower IM ;
depreciation	has the meaning given in the Transpower IM ;
director	has the meaning given in the Capex IM ;
disclosure year	has the meaning given in the Transpower IM and, in relation to a pricing year , is the year commencing 1 July immediately following the start of that pricing year ;
disposed asset	has the meaning given in the Transpower IM ;
duration	means the elapsed time of an unplanned interruption (in minutes, rounded to the nearest whole minute) from the start of that unplanned interruption until the earlier of: (a) restoration ; or

- (b) seven days after that **unplanned interruption** commenced;

E

Electricity Authority	has the meaning given in the Transpower IM ;
electricity lines services	has the meaning given in section 54C of the Act ;
electricity transmission services	has the meaning given in the Capex IM ;
EV account	has the meaning given in the Transpower IM ;
EV account entry	means, for a disclosure year , a memorandum entry to record for that disclosure year : <ul style="list-style-type: none"> (a) an ex-post economic gain or loss; (b) an after-tax gain or loss on capital expenditure commitments; (c) an after-tax economic gain or loss calculated for a base capex expenditure adjustment, grid output adjustment, or major capex expenditure and output adjustment; (d) an after-tax economic gain or loss calculated for a major capex sunk costs adjustment; (e) an ex-post economic gain or loss calculated in accordance with clause 34.1.3(a); (f) an after-tax gain or loss calculated in accordance with clauses 34.1.3(b) and 34.1.3(c); (g) an RCP4 HVDC transitional adjustment; or (h) an adjustment offsetting an RCP4 HVDC transitional adjustment under clause 11.3;
ex-post economic gain or loss	means, for a disclosure year , the after tax difference (expressed as a positive or negative amount) between the capital charge and the net operating profit/(loss) after tax for that disclosure year , as calculated in accordance with clause 32.1;

F

forecast CPI	has the meaning given in the Transpower IM ;
forecast EV adjustment	has the meaning given in the Transpower IM and, where the Commission determines that Transpower's IPP should be amended in accordance with clause 3.7.11 of the Transpower IM because of a large buildup in EV account balance , is the amount calculated for each pricing year determined in accordance with the Transpower IM ;
forecast FX rate	has the meaning given in the Capex IM ;
forecast MAR	has the meaning given in the Transpower IM and for each pricing year , is: <ul style="list-style-type: none"> (a) the amount set out in Column 8 in Schedule A; or (b) where the Commission reconsiders and determines that Transpower's IPP should be amended in accordance with the Transpower IM, the amount as determined in accordance with the Transpower IM;
forecast opex	has the meaning given in the Transpower IM ;
forecast SMAR	has the meaning given in the Transpower IM and, for each pricing year , is: <ul style="list-style-type: none"> (a) the amount set out in Column 9 in Schedule A; or (b) where the Commission reconsiders and determines that Transpower's IPP should be amended in accordance with the Transpower IM, the amount as determined in accordance with the Transpower IM;
found asset	has the meaning given in the Transpower IM ;

G

GAAP	has the meaning given in the Transpower IM ;
-------------	---

gain or loss on capital expenditure commitments	means a gain or loss required under GAAP to be recognised in profit or loss in Transpower's Statement of Comprehensive Income in respect of: <ul style="list-style-type: none"> (a) foreign currency capital expenditure commitments and associated designated hedges; and (b) commodity hedge instruments;
good electricity industry practice	has the meaning given in Part 1 of the code ;
grid	has the meaning given in the Capex IM ;
grid output	has the meaning given in the Capex IM ;
grid output adjustment	has the meaning given in the Capex IM ;
grid output incentive rate	has the meaning given in the Capex IM and, for the purposes of this determination, the rates for revenue-linked grid output measures are specified in Tables 4.2 and 4.3;
grid output measure	has the meaning given in the Capex IM ;
grid output target	has the meaning given in the Capex IM and, for the purposes of this determination, the targets for revenue-linked grid output measures are specified in Tables 4.2 and 4.3;
H	
HVAC	means high voltage alternating current;
HVDC	means high voltage direct current;
HVDC pole	means an HVDC system circuit between Benmore and Haywards comprising the converter stations at Benmore and Haywards and the HVDC transmission circuit between them, carried on HVDC overhead line and undersea cable, connecting the converter stations;
HVDC resilience project	means a project undertaken for the primary purpose of improving the resilience of HVDC towers against wind and flood damage

I

ID determination	has the meaning given in the Transpower IM ;
IMs	means the Transpower IM and the Capex IM taken together;
incremental rolling incentive scheme (or IRIS)	means the incentive scheme specified in Part 3, subpart 6 of the Transpower IM ;
independent assurance report	means a report issued by an assurance auditor on an annual compliance statement in accordance with clause 37;
instrument that ceases to be an effective hedge	means a financial instrument entered into or acquired by Transpower in accordance with its policy on capital expenditure hedging that qualifies as an effective hedge at the date of entering into or acquiring the instrument, but that ceases during the disclosure year to qualify for hedge accounting in accordance with GAAP , and such ceasing to qualify results in a gain or loss being incorporated into its Statement of Comprehensive Income or equivalent audited statement of income and expenses for financial accounting purposes;
interruption	means a temporary cessation of conveyance of electricity between grid assets owned by Transpower and the assets owned or operated by a customer at a point of service to the grid ;
IPP	has the meaning given in the Transpower IM ;
IPP revenue growth rate	means the maximum allowable annual percentage growth in forecast SMAR for each pricing year as set out in clause 8.3;
L	
large buildup in EV account balance	has the meaning given in the Transpower IM ;
listed project	has the meaning given in the Capex IM ;
lost asset	has the meaning given in the Transpower IM ;

low incentive rate base capex allowance has the meaning given in the **Capex IM**;

M

major capex has the meaning given in the **Capex IM**;

major capex expenditure and output adjustment has the meaning given in the **Capex IM**;

major capex incentive rate has the meaning given in the **Capex IM**;

major capex project has the meaning given in the **Capex IM**;

major capex proposal has the meaning given in the **Capex IM**;

major capex sunk costs adjustment has the meaning given in the **Capex IM**;

measure of grid performance has the meaning given in the **Capex IM** and, for the purposes of this determination, the measures for **revenue-linked grid output measures** are specified in clause 13.1.1;

N

natural disaster means an event caused by forces beyond human control, including without limitation:

- (a) earthquakes;
- (b) landslips;
- (c) floods;
- (d) severe weather events, including lightning, storms, wind and rain;
- (e) tsunamis; and
- (f) volcanic and hydrothermal activity;

new investment contract has the meaning given in the **Transpower IM**;

non-recurrent amount has the meaning given in the **Transpower IM**;

normalisation event has the meaning specified in clause 21.2;

O

opening RAB value	has the meaning given in the Transpower IM ;
operating cost	has the meaning given in the Transpower IM ;
operating expenditure or opex	has the meaning given in the Transpower IM ;
opex allowance	means, for each disclosure year , the amount of operating expenditure specified by the Commission for the purposes of: <ul style="list-style-type: none"> (a) calculating the forecast MAR; or (b) calculating the ex-post economic gain or loss;
opex incentive amount	has the meaning given in the Transpower IM ;
other regulated income	means income received by Transpower , associated with the supply of electricity transmission services , excluding: <ul style="list-style-type: none"> (a) actual transmission revenue; (b) income associated with electricity transmission services performed by Transpower as system operator; (c) income associated with new investment contracts; and (d) investment-related income;
outage	has the meaning set out in clause 12.130 of the code , as amended from time to time, other than as specified in code subclauses 12.130(2)(c) and 12.130(2)(d), and excludes those that are: <ul style="list-style-type: none"> (a) of less than one minute in duration; (b) at the request of, or caused by, a customer; and (c) due to correct operation of Transpower's assets, caused by events in a customer's assets;

P

pass-through costs	has the meaning given in the Transpower IM ;
point of service	means a point of service (within the meaning of Part 1 of the code) that is specified in Schedule F;
point of service sub-category	means a group of points of service identified by reference to a characteristic of service, as set out in Schedule F, and is one of the following: <ul style="list-style-type: none"> (a) in relation to measure of grid performance GP1: <ul style="list-style-type: none"> (i) GP1A: “N-1 security high economic consequence”; (ii) GP1B: “N-1 security material economic consequence”; (iii) GP1C: “N security high economic consequence”; (iv) GP1D: “N security material economic consequence”; (v) GP1E: “N-1 security generator”; and (vi) GP1F: “N security generator”; (b) in relation to measure of grid performance GP2: <ul style="list-style-type: none"> (i) GP2A: “N-1 security high economic consequence”; (ii) GP2B: “N-1 security material economic consequence”; (iii) GP2C: “N security high economic consequence”; (iv) GP2D: “N security material economic consequence”; (v) GP2E: “N-1 security generator”; and

(vi) GP2F: “N security generator”;

(c) in relation to **measure of grid performance** GP4:

(i) GP4A: “N-1 security high economic consequence”;

(ii) GP4B: “N-1 security material economic consequence”;

(iii) GP4C: “N security high economic consequence”;

(iv) GP4D: “N security material economic consequence”;

Pole 2	means the HVDC pole owned by Transpower and known as ‘Pole 2’;
Pole 3	means the HVDC pole owned by Transpower and known as ‘Pole 3’;
pricing compliance statement	means a written statement made by Transpower under clause 24;
pricing year	has the meaning given in the Transpower IM ;
programme	has the meaning given in the Capex IM ;
project	has the meaning given in the Capex IM ;
project k	means the Pole 2 life-extension project planned by Transpower in RCP4 ;
project l	means the combined Thyristor control unit and Human Machine Interface software upgrade project planned by Transpower in RCP4 ;
Project m	means the project for testing and maintenance of Cook Strait subsea cables (and consequential work) planned by Transpower in RCP4 ;
publicly disclose (or public disclosure)	means to make available to the public on Transpower’s website and to notify the Commission that it has been made available;

R

RCP2	means the regulatory period prior to RCP3 , being the period from 1 April 2015 to 31 March 2020, provided that references to the final disclosure year in RCP2 means the disclosure year ending on 30 June 2020;
RCP3	means the regulatory period from 1 April 2020 to 31 March 2025, provided that references to the final disclosure year in RCP3 means the disclosure year ending on 30 June 2025;
RCP4	means the regulatory period from 1 April 2025 to 31 March 2030, provided that references to the final disclosure year in RCP4 means the disclosure year ending on 30 June 2030;
RCP4 HVDC transitional adjustment	means an EV account entry that the Commission has determined is an RCP4 HVDC transitional adjustment under clause 11.2;
recoverable cost	has the meaning given in the Transpower IM ;
regulatory period	means a period determined by the Commission under the Act , during which a particular individual price-quality path determination applies to Transpower , including but not limited to RCP2 , RCP3 , or RCP4 ;
regulatory tax allowance	means the tax allowance determined in accordance with clause 3.4.1 of the Transpower IM ;
related party	has the meaning given in the Transpower IM ;
relevant pricing year	in relation to a disclosure year , means the pricing year commencing on 1 April immediately before the start of that disclosure year ;
reopener event	has the meaning given in the Transpower IM ;

restoration

to a **customer**, means the earliest of:

- (a) for generators:
 - (i) when the generator circuit breaker is closed; or
 - (ii) the generator is notified that **Transpower equipment** has been returned to service and is available for generation to be reconnected; or
 - (iii) operational control for connecting the **Transpower** assets is returned to the generator; and
- (b) for **customers** other than generators:
 - (i) when the first feeder is closed, if feeder circuit breakers have been opened; or
 - (ii) when the supply bus is relivened, if feeder circuit breakers have remained closed after the **interruption**; or
 - (iii) when 75% of the load is returned to service by way of a backfeed within the **customer's** system or by generators; or
 - (iv) when **Transpower** has readied all of its **Transpower equipment** and has made reasonable efforts to advise the **customer** that the **Transpower equipment** can be returned to service;

revaluation

has the meaning given in the **Transpower IM**;

revenue-linked grid output measure

has the meaning given in the **Capex IM**;

S**standard incentive rate base capex allowance**

has the meaning given in the **Capex IM**;

system operator	has the meaning given in the Transpower IM ;
	T
tax rules	has the meaning given in the Transpower IM ;
term credit spread differential allowance	has the meaning given in the Transpower IM ;
terrorist act	has the meaning given in section 5 of the Terrorism Suppression Act 2002;
third party	means not a related party and excludes, for the avoidance of doubt, an employee or party: <ul style="list-style-type: none"> (a) contracted by Transpower to provide electricity lines services; or (b) contracted by a related party to provide electricity lines services for Transpower;
TPM	has the meaning given in the Transpower IM ;
Transpower	has the meaning given in the Act ;
Transpower equipment	means equipment that Transpower owns, leases, borrows or hires for the purposes of maintaining supply of electricity transmission services , where Transpower has performed technical due diligence on that equipment to ensure it was fit for its intended purpose;
Transpower IM	means the <i>Transpower Input Methodologies Determination</i> [2012] NZCC 17, including, for the avoidance of doubt, any amendment applicable to RCP4 ;

U**unplanned interruption**

means any **interruption** for a period of one minute or longer in respect of which less than 24 hours' notice, or no notice, was given, either to the public or to **customers** affected by the **interruption** and excludes:

- (a) any unplanned **interruptions** originating on another party's system and where the **Transpower grid** operated correctly;
- (b) any unplanned **interruptions** to the auxiliary load used by electricity generator assets; and
- (c) for all **point of service sub-categories** other than GP1E, GP1F, GP2E, and GP2F:
 - a. load restrictions achieved completely by the use of controllable load, interruptible load or demand-response;
 - b. automatic under-frequency load-shedding; and
 - c. unplanned interruptions for which all load is supplied by a backfeed or by embedded generation;

V**value of commissioned asset**

has the meaning given in the **Transpower IM**;

value of found asset

has the meaning given in the **Transpower IM**;

W**WACC**

means, for the purpose of calculating-

- (a) a **forecast MAR**, an update of a **forecast MAR** or an **ex-post economic gain or loss**, the 65th percentile for the vanilla mid-point estimate of weighted average cost of capital determined by the **Commission** in accordance with clause 3.5.5(1) of the **Transpower IM**; and
- (b) a **forecast SMAR**, or an update of a **forecast SMAR**, the 65th percentile for the post-tax mid-point estimate of weighted average cost of capital determined by the **Commission** in accordance with clause 3.5.5(2) of the **Transpower IM**;

work stoppage

means a temporary cessation of work as a form of protest, including without limitation a strike or lockout;

working day

has the meaning given in the **Act**; and

works under construction

has the meaning given in the **Transpower IM**.

Part 3: Price path

8. Maximum revenues

- 8.1 The maximum revenue that **Transpower** may recover for **electricity transmission services** for each **pricing year** is the **forecast SMAR** for that **pricing year**.
- 8.2 The forecast revenue for **electricity transmission services** that **Transpower** uses for setting transmission charges under the **TPM** for each **pricing year** must not exceed the **forecast SMAR** for that **pricing year**.
- 8.3 The **IPP revenue growth rate** for:
 - 8.3.1 the first and second **pricing years** of **RCP4** is 15.11%; and
 - 8.3.2 the third, fourth, and fifth **pricing years** of **RCP4** is 5.00%.
- 8.4 If the **Commission** or **Transpower** nominates a **reopener event** under clause 3.7.2 of the **Transpower IM**, or the **Commission** advises **Transpower** that it is reconsidering the **IPP** under clause 3.7.12 of the **Transpower IM**, **Transpower** must provide to the **Commission** and **publicly disclose**, no later than 80 **working days** after the end of the most recent **disclosure year**, for each of the remaining complete **pricing years** of **RCP4**:
 - 8.4.1 a proposed updated **forecast MAR** calculated in accordance with clause 33;
 - 8.4.2 a proposed updated **forecast SMAR** calculated in accordance with clause 33; and
 - 8.4.3 where applicable, the updated **forecast EV adjustment** amounts calculated in accordance with clauses 35.2 and 35.3 and Schedule D, Formula I (Forecast EV adjustment).
- 8.5 For the purposes of clause 8.4:
 - 8.5.1 if the **reopener event** is **Transpower** becoming eligible for a **delivery risk adjustment**, Schedule EA applies in respect of any increase to the **base capex allowance**, the **opex allowance**, or the **forecast opex**;
 - 8.5.2 **Transpower** must apply the calculations required in clause 33 and Schedule D, and must include supporting information for its calculations; and
 - 8.5.3 the reference in clause 8.4 to 'most recent **disclosure year**' refers to the **disclosure year** before the first **pricing year** to which the updated **forecast SMAR** applies.

9. Wash-up calculation

- 9.1 For each **disclosure year**, **Transpower** must calculate an **ex-post economic gain or loss** in accordance with clause 32.1.

9.2 For the purposes of calculating an **ex-post economic gain or loss**, **Transpower** must convert the **actual transmission revenue** from a **pricing year** value to a **disclosure year** value in Schedule E, Formula H by applying the cash flow timing factor applicable for Schedule E, Formula H as specified in 'Column 4' of Schedule E.

10. Listed projects

10.1 The **projects** or **programmes** identified as **listed projects** for **RCP4** are set out in Schedule I.

10.2 If at any time during **RCP4** a **project** or **programme** identified in Schedule I ceases to be a **base capex project** or **base capex programme**, it is no longer a **listed project** for **RCP4**.

11. RCP4 HVDC transitional adjustment

11.1 Clause 11.2 applies to an **EV account entry** that corresponds to a **base capex expenditure adjustment** in respect of expenditure by **Transpower** in **RCP3** that:

11.1.1 is the payment of a deposit by **Transpower** to a supplier to replace an undersea cable for an **HVDC pole**; and

11.1.2 was not approved in **RCP3** as **base capex** by the **Commission**.

11.2 The **Commission** may determine, by notice in writing to **Transpower**, that an **EV account entry** is an **RCP4 HVDC transitional adjustment**.

11.3 An **RCP4 HVDC transitional adjustment** must be offset with an **EV account entry** in the amount of any **base capex expenditure adjustment** related to the **capex** incurred, including any interest accrued on that entry.

Part 4: Quality standards and performance measures

12. Overview of quality standards and performance measures

12.1 Table 4.1:

12.1.1 provides an overview of the performance measures that apply to **Transpower** in the supply of **electricity transmission services**; and

12.1.2 indicates clause references for the performance measures and for any associated quality standards.

Table 4.1: Overview of quality standards and performance measures

Measure	Summary description	Performance measure	Quality standard
	<i>Measures of grid performance</i>		
GP1	measures the total number of unplanned interruptions for each point of service sub-category during a disclosure year	cl 14-15	cl 14
GP2	measures the average duration of unplanned interruptions for each point of service sub-category during a disclosure year	cl 16-17	cl 16
GP4	measures the amount of energy demand that is not supplied due to a transmission interruption to supply during a disclosure year	cl 27.1.3	—
	<i>Asset performance measures</i>		
AP1	measures HVDC energy availability of Pole 2 and Pole 3 as a percentage of annual capacity during a disclosure year	cl 18	cl 18
AP1.2	which measures the HVDC link's operational capacity during a disclosure year	cl 27.1.4	—
AP2	measures the percentage of time that the HVAC assets listed in Schedule G are available during a disclosure year	cl 19	cl 19
AP3	measures the extent to which Transpower meets planned return to service times for planned outages of certain HVAC assets during a disclosure year	cl 27.1.1	—
AP4	measures the extent to which Transpower communicates delays to affected parties of planned outage return to service times of certain HVAC assets during a disclosure year	cl 27.1.2	—
	<i>Asset health measure</i>		
AH	the assessed value for each asset health measure asset class	cl 22-23	cl 22
	<i>Customer satisfaction measure</i>		
CS1	measures customers' satisfaction with Transpower's engagement and consultation	cl 27.1.5	—
CS2	measures Transpower's responsiveness in relation to new and enhanced grid connections	cl 27.1.6	—

13. Revenue-linked performance measures13.1 The following performance measures are **revenue-linked grid output measures**:

13.1.1 GP1 and GP2, which are **measures of grid performance**; and

13.1.2 AP1 and AP2, which are **asset performance measures**.

14. GP1 quality standard

14.1 **Transpower** complies with the GP1 quality standard for a **disclosure year**:

14.1.1 if it complies with the **measure of grid performance** GP1 assessment for that **disclosure year**; or

14.1.2 if it complied with the **measure of grid performance** GP1 assessment for each of the 2 preceding **disclosure years**.

15. Measure of grid performance GP1 assessment

15.1 For **Transpower** to comply with the **measure of grid performance** GP1 assessment for a **disclosure year**, the assessed value for 4 or more **point of service sub-categories** must not exceed the quality limit specified for the **disclosure year** for the **point of service sub-category** in Table 4.2.

15.2 For each **disclosure year**, **Transpower** must calculate an assessed value for each **point of service sub-category**.

15.3 The assessed value for a **point of service sub-category** for a **disclosure year** is the sum of **unplanned interruptions** that commenced in the **disclosure year** for the **point of service sub-category**.

15.4 For the purposes of clause 14.1.2, **Transpower** has complied with the **measure of grid performance** GP1 assessment for a **disclosure year** in **RCP3** if it complied with the assessment for that **disclosure year** in accordance with Part 4 of the **RCP3 IPP**.

16. GP2 quality standard

16.1 **Transpower** complies with the GP2 quality standard for a **disclosure year**:

16.1.1 if it complies with the **measure of grid performance** GP2 assessment for that **disclosure year**; or

16.1.2 if it complied with the **measure of grid performance** GP2 assessment for each of the 2 preceding **disclosure years**.

17. Measure of grid performance GP2 assessment

17.1 For **Transpower** to comply with the **measure of grid performance** GP2 assessment for a **disclosure year**, the assessed value for 4 or more **point of service sub-categories** must not exceed the quality limit specified for the **disclosure year** for the **point of service sub-category** in Table 4.2.

17.2 For each **disclosure year**, **Transpower** must calculate an assessed value for each **point of service sub-category**.

- 17.3 The assessed value for a **point of service sub-category** for a disclosure year is the sum of **unplanned interruptions** that commenced in the **disclosure year** for the **point of service sub-category**.
- 17.4 For the purposes of clause 16.1.2, **Transpower** has complied with the **measure of grid performance GP2** assessment for a **disclosure year** in **RCP3** if it complied with the assessment for that **disclosure year** in accordance with Part 4 of the **RCP3 IPP**.

18. AP1 quality standard

- 18.1 To comply with the **asset performance measure AP1** quality standard for a **disclosure year**, the **HVDC** energy availability for **Pole 2** and **Pole 3** for that **disclosure year** must be higher than the AP1 quality standard value in Table 4.3.
- 18.2 For the purposes of clause 18.1, the **HVDC** energy availability for **Pole 2** and **Pole 3** for the **disclosure year** is calculated as a percentage term in accordance with the formula:

$$100 - \frac{100 \sum_j^N (a_j - b_j) \times (c_j - d_j)}{e \times f} + k + l + m \%$$

where:

j is any outage that reduced capacity of the **HVDC pole(s)** in the disclosure year

N is number of outages associated with the **HVDC pole(s)**

a is the reduction in capacity due to the **outage**

b is the reduction in capacity due to the **outage** that was planned and due to a **listed project**, an **enhancement and development project**, a **major capex project**, or a **HVDC resilience project**

c is the duration in hours of the **outage**

d is the duration in hours of the **outage** that was planned and due to a **listed project**, an **enhancement and development project**, a **major capex project**, or a **HVDC resilience project**

e is the maximum capacity of the **HVDC poles**

f is total number of hours in the **disclosure year**

k is the amount of adjustment *k* under clause 18.3 and 18.4

l is the amount of adjustment *l* under clause 18.3 and 18.4

m is the amount of adjustment *m* under clause 18.3 and 18.4.

- 18.3 Subject to clause 18.4, an adjustment *k*, *l*, or *m* (for **project k**, **project l**, or **project m**, respectively) for a **disclosure year** is calculated in accordance with the following formula:

$$\frac{g \times h}{e \times f} \times 100\%$$

where:

g is reduction in capacity due to **outages** that reduce capacity of the **HVDC pole(s)** in the **disclosure year**, and that were the result of the **project**

h is the duration in hours of **outages** that reduce capacity of the **HVDC pole(s)** in the disclosure year and that were the result of the **project**

e is the maximum capacity of the **HVDC poles**

f is total number of hours in the **disclosure year**.

- 18.4 An adjustment calculated under clause 18.3 must be modified to the extent necessary to meet the following requirements:

18.4.1 adjustment *k* must not be greater than 1.26% in any **disclosure year**;

18.4.2 if adjustment *k* is greater than 0% in a disclosure year (DY_n):

(a) in the following **disclosure year** (DY_{n+1}), adjustment *k* must not be more than 1.26% less the amount of adjustment *k* in the previous **disclosure year** (DY_n); and

(b) in each subsequent **disclosure year** (DY_{n+2} etc), **adjustment k** must be 0%;

18.4.3 adjustment *l* must not be greater than 3.84% in a **disclosure year**;

18.4.4 if adjustment *l* is greater than 0% in a **disclosure year** (DY_n), in each subsequent **disclosure year** (DY_{n+1} etc), adjustment *l* must be 0%; and

18.4.5 adjustment *m* must not be greater than 0.8% in any **disclosure year**.

19. AP2 quality standard

19.1 To comply with the **asset performance measure** AP2 quality standard for a **disclosure year**, the percentage of the time that the **HVAC** assets listed in Schedule G are available during that **disclosure year** must be higher than the AP2 quality standard value in Table 4.3.

19.2 For the purposes of clause 19.1, the percentage of the time that the **HVAC** assets are available during the **disclosure year** is calculated as a percentage term in accordance with the formula:

$$100 - \frac{100 \sum_j^N (c_j - d_j)}{n \times f} \%$$

where:

j is any **outage** on **HVAC** assets listed in Schedule G

c is the duration in hours of the **outage**

d is the duration in hours of the **outage** that was planned and due to a **listed project**, an **enhancement and development project**, a **major capex project**, or a **new investment contract**

n is the number of **HVAC** assets listed in Schedule G

f is the total number of hours in the **disclosure year**.

Table 4.2: Measures of grid performance for grid output targets, caps, collars, quality limits and grid output incentive rates for revenue-linked grid output measures

Point of service sub-category	Cap	Grid output target	Collar	Quality limit	Grid output Incentive rate (amount that Transpower may recover or must bear)
GP1: number of interruptions (per annum)					\$ per interruption
GP1A: N-1 security high economic consequence	0	4	8	8	789,666
GP1B: N-1 security material economic consequence	4	21	38	38	170,537
GP1C: N security high economic consequence	0	2	4	4	185,592
GP1D: N security material economic consequence	4	15	26	26	57,795
GP1E: N-1 security generator	4	9	14	14	50,000
GP1F: N security generator	4	7	10	10	83,333
GP2: average duration of interruption (min)					\$ per minute
GP2A: N-1 security high economic consequence	23	73	123	123	63,173
GP2B: N-1 security material economic consequence	27	74	121	121	61,683
GP2C: N security high economic consequence	15	66	117	117	7,278
GP2D: N security material economic consequence	0	104	208	208	6,113
GP2E: N-1 security generator	30	225	420	420	1,282
GP2F: N security generator	0	123	246	246	2,033

Table 4.3: Asset performance measures grid output targets, caps, collars, quality standards and grid output incentive rates for revenue-linked grid output measures

Asset performance measure	Cap	Grid output target	Collar	Quality standard	Grid output Incentive rate (amount that Transpower may recover or must bear)
AP1: HVDC availability (%)					\$ per 1%
HVDC availability	99.00	98.00	97.00	96.00	1,000,000
AP2: HVAC availability (%)					\$ per 1%
HVAC availability (Schedule G assets)	98.62	98.25	97.87	97.45	5,320,564

20. The grid output adjustment

- 20.1 **Transpower** must calculate the **grid output adjustment** for each **disclosure year** for the **revenue-linked grid output measures**.
- 20.2 For **measures of grid performance** GP1 and GP2 and **asset performance measures** AP1 and AP2, the **grid output target, cap, collar, and grid output incentive rate** in Tables 4.2 and 4.3 apply.
- 20.3 For the purposes of calculating the **grid output adjustment**, the output achieved is:
- 20.3.1 for each of the **point of service sub-categories** GP1A, GP1B, GP1C, GP1D, GP1E and GP1F, the sub-category's assessed value under clause 15.3;
- 20.3.2 for each of the **point of service sub-categories** GP2A, GP2B, GP2C, GP2D, GP2E and GP2F, the sub-category's assessed value under clause 17.3;
- 20.3.3 for **asset performance measure** AP1, the percentage of **HVDC** energy availability as calculated under clause 18.2; and
- 20.3.4 for **asset performance measure** AP2, the percentage of time that the **HVAC** assets listed in Schedule G are available as calculated under clause 19.2.

21. Normalisation

21.1 An **interruption** or **outage** must be excluded from the calculations made under clauses 15.3, 17.3, 18.2, and 19.2 if the **Commission** decides under clause 21.4 that a **normalisation event** in respect of that **interruption** or **outage** has occurred in a **disclosure year**.

21.2 A 'normalisation event' means an **interruption** or **outage** that the **Commission** has decided is a normalisation event in accordance with clause 21.4 that—

21.2.1 was beyond the reasonable control of **Transpower**;

21.2.2 was not caused, or materially contributed to, by any failure of **Transpower** to exercise **good electricity industry practice**;

21.2.3 had a duration of 24 hours or more, in circumstances where that duration was—

(a) beyond the reasonable control of **Transpower**; and

(b) not caused, or materially contributed to, by any failure of **Transpower** to exercise **good electricity industry practice**; and

21.2.4 was the result of:

(a) **natural disaster**;

(b) fire not caused by **Transpower equipment** failure;

(c) explosion not caused by **Transpower equipment** failure;

(d) **civil commotion**;

(e) a **terrorist act**;

(f) malicious damage;

(g) war (declared or undeclared);

(h) revolution;

(i) **contamination**;

(j) action or inaction by a court or government agency (including denial, refusal or failure to grant any authorisation, despite timely best endeavour to obtain an authorisation);

(k) a **work stoppage**;

(l) a dispute between an employer and employees;

(m) work bans; or

- (n) acts or omissions (other than failure to pay money) of a **third party** that affect the ability of **Transpower** to prevent or minimise the **interruption** or **outage**.

21.3 **Transpower** may make a written application to the **Commission** for each **interruption** or **outage** in that **disclosure year** that **Transpower** considers is a **normalisation event**, where that written application must:

21.3.1 be made no later than 42 **working days** after the end of the **disclosure year**;

21.3.2 include reasons for why **Transpower** considers a **normalisation event** has occurred, including why it considers:

- (a) the **interruption** or **outage** was beyond **Transpower's** reasonable control;
- (b) the effect of the **interruption** or **outage** on the **grid**, including managing to a shorter duration than that which actually occurred, was beyond **Transpower's** reasonable control; and
- (c) it exercised **good electricity industry practice** in relation to the cause and effects of the **interruption** or **outage**;

21.3.3 include supporting evidence for the reasons provided in accordance with clause 21.3.2, including, without limitation, information on the relevant design standards of any **Transpower equipment** involved in the **interruption** or **outage**;

21.3.4 include proposed reassessed values of any calculations made under clauses 15.3, 17.3, 18.2, and 19.2 that are relevant to **Transpower's** written application, reassessed as if the **interruption** or **outage** was excluded from those measures in accordance with clause 21.1; and

21.3.5 include any other information that **Transpower** considers is relevant to its application.

21.4 Where the **Commission** receives a written application from **Transpower** in accordance with clause 21.3, the **Commission** must decide whether each **interruption** or **outage** that is the subject of that written application is a **normalisation event**, using the criteria in clause 21.2 and:

21.4.1 publish its decision on the Commission's website, which describes:

- (a) any **interruption** or **outage** that it has decided is a **normalisation event**;
- (b) reasons for why the **Commission** has reached that decision, based on the criteria in clause 21.2; and

- (c) which calculations made under clauses 15.3, 17.3, 18.2, and 19.2 the **Commission** has decided are affected as a result of its decision that the **interruption** or **outage** is a **normalisation event**; and

21.4.2 give, or post notice of, its decision to **Transpower**.

22. AH quality standard

22.1 **Transpower** complies with the AH quality standard for the **disclosure year** beginning on 1 July 2026:

22.1.1 if it complies with the AH assessment for that **disclosure year**; or

22.1.2 if it complied with the AH assessment for the **disclosure year** beginning on 1 July 2025.

22.2 **Transpower** complies with the AH quality standard for a **disclosure year** beginning on or after 1 July 2027:

22.2.1 if it complies with the AH assessment for that **disclosure year**; or

22.2.2 if it complied with the AH assessment for each of the 2 preceding **disclosure years**.

23. AH assessment

23.1 For **Transpower** to comply with the AH assessment for a **disclosure year**, the assessed value for 4 or more **asset health measure asset classes** must not exceed the quality limit specified for the **disclosure year** for those **asset health measure asset classes** in Table 4.4.

23.2 For the purposes of the AH assessment, the following **asset health measure asset classes** must be weighted by asset criticality:

23.2.1 conductors;

23.2.2 insulators;

23.2.3 power transformers; and

23.2.4 outdoor circuit breakers.

23.3 For each **disclosure year**, **Transpower** must calculate an assessed value:

23.3.1 for the conductors **asset health measure asset class** in accordance with the formula:

$$\frac{w}{x} \times 100\%$$

where:

w is the total length in circuit km of transmission line conductors with an AHI of 8 or higher

x is the total length in circuit km of all transmission line conductors; and

23.3.2 for every other **asset health measure asset class** in accordance with the formula:

$$\frac{y}{z} \times 100\%$$

where:

y is the sum of the assets in the asset class with an AHI of 8 or higher

z is the sum of the assets in the asset class.

Table 4.4: Quality limits for asset health measure asset classes by disclosure year

Asset health measure asset class	2025/2026 (%)	2026/2027 (%)	2027/2028 (%)	2028/2029 (%)	2029/2030 (%)
Conductors	1.76	1.97	2.18	2.37	2.61
Insulators	2.79	3.14	3.85	4.76	5.98
Power transformers	5.17	9.15	11.53	12.18	13.35
Outdoor circuit breakers	1.24	1.45	2.46	3.19	4.27
Protection relays	7.56	6.92	6.37	8.12	8.61
Tower grillage foundations	4.26	3.51	3.90	4.04	3.99
Tower protective coatings	13.98	15.89	17.79	20.02	22.09

Part 5: Compliance and information reporting

24. Pricing compliance statement

24.1 No later than five **working days** after **Transpower** announces, or amends, its forecast revenue for the purpose of setting or resetting charges under the **TPM** for a **pricing year**, **Transpower** must:

24.1.1 provide to the **Commission** a written statement (the **pricing compliance statement**); and

24.1.2 **publicly disclose the pricing compliance statement.**

24.2 The **pricing compliance statement** must:

24.2.1 state whether or not **Transpower** has complied with the price path in Part 3 for the **pricing year**;

24.2.2 include any information reasonably necessary to demonstrate whether **Transpower** has complied with the price path in Part 3 for the **pricing year**, including but not limited to a summary of forecast total revenues applied in the **TPM** for the **pricing year**;

24.2.3 if **Transpower** has not complied with the price path in Part 3 for the **pricing year**, disclose:

(a) each requirement in Part 3 that is not complied with; and

(b) the reasons for non-compliance in each case;

24.2.4 state the date on which the **pricing compliance statement** was prepared; and

24.2.5 include a certificate in the form set out in Schedule J signed by at least two **directors** of **Transpower**.

25. Annual compliance statement

25.1 No later than 105 **working days** after the end of each **disclosure year**, **Transpower** must:

25.1.1 provide to the **Commission** a written statement (the **annual compliance statement**); and

25.1.2 **publicly disclose the annual compliance statement** and accompanying **independent assurance report**.

25.2 The **annual compliance statement** must:

25.2.1 state whether or not **Transpower** has:

(a) complied with the quality standards in clauses 14, 16, 18, 19, and 22;

(b) complied with the requirement to publicly disclose, in accordance with the **ID determination**, its annual **grid output adjustment** calculation for the **disclosure year**, including the values for 'm' calculated in accordance with Schedule B, clause B2(1) of the **Capex IM**;

(c) complied with requirements related to **grid output adjustment** calculations and **public disclosure**; and

- (d) complied with requirements related to wash-up calculations and **public disclosure**;

25.2.2 provide the information reasonably necessary to demonstrate compliance with the quality standards;

25.2.3 if **Transpower** has not complied with any quality standards, disclose:

- (a) each quality standard that has not been complied with; and
- (b) the reasons for non-compliance in each case;

25.2.4 include the following performance information:

- (a) for **measure of grid performance GP1**: assessed values for the **disclosure year** of each **point of service sub-category** against the **caps, grid output targets, collars** and quality limits in Table 4.2 and the quality standard in clause 14 for that **disclosure year**;
- (b) for **measure of grid performance GP2**: assessed values for the **disclosure year** of each **point of service sub-category** against the **caps, grid output targets, collars** and quality limits in Table 4.2 and the quality standard in clause 16 for that **disclosure year**;
- (c) for **asset performance measure AP1**: assessed values for the **disclosure year** against the **cap, grid output target** and **collar** in Table 4.3, and the quality standard in clause 18;
- (d) for **asset performance measure AP2**: assessed values for the **disclosure year** against the **cap, grid output target** and **collar** in Table 4.3, and the quality standard in clause 19; and
- (e) for **asset health measure AH**: assessed values for the **disclosure year** of each **asset health measure asset class** in Table 4.4 against the quality standard in clause 22 for that **disclosure year**;

25.2.5 state the date on which the **annual compliance statement** was prepared;

25.2.6 include a certificate in the form set out in Schedule K, signed by at least two **directors** of **Transpower**; and

25.2.7 be accompanied by an **independent assurance report** procured and prepared in accordance with clause 37.

26. Annual compliance statement – information required

26.1 The **annual compliance statement** for a **disclosure year** must include:

26.1.1 the **ex-post economic gain or loss** for the **disclosure year**, calculated in accordance with clause 32.1 and Schedule E, including any supporting information;

- 26.1.2 the forecast revenue for **electricity transmission services** that **Transpower** used for setting charges under the **TPM** for the **relevant pricing year**;
- 26.1.3 the **actual transmission revenue** for the **relevant pricing year**;
- 26.1.4 a description and explanation of any voluntary revenue reduction **Transpower** has made in calculating the **ex-post economic gain or loss** for the **disclosure year**;
- 26.1.5 an updated summary of the **EV account** as set out in Schedule B and an updated forecast **EV account** balance at the end of **RCP4**, where these are supported by the further information required in clause 34.1, and where the **EV account entries** are calculated in accordance with clause 34.2;
- 26.1.6 a summary of **pass-through costs** and **recoverable costs** for the **disclosure year** as set out in Schedule H, including:
 - (a) a description and explanation of any **operating costs** incurred as part of a **major capex project**; and
 - (b) a summary of any prudent net additional **operating costs** incurred in responding to a **catastrophic event**, as determined by the **Commission**;
- 26.1.7 an explanation for the difference between the **forecast opex** and **actual opex**, including in each forecast amount and actual amount, the operating lease payments otherwise capitalised in accordance with the **Transpower IM**;
- 26.1.8 updated summaries of the approved **base capex** as set out in Schedules C1 to C4;
- 26.1.9 details of any changes to **Transpower's** policy of hedging **capital expenditure** during the **disclosure year**; and
- 26.1.10 where a **normalisation event** is excluded from a calculation made for a **revenue-linked grid output measure** in accordance with clause 21.1 for a **disclosure year**, a description of the adjustment to the **EV account** to reflect the effect on the **grid output adjustment** for that **disclosure year**.

27. Information to accompany the annual compliance statement

- 27.1 **Transpower** must **publicly disclose** the following additional information for each **disclosure year** at the same time as its **annual compliance statement** for the following performance measures:
 - 27.1.1 for **asset performance measure** AP3, which measures the extent to which **Transpower** meets planned return to service times for planned **outages** of the **HVAC** assets set out in Schedule G, those assets in Schedule G that are returned to service two or more hours after **Transpower's** planned return to service time, including:

- (a) when this has occurred;
 - (b) the known or estimated impact on affected parties, if applicable; and
 - (c) the steps **Transpower** took to inform affected parties and the market;
- 27.1.2 for **asset performance measure** AP4, which measures the extent to which **Transpower** communicates delays to affected parties of planned **outage** return to service times of the **HVAC** assets set out in Schedule G, the percentage of **outages** that **Transpower** gives 1.5 hours or less notice to the market in the event assets are going to be returned to service later than:
- (a) the original planned return to service time; or
 - (b) the extended return to service time;
- 27.1.3 for **measure of grid performance** GP4, which measures the extent to which energy demand is not supplied due to **interruptions** or **outages**, the percentage of total energy demand that was not supplied due to **interruptions** or **outages** in the **disclosure year**. GP4 is calculated by dividing the amount (in MWh) of energy not served due to **interruptions** or **outages** by the amount (in MWh) of total energy demand (being the sum of the amount of energy served and the amount of energy not served due to **interruptions** or **outages**) in relation to each of the following **point of service sub-categories**:
- (a) GP4A: “N-1 security high economic consequence”;
 - (b) GP4B: “N-1 security material economic consequence”;
 - (c) GP4C: “N security high economic consequence”; and
 - (d) GP4D: “N security material economic consequence”;
- 27.1.4 for **asset performance measure** AP1.2, which measures the **HVDC** link’s operational capacity during the **disclosure year**, calculated as the percentage available operating capacity limit against the maximum capacity of the **HVDC** link. The operational capacity limit is calculated in line with **Transpower’s** policies and reflects the **HVDC** operational capacity information provided to the market via the system known, in the **code**, as WITS; and
- 27.1.5 for performance measure CS1, which measures customers' satisfaction with **Transpower's** engagement and consultation. CS1 quantifies, as a percentage, the number of customers who report they are satisfied and the number of customers who report they are dissatisfied with the way **Transpower** engages and consults with customers, and meets their expectations, as indicated in the annual survey of **Transpower’s** customers; and

27.1.6 for performance measure CS2, which measures **Transpower's** responsiveness in relation to new and enhanced grid connections. The information to be disclosed for CS2 is:

- (a) the following information relating to enquiries received for new and enhanced grid connections in the **disclosure year**:
 - (i) number of connection enquiries; and
 - (ii) average time, minimum time, and maximum time in days taken to start investigation of connections or to formally decline to investigate;
- (b) the following information relating to investigations of new and enhanced grid connections started in the **disclosure year**:
 - (i) number of investigations started;
 - (ii) average time in days to deliver concept assessment; and
 - (iii) number and percentage of investigations that were delivered within the contracted time; and
- (c) the following information relating to commissioning of new and enhanced grid connections in the **disclosure year**:
 - (i) number of connections **commissioned**;
 - (ii) total value in dollars of connections **commissioned**;
 - (iii) for all load connections, median time and mean time in days from the date of entering a Transpower Works Agreement to the date the connection is **commissioned**;
 - (iv) for all generation and storage connections, median time and mean time in days from the date of entering a Transpower Works Agreement to the date the connection is **commissioned**;
 - (v) number and percentage of connections delivered within the contracted time;
 - (vi) for all connections for which the final **commissioned** cost exceeds the contracted project cost, the number of projects, and the average percentage overrun;
 - (vii) for all connections for which the final **commissioned** cost is equal to or less than the contracted project cost, the number of projects, and the average percentage underrun.

- 27.2 To the extent that **Transpower** considers on reasonable grounds that any information required under clause 27.1.6(a) to (c) is commercially sensitive information of a customer, **Transpower** may anonymise, aggregate, or (as a last resort) omit the customer's information in the information **publicly disclosed** under clause 27.1 to the extent necessary to maintain the confidentiality of the customer's information.
- 27.3 If **Transpower** anonymises, aggregates, or omits any commercially sensitive information under clause 27.2, it must provide the information directly to the **Commission**.

28. Periodic reporting for performance events

- 28.1 For each **unplanned interruption** during a **disclosure year** which lasts 12 hours or more, **Transpower** must **publicly disclose** within 42 **working days** of the **unplanned interruption**:
- 28.1.1 the cause of the **unplanned interruption**;
 - 28.1.2 the start date and time of the **unplanned interruption**;
 - 28.1.3 the end date and time of the **unplanned interruption**;
 - 28.1.4 the megawatts affected by the **unplanned interruption**;
 - 28.1.5 the **grid** exit point(s) and **grid** injection point(s) affected by the **unplanned interruption**;
 - 28.1.6 actions **Transpower** took to minimise the effect of the **unplanned interruption**; and
 - 28.1.7 a description of steps that **Transpower** proposes to take to mitigate the risk of future **unplanned interruptions** of this type.
- 28.2 For each **unplanned interruption** during a **disclosure year** over one system minute, **Transpower** must **publicly disclose** within 42 **working days** of the **unplanned interruption**:
- 28.2.1 the cause of the **unplanned interruption**;
 - 28.2.2 the start date and time of the **unplanned interruption**;
 - 28.2.3 the end date and time of the **unplanned interruption**;
 - 28.2.4 the megawatts affected by the **unplanned interruption**;
 - 28.2.5 the **grid** exit point(s) and **grid** injection point(s) affected by the **unplanned interruption**;
 - 28.2.6 actions **Transpower** took to minimise the effect of the **unplanned interruption**; and

28.2.7 a description of steps that **Transpower** proposes to take to mitigate the risk of future **unplanned interruptions** of this type.

29. Extension of time limits

29.1 For the purposes of clauses 21.3, 25.1, and 28, the **Commission**, on application from **Transpower**, may grant an extension to the time limits set out in those clauses if –

29.1.1 the **Commission** concludes that an extension is reasonably justified having regard to the circumstances; and

29.1.2 the application for extension is made to the **Commission** no later than 15 **working days** before the time limit set out in those clauses is due to expire.

29.2 For the purposes of clause 29.1:

29.2.1 any extension given by the **Commission** must be effected by giving or posting notice of the extension to **Transpower**;

29.2.2 the notice must specify the period of the extension and the reasons for the extension; and

29.2.3 the notice will be published by the **Commission**.

30. Annual reporting for performance events

30.1 **Transpower** must **publicly disclose** at the same time as its **annual compliance statement**:

30.1.1 a summary of all reports **publicly disclosed** under clause 28.1 for the **disclosure year**; and

30.1.2 a summary of all reports **publicly disclosed** under clause 28.2 for the **disclosure year**.

30.2 Where **asset performance measure** AP1, as calculated in accordance with clause 18.2, is outside of the **collar** value specified in Table 4.3, **Transpower** must **publicly disclose** at the same time as its **annual compliance statement**:

30.2.1 reasons, including whether the reasons are unknown, for **asset performance measure** AP1 going outside of the **collar**, and including any significant impact on the market (for example, the effect on market price or grid congestion);

30.2.2 actions **Transpower** has taken to minimise the effect of the events described in clause 30.2.1; and

30.2.3 a description of steps that **Transpower** proposes to take to mitigate the risk of going outside of the **collar** in the future.

- 30.3 Where **asset performance measure** AP2, as calculated in accordance with clause 19.2, is outside of the **collar** value specified in Table 4.3, **Transpower** must **publicly disclose** at the same time as its **annual compliance statement**:
- 30.3.1 the events that caused **asset performance measure** AP2 to go below the **collar**;
 - 30.3.2 reasons, including whether the reasons are unknown, for **asset performance measure** AP2 going below the **collar**;
 - 30.3.3 actions **Transpower** has taken to minimise the effect of the events described in clause 30.3.1; and
 - 30.3.4 a description of steps that **Transpower** proposes to take to mitigate the risk of going below the **collar** in the future.
- 30.4 Where **Transpower** has not complied with the **asset health measure** AH quality standard for an **asset health measure asset class**, as specified in clause 22, it must **publicly disclose** at the same time as its **annual compliance statement**:
- 30.4.1 reasons for not meeting the quality standard, and supporting evidence for those reasons; and
 - 30.4.2 steps that have been put in place by **Transpower** to prevent future non-compliance with the quality standard.
31. Annual delivery report
- 31.1 No later than 105 working days after the end of each **disclosure year**, **Transpower** must publicly disclose the following information for the **disclosure year** for each asset class specified in clause 31.3:
- 31.1.1 the actual number and the forecast number of assets that have undergone **asset replacement**;
 - 31.1.2 the actual sum and the forecast sum of expenditure on **asset replacement**;
 - 31.1.3 the actual number and the forecast number of assets that have undergone **asset refurbishment**;
 - 31.1.4 the actual sum and the forecast sum of expenditure on **asset refurbishment**; and
 - 31.1.5 for each variance between the actual and forecast numbers or between the actual and forecast sums referred to in clause 31.1.1 to 31.1.4:
 - (a) the size of the variance (in asset numbers or in dollars, as applicable); and
 - (b) an explanation, with supporting analysis, for the variance.

31.2 In clause 31.1, 'forecast', in relation to a number or sum, means the number or sum that **Transpower** has, before the start of **RCP4**, forecast for the **disclosure year** in question.

31.3 The asset classes are:

31.3.1 outdoor to indoor switchyard conversion (ODID);

31.3.2 power transformers;

31.3.3 circuit breakers;

31.3.4 instrument transformers;

31.3.5 indoor switch gear;

31.3.6 low voltage alternating current (LVAC) switchboard replacements;

31.3.7 tower painting;

31.3.8 grillage - concrete over ground;

31.3.9 grillage - cathodic protection;

31.3.10 insulators;

31.3.11 towers;

31.3.12 poles;

31.3.13 line protection;

31.3.14 transformer protection;

31.3.15 bus zone protection;

31.3.16 batteries and direct current (DC);

31.3.17 substation management systems;

31.3.18 feeder protection; and

31.3.19 reactive protection.

32. Wash-up building blocks calculation

32.1 For the purposes of annually calculating the **ex-post economic gain or loss**, **Transpower** must use:

32.1.1 the approach and formulae specified in Schedule E;

32.1.2 the **opening RAB value**;

- 32.1.3 the actual amounts by month of **commissioning** in the **disclosure year** for **value of commissioned asset** of approved **base capex** and **major capex**;
- 32.1.4 the **WACC**;
- 32.1.5 **depreciation**, including any capitalised interest adjustments required to align **Transpower's** borrowing costs capitalised on its **works under construction** with the requirements of clause 2.2.10(3)(c) of the **Transpower IM**;
- 32.1.6 actual **revaluation**, treated as income in accordance with clause 2.2.9 of the **Transpower IM**;
- 32.1.7 the **opex allowance**, excluding operating lease payments capitalised in accordance with the **Transpower IM**, specified in Schedule C5;
- 32.1.8 the **corporate tax rate**;
- 32.1.9 the **regulatory tax allowance** calculated:
- (a) by applying the **tax rules** and **corporate tax rate** to the regulatory profit/(loss) before tax in accordance with Part 2, Subpart 3 of the **Transpower IM**;
 - (b) using the **term credit spread differential allowance** calculated in accordance with Part 2, Subpart 4 of the **Transpower IM**; and
 - (c) using as the amount of regulatory profit/(loss) before tax for the purpose of this calculation, the sum of:
 - (i) the regulatory profit/(loss) before tax disclosed by **Transpower** for the **disclosure year** in accordance with the **ID determination**; and
 - (ii) the **term credit spread differential allowance** calculated in subclause (b);
- 32.1.10 the **term credit spread differential allowance**;
- 32.1.11 for actual revenues received by **Transpower**:
- (a) the **actual transmission revenue** received in the **pricing year**, as converted to a **disclosure year** value in accordance with clause 9.2; and
 - (b) the sum of **other regulated income** received in the **disclosure year**;
- 32.1.12 the amount of the **forecast EV adjustment** included in the **forecast MAR**;
- 32.1.13 the actual **pass-through costs** and **recoverable costs** calculated in accordance with Schedule H; and

32.1.14 any voluntary reduction in **actual transmission revenue** made by **Transpower** for the **pricing year**.

32.2 For the purposes of any disparity adjustments for calculating the **ex-post economic gain or loss** in clause 32.1, and for any disparity adjustments for calculating the **opex incentive amount** in clause 36.2, the **forecast CPI** that applied when the **opex allowance** and **forecast opex** were determined, as specified in Schedule C8.

32.3 For the purposes of **CPI** disparity adjustment on the capital charge in clause 32.1, calculate the **WACC** updated for actual **CPI** in Schedule E by applying the formula:

$$\left(\frac{(1 + \mathbf{WACC}) \times (1 + \mathit{actual\ CPI}) - 1}{(1 + \mathit{forecast\ CPI})} \right)$$

where:

'*actual CPI*' means the actual **CPI** for the **disclosure year**; and

'*forecast CPI*' means the **forecast CPI** specified for the **disclosure year** in clause 32.2.

33. Transpower to propose update of forecast SMAR

33.1 **Transpower** must provide the following information when proposing an update of a **forecast MAR** and **forecast SMAR** for the purposes of clause 8.4 and 8.5:

33.1.1 an update of a **forecast MAR** and **forecast SMAR** for each remaining complete **pricing year** in **RCP4**, calculated in a manner consistent with the approach for calculating the **forecast SMAR** for the full period of **RCP4**, including, where applicable, to take account of the incremental revenue effect of:

- (a) forecast **major capex** approved by the **Commission** in the most recently completed **disclosure year**;
- (b) **base capex** approved by the **Commission** in the most recently completed **disclosure year** relating to one or more of the **listed projects** in Schedule I; and
- (c) an updated **forecast EV adjustment** calculated for the **forecast MAR** in accordance with clause 35;

33.1.2 a description and explanation of any voluntary revenue reductions that **Transpower** seeks to apply when setting charges under the **TPM** for any future **pricing year**;

33.1.3 where applicable, a proposed updated summary of the **forecast MAR** and the **forecast SMAR** as set out in Schedule A; and

33.1.4 a certificate accompanying the proposal in the form set out in Schedule L, signed by the chief executive officer of **Transpower**.

- 33.2 For the purposes of clause 33.1.1, the calculation of the update of a **forecast MAR** used in calculating the update of the **forecast SMAR** must, where applicable, use:
- 33.2.1 the approach and formulae specified in Schedule D;
 - 33.2.2 the forecast **opening RAB value**;
 - 33.2.3 the forecast amounts by month of **commissioning** in the **disclosure year** for **value of commissioned asset** of approved **base capex** and **major capex**;
 - 33.2.4 the **low incentive rate base capex allowance** in accordance with Schedule C1, Column 7;
 - 33.2.5 the **standard incentive rate base capex allowance** in accordance with Schedule C2, Column 7;
 - 33.2.6 the **WACC**;
 - 33.2.7 forecast **depreciation**;
 - 33.2.8 forecast **revaluation** for the **disclosure year**, treated as income in accordance with clause 2.2.9 of the **Transpower IM**;
 - 33.2.9 the forecast **regulatory tax allowance** calculated:
 - (a) by applying the **tax rules** and **corporate tax rate** to the forecast regulatory profit/(loss) before tax in accordance with Part 2, Subpart 3 of the **Transpower IM**;
 - (b) using the **term credit spread differential allowance** calculated in accordance with Part 3, Subpart 5 of the **Transpower IM**; and
 - (c) using as the amount of forecast regulatory profit/(loss) before tax for the purpose of this calculation, the sum of:
 - (A) the forecast of the regulatory profit/(loss) before tax calculated using the calculation basis required for disclosure under the **ID determination**; and
 - (B) the forecast of the **term credit spread differential allowance** calculated in accordance with Part 3, Subpart 5 of the **Transpower IM**;
 - 33.2.10 the **forecast EV adjustment** amounts specified in clause 35.1.1 to 35.1.5, adjusted, where applicable, in accordance with clause 35.2 and 35.3;
 - 33.2.11 the forecast **pass-through costs** specified in Schedule C7;
 - 33.2.12 the forecast **recoverable costs** specified in Schedule C7; and
 - 33.2.13 the **opex allowance** specified in Schedule C5.

- 33.3 The calculation of an update of the **forecast SMAR**, must, where applicable, use:
- 33.3.1 the update of the **forecast MAR** calculated in accordance with clauses 33.1 and 33.2;
 - 33.3.2 the conversion of the updated **forecast MAR** for each remaining complete **pricing year** in **RCP4** to **forecast SMAR** calculated by–
 - (a) inputting building block values for each **disclosure year** of the **regulatory period** into Schedule D;
 - (b) converting the **forecast MAR** building blocks to **pricing year** values by applying the cash flow timing factors in ‘Column 4’ of Schedule D; and
 - (c) converting the **forecast MAR** to the **forecast SMAR** for each **pricing year** using the methodology set out in clause 3.1.1(3)(b)-(d) of the **Transpower IM**;
 - 33.3.3 for the purposes of clause 33.3.2, the updated present value of the incremental **forecast SMAR** for the remaining complete **pricing years** in **RCP4** must equal the present value of the updated incremental **forecast MAR** for the remaining complete **pricing years** in **RCP4**; and
 - 33.3.4 the **IPP revenue growth rate** for each **pricing year** of **RCP4** as specified in clause 8.3.
- 33.4 For the purposes of determining the revenue impact of **major capex** approved by the **Commission** or of **base capex** approved by the **Commission** relating to **listed projects**, **Transpower** must:
- 33.4.1 identify each **major capex project** approved by the **Commission** in the **disclosure year** if **project** assets are forecast to be **commissioned** during the period from 1 July 2025 to 30 June 2030;
 - 33.4.2 identify each **listed project** for which **base capex** is approved by the **Commission** in the **disclosure year** if **project** assets are forecast to be **commissioned** during the period from 1 July 2025 to 30 June 2030; and
 - 33.4.3 for each **project** identified in accordance with clauses 33.4.1 and 33.4.2, separately detail:
 - (a) the forecast date, or dates, that **project** assets are forecast to be **commissioned**; and
 - (b) the incremental revenue impact of the forecast **commissioning** of **project** assets on each applicable future **forecast SMAR** and **forecast MAR**.

34. EV account summary

- 34.1 For the purposes of providing the information specified in clause 26.1.5 for the **disclosure year**, the updated summary of the **EV account** must show:
- 34.1.1 a reconciliation of the opening and closing balances of the **EV account** that takes into account:
- (a) the opening balance of the **EV account**;
 - (b) the calculation of interest at the post-tax estimate corresponding to **WACC** on the opening balance of the **EV account**;
 - (c) **EV account entries**; and
 - (d) post-tax amounts included in calculating the **forecast EV adjustments** in respect of the closing **EV account** balance for the final **disclosure year** of **RCP3**;
- 34.1.2 the forecast **EV account** balance at the end of **RCP4**, taking into account **forecast EV adjustments** and interest at the post-tax estimate corresponding to **WACC** on the forecast opening **EV account** balance for each **disclosure year**;
- 34.1.3 the source of calculation of the **EV account entries** referred to in clause 34.1.1(c) for:
- (a) the **ex-post economic gain or loss** calculated for the final **disclosure year** of **RCP3**;
 - (b) the after-tax gain or loss in respect of an **instrument that ceases to be an effective hedge** for the final **disclosure year** of **RCP3**;
 - (c) the after-tax gain or loss in respect of a **commodity instrument that is not an effective hedge** for the final **disclosure year** of **RCP3**;
 - (d) the **ex-post economic gain or loss** for the **disclosure year**;
 - (e) the after-tax **gain or loss on capital expenditure commitments**;
 - (f) the after-tax economic gain or loss of a **grid output adjustment**, calculated in accordance with Schedule B, clause B2(1) of the **Capex IM**;
 - (g) the after-tax economic gain or loss of a **base capex expenditure adjustment**, calculated in accordance with Schedule B, clause B1(1) of the **Capex IM**;
 - (h) the after-tax economic gain or loss of a **major capex expenditure and output adjustment**, calculated in accordance with Schedule B, clause B3(1) of the **Capex IM**;

- (i) the after-tax amount of a **major capex sunk costs adjustment**, calculated in accordance with clause 3.3.7 of the **Capex IM**;
- (j) any **RCP4 HVDC transitional adjustment**; and
- (k) any adjustment offsetting a **RCP4 HVDC transitional adjustment** under clause 11.3.

34.2 For the purposes of calculating **EV account entries**, **Transpower** must use:

34.2.1 the **major capex incentive rate**;

34.2.2 the **base capex standard incentive rate**;

34.2.3 the **base capex low incentive rate**;

34.2.4 the **low incentive rate base capex allowance** in accordance with Schedule C3, Column 7;

34.2.5 the **standard incentive rate base capex allowance** in accordance with Schedule C4, Column 7;

34.2.6 the **forecast CPI** used to determine the **low incentive rate base capex allowance** and the **standard incentive rate base capex allowance** in Schedule C3, Column 7 and Schedule C4, Column 7, as specified in Schedule C8;

34.2.7 the **forecast FX rate** used to determine the **low incentive rate base capex allowance** and the **standard incentive rate base capex allowance** in Schedule C3, Column 7 and Schedule C4, Column 7, for the conversion of US dollars to NZ dollars, being:

- (a) for the **disclosure year** from 1 July 2025 to 30 June 2026, 0.61;
- (b) for the **disclosure year** from 1 July 2026 to 30 June 2027, 0.61;
- (c) for the **disclosure year** from 1 July 2027 to 30 June 2028, 0.61;
- (d) for the **disclosure year** from 1 July 2028 to 30 June 2029, 0.61; and
- (e) for the **disclosure year** from 1 July 2029 to 30 June 2030, 0.61;

34.2.8 the **forecast FX rate** used to determine the **low incentive rate base capex allowance** and the **standard incentive rate base capex allowance** in Schedule C3, Column 7 and Schedule C4, Column 7 for the conversion of the following currencies to NZ dollars:

- (a) Euro: for each **disclosure year** in **RCP4**, 0.54;
- (b) British pound: for each **disclosure year** in **RCP4**, 0.49;
- (c) Australian dollar: for each **disclosure year** in **RCP4**, 0.90;

- (d) Japanese yen: for each **disclosure year** in **RCP4**, 87.85;
- (e) Swedish kronor: for each **disclosure year** in **RCP4**, 6.37; and
- (f) Canadian dollar: for each **disclosure year** in **RCP4**, 0.80; and

34.2.9 the amount of the **standard incentive rate base capex allowance** in Schedule C4, Column 7 to which the **forecast FX rate** applies, which is set out in Table 5.1:

Table 5.1: Amount of the standard incentive rate base capex allowance (NZD million) to which the forecast FX rate applies

Currency	2025/26	2026/27	2027/28	2028/29	2029/30
USD/NZD	8.6	10.6	6.8	16.3	24.0
EUR/NZD	3.7	5.8	3.8	2.4	3.2
GBP/NZD	0.0	0.0	0.0	0.0	0.0
AUD/NZD	4.7	2.2	1.7	1.0	1.9
JPY/NZD	0.0	0.1	0.0	0.1	0.0
SEK/NZD	1.7	1.5	1.3	2.1	1.9
CAD/NZD	0.0	0.0	0.0	0.0	0.0

35. Forecast EV adjustment

35.1 For the purposes of calculating an update of the **forecast MAR** for a **pricing year**, and subject to clause 35.2, the **forecast EV adjustment** amounts applied in calculating the initial **forecast MAR**, in respect of the closing **EV account** balance for the final **disclosure year** of **RCP3**, are:

- 35.1.1 for the **disclosure year** from 1 July 2025 to 30 June 2026, after-tax \$35.5 million;
- 35.1.2 for the **disclosure year** from 1 July 2026 to 30 June 2027, after-tax \$35.5 million;
- 35.1.3 for the **disclosure year** from 1 July 2027 to 30 June 2028, after-tax \$35.5 million;
- 35.1.4 for the **disclosure year** from 1 July 2028 to 30 June 2029, after-tax \$35.5 million;
- 35.1.5 for the **disclosure year** from 1 July 2029 to 30 June 2030, after tax \$35.5 million; and

- 35.1.6 a tax gross-up amount calculated at the **corporate tax rate**, and applying the **tax rules** where applicable, in respect of all after-tax amounts calculated in clauses 35.1.1 to 35.1.5 in order to express the **forecast EV adjustment** amounts on a pre-tax basis in the **forecast MAR** building block inputs.
- 35.2 For the purpose of calculating an update of the **forecast MAR** after a reconsideration of the price path under clause 3.7.10 of the **Transpower IM** to account for a **large buildup in EV account balance**, the **forecast EV adjustment** amounts in clause 35.1 are to be adjusted for each remaining complete **pricing year** of **RCP4** so that, taking into account interest, if interest was accrued at the **RCP4 WACC** rate:
- 35.2.1 if there is more than 1 remaining complete **pricing year** of **RCP4**, the amounts of each **forecast EV adjustment** for those **pricing years** are equal; and
- 35.2.2 where the same annual **forecast EV adjustment** as in clause 35.2.1 was applied for each of the five **pricing years** following the end of **RCP4**, the forecast balance of the **EV account** would be zero at the end of that period.
- 35.3 For the purposes of clause 35.2, where **forecast EV adjustments** are updated, a tax gross-up amount is calculated, consistent with clause 35.1.6.
36. Forecast opex for the incremental rolling incentive scheme (IRIS)
- 36.1 For the calculation of the **opex incentive amount**, the amount of **forecast opex**, including operating lease payments otherwise capitalised in accordance with the **Transpower IM**, specified by the **Commission** for **IRIS** calculations is specified in Schedule C6, as adjusted for any disparity between the **forecast CPI** that applied when the **forecast opex** was initially determined and the **CPI**.
- 36.2 For the purposes of clause 36.1 and any disparity adjustments in calculating the **opex incentive amount**, the **forecast CPI** that applied when the **forecast opex** was determined is the same as that set out in Schedule C8.
- 36.3 For the purposes of clause 3.6.3(5) of the **Transpower IM**, the **non-recurrent amount** used to account for one-off factors in **actual opex** for the third **disclosure year** of **RCP3**, for the purposes of calculating the **forecast opex** for **RCP4**, is \$-14.7 million.
37. Independent assurance report
- 37.1 **Transpower** must procure an **independent assurance report** by an **assurance auditor** in respect of the **annual compliance statement** that:
- 37.1.1 is prepared in accordance with Standard on Assurance Engagements 3100 – Compliance Engagements (SAE3100 (Revised)) and International Standard on Assurance Engagements 3000 (ISAE(NZ)3000 (Revised)) or their successor standards, signed by the **assurance auditor**, either in his or her own name or that of his or her firm; and

37.1.2 is addressed to the **directors** of **Transpower** as the intended user of the assurance report.

37.2 The **independent assurance report** must state:

37.2.1 that it has been prepared in accordance with Standard on Assurance Engagements 3100 – Assurance Engagements on Compliance (SAE 3100 (Revised)) and International Standard on Assurance Engagements (New Zealand) 3000 (ISAE (NZ) 3000 (Revised)) or their successor standards;

37.2.2 the work done by the **assurance auditor**;

37.2.3 the scope and limitations of the assurance engagement;

37.2.4 the existence of any relationship (other than that of auditor) which the **assurance auditor** has with, or any interests which the **assurance auditor** has in, **Transpower** or any of its subsidiaries;

37.2.5 whether the **assurance auditor** has obtained sufficient recorded information and explanations that it required and, if not, the information and explanations not obtained;

37.2.6 whether, in the **assurance auditor's** opinion, as far as appears from an examination of them, proper records to enable the complete and accurate compilation of the **annual compliance statement** or the proposal to update a **forecast MAR** and **forecast SMAR** have been kept by **Transpower** and, if not, the records not so kept;

37.2.7 whether in the **assurance auditor's** opinion, as far as appears from the examination, the information used in the preparation of the **annual compliance statement** or the proposal to update a **forecast MAR** and **forecast SMAR** has, where applicable, been properly extracted from **Transpower's** accounting and other records, sourced from its financial and non-financial systems; and

37.2.8 whether in the **assurance auditor's** opinion, **Transpower** has complied, in all material respects, with this determination in preparing the **annual compliance statement** or the proposal to update a **forecast MAR** and **forecast SMAR** and, if not, the respects in which it has not done so.

38. Exemptions

38.1 The **Commission** may at any time, by way of written notice to **Transpower**:

38.1.1 exempt **Transpower** from any of the requirements contained in clauses 25.2.1(b)-(d), 26, 27, 28, and 30.1 of this determination, for a period and on such terms and conditions as the **Commission** specifies in the notice; and

38.1.2 amend or revoke any such exemption.

Schedule A: Summary of forecast MAR and forecast SMAR

Forecast MAR applied to pricing years in RCP4 ending	Forecast MAR is calculated based on building block values for the disclosure year ending	Initial determined value of forecast MAR for pricing year	Incremental update to forecast MAR determined in 2025	Incremental update to forecast MAR determined in 2026	Incremental update to forecast MAR determined in 2027	Incremental update to forecast MAR determined in 2028	Total forecast MAR applicable to the pricing year (sum of amounts in columns 3 to 7)	Forecast SMAR applicable to the pricing years in RCP4
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]	[Column 6]	[Column 7]	[Column 8]	[Column 9]
31 March 2026 (Year 1)	30 June 2026	\$1,058.3 million	N/A	N/A	N/A	N/A	\$1,058.3 million	\$967.2 million
31 March 2027 (Year 2)	30 June 2027	\$1,087.9 million	\$X.X million	N/A	N/A	N/A	\$1,087.9 million	\$1,113.3 million
31 March 2028 (Year 3)	30 June 2028	\$1,137.6 million	\$X.X million	\$X.X million	N/A	N/A	\$1,137.6 million	\$1,169.0 million
31 March 2029 (Year 4)	30 June 2029	\$1,207.8 million	\$X.X million	\$X.X million	\$X.X million	N/A	\$1,207.8 million	\$1,227.4 million
31 March 2030 (Year 5)	30 June 2030	\$1,258.4 million	\$X.X million	\$X.X million	\$X.X million	\$X.X million	\$1,258.4 million	\$1,288.8 million

Schedule B: EV account summary

Item	Formula	Description
[Column 1]	[Column 2]	[Column 3]
Opening EV account balance	A	Closing balance in the EV account for the previous disclosure year
Post-tax WACC	B	The post-tax estimate corresponding to WACC
Interest on opening EV account balance	C = A x B	Opening EV account balance multiplied by the post-tax estimate corresponding to WACC
EV account entries	D	The EV account entries calculated in accordance with clause 34.2
Post-tax amount included in calculating the forecast EV adjustment for the disclosure year in respect of the closing EV account balance for the final disclosure year of RCP3	E	Amount for the disclosure year in RCP4 in respect of the forecast closing post-tax EV account balance for the final disclosure year of RCP3 , as set out in clause 35.1
Closing EV account balance	F = A + C + D - E	Opening EV account balance plus interest on opening EV account balance, plus EV account entries , minus forecast EV adjustment

**Schedule C1: Low incentive rate base capex summary – commissioned basis
(including capitalised operating leases)**

Disclosure year ending	Low incentive rate base capex allowance as determined 29 August 2024	Incremental low incentive rate base capex allowance determined in 2025	Incremental low incentive rate base capex allowance determined in 2026	Incremental low incentive rate base capex allowance determined in 2027	Incremental low incentive rate base capex allowance determined in 2028	Low incentive rate base capex allowance for purposes of forecast MAR in the disclosure year (sum of columns 2 to 6)
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]	[Column 6]	[Column 7]
30 June 2026	\$0 million	N/A	N/A	N/A	N/A	\$0 million
30 June 2027	\$0 million	\$XX.X million	N/A	N/A	N/A	\$0 million
30 June 2028	\$0 million	\$XX.X million	\$XX.X million	N/A	N/A	\$0 million
30 June 2029	\$0 million	\$XX.X million	\$XX.X million	\$XX.X million	N/A	\$0 million
30 June 2030	\$0 million	\$XX.X million	\$XX.X million	\$XX.X million	\$XX.X million	\$0 million

**Schedule C2: Standard incentive rate base capex summary – commissioned basis
(including capitalised operating leases)**

Disclosure year ending	Standard incentive rate base capex allowance as determined 29 August 2024	Incremental standard incentive rate base capex allowance determined in 2025	Incremental standard incentive rate base capex allowance determined in 2026	Incremental standard incentive rate base capex allowance determined in 2027	Incremental standard incentive rate base capex allowance determined in 2028	Standard incentive rate base capex allowance for purposes of forecast MAR in the disclosure year (sum of columns 2 to 6)
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]	[Column 6]	[Column 7]
30 June 2026	\$484.2 million	N/A	N/A	N/A	N/A	\$484.2 million
30 June 2027	\$502.6 million	\$XX.X million	N/A	N/A	N/A	\$502.6 million
30 June 2028	\$444.0 million	\$XX.X million	\$XX.X million	N/A	N/A	\$444.0 million
30 June 2029	\$445.6 million	\$XX.X million	\$XX.X million	\$XX.X million	N/A	\$445.6 million
30 June 2030	\$460.9 million	\$XX.X million	\$XX.X million	\$XX.X million	\$XX.X million	\$460.9 million

**Schedule C3: Low incentive rate base capex summary – expenditure basis
(excluding capitalised operating leases)**

Disclosure year ending	Low incentive rate base capex allowance as determined 29 August 2024	Incremental low incentive rate base capex allowance determined in 2025	Incremental low incentive rate base capex allowance determined in 2026	Incremental low incentive rate base capex allowance determined in 2027	Incremental low incentive rate base capex allowance determined in 2028	Low incentive rate base capex allowance for purposes of base capex expenditure adjustments in the disclosure year (sum of columns 2 to 6)
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]	[Column 6]	[Column 7]
30 June 2026	\$0 million	N/A	N/A	N/A	N/A	\$0 million
30 June 2027	\$0 million	\$XX.X million	N/A	N/A	N/A	\$0 million
30 June 2028	\$0 million	\$XX.X million	\$XX.X million	N/A	N/A	\$0 million
30 June 2029	\$0 million	\$XX.X million	\$XX.X million	\$XX.X million	N/A	\$0 million
30 June 2030	\$0 million	\$XX.X million	\$XX.X million	\$XX.X million	\$XX.X million	\$0 million

**Schedule C4: Standard incentive rate base capex summary - expenditure basis
(excluding capitalised operating leases)**

Disclosure year ending	Standard incentive rate base capex allowance as determined 29 August 2024	Incremental standard incentive rate base capex allowance determined in 2025	Incremental standard incentive rate base capex allowance determined in 2026	Incremental standard incentive rate base capex allowance determined in 2027	Incremental standard incentive rate base capex allowance determined in 2028	Standard incentive rate base capex allowance for purposes of base capex expenditure adjustments in the disclosure year (sum of columns 2 to 6)
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]	[Column 6]	[Column 7]
30 June 2026	\$483.9 million	N/A	N/A	N/A	N/A	\$483.9 million
30 June 2027	\$501.4 million	\$XX.X million	N/A	N/A	N/A	\$501.4 million
30 June 2028	\$438.1 million	\$XX.X million	\$XX.X million	N/A	N/A	\$438.1 million
30 June 2029	\$434.0 million	\$XX.X million	\$XX.X million	\$XX.X million	N/A	\$434.0 million
30 June 2030	\$451.0 million	\$XX.X million	\$XX.X million	\$XX.X million	\$XX.X million	\$451.0 million

Schedule C5: Summary of opex allowances (excluding capitalised operating leases)

Disclosure year ending	Opex allowance as determined 29 August 2024	Incremental opex allowance determined in 2025	Incremental opex allowance determined in 2026	Incremental opex allowance determined in 2027	Incremental opex allowance determined in 2028	Opex allowance for purposes of forecast MAR in the disclosure year (sum of columns 2 to 6)
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]	[Column 6]	[Column 7]
30 June 2026	\$416.0 million	N/A	N/A	N/A	N/A	\$416.0 million
30 June 2027	\$414.2 million	\$XX.X million	N/A	N/A	N/A	\$414.2 million
30 June 2028	\$435.4 million	\$XX.X million	\$XX.X million	N/A	N/A	\$435.4 million
30 June 2029	\$439.6 million	\$XX.X million	\$XX.X million	\$XX.X million	N/A	\$439.6 million
30 June 2030	\$432.3 million	\$XX.X million	\$XX.X million	\$XX.X million	\$XX.X million	\$432.3 million

Schedule C6: Summary of forecast opex for IRIS (including capitalised operating leases)

Disclosure year ending	Forecast opex for IRIS as determined 29 August 2024	Incremental forecast opex for IRIS determined in 2025	Incremental forecast opex for IRIS determined in 2026	Incremental forecast opex for IRIS determined in 2027	Incremental forecast opex for IRIS determined in 2028	Forecast opex for IRIS (sum of columns 2 to 6)
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]	[Column 6]	[Column 7]
30 June 2026	\$427.4 million	N/A	N/A	N/A	N/A	\$427.4 million
30 June 2027	\$427.2 million	\$XX.X million	N/A	N/A	N/A	\$427.2 million
30 June 2028	\$454.8 million	\$XX.X million	\$XX.X million	N/A	N/A	\$454.8 million
30 June 2029	\$451.6 million	\$XX.X million	\$XX.X million	\$XX.X million	N/A	\$451.6 million
30 June 2030	\$443.5 million	\$XX.X million	\$XX.X million	\$XX.X million	\$XX.X million	\$443.5 million

Schedule C7: Forecast pass-through costs and forecast recoverable costs

Disclosure year ending	Forecast pass-through costs	Forecast recoverable costs
[Column 1]	[Column 2]	[Column 3]
30 June 2026	\$21.6 million	\$-18.4 million
30 June 2027	\$22.1 million	\$-20.7 million
30 June 2028	\$22.5 million	\$-24.9 million
30 June 2029	\$23.0 million	\$-0.3 million
30 June 2030	\$23.4 million	\$11.5 million

Schedule C8: Forecast CPI

Disclosure year ending	Forecast CPI
[Column 1]	[Column 2]
30 June 2026	2.00%
30 June 2027	2.00%
30 June 2028	2.00%
30 June 2029	2.00%
30 June 2030	2.00%

Schedule D: Forecast MAR building blocks calculation

FORECAST MAR BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR FORECAST INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO FORECAST NOMINAL VALUE INPUT	FORECAST MAR BUILDING BLOCK VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
WACC	WACC	A1	WACC = A1	
Return on forecast opening RAB value	Forecast sum of opening RAB value for the disclosure year	B	$A1 / (1 + A1)^{163/365}$	$B \times A1 / (1 + A1)^{163/365}$
Return on forecast VCA _{JUL}	Forecast sum of value of commissioned asset for the month in the disclosure year	C1	$((1 + A1)^{349.5/365} - 1) / (1 + A1)^{163/365}$	$C1 \times ((1 + A1)^{349.5/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{AUG}		C2	$((1 + A1)^{318.5/365} - 1) / (1 + A1)^{163/365}$	$C2 \times ((1 + A1)^{318.5/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{SEP}		C3	$((1 + A1)^{288/365} - 1) / (1 + A1)^{163/365}$	$C3 \times ((1 + A1)^{288/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{OCT}		C4	$((1 + A1)^{257.5/365} - 1) / (1 + A1)^{163/365}$	$C4 \times ((1 + A1)^{257.5/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{NOV}		C5	$((1 + A1)^{227/365} - 1) / (1 + A1)^{163/365}$	$C5 \times ((1 + A1)^{227/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{DEC}		C6	$((1 + A1)^{196.5/365} - 1) / (1 + A1)^{163/365}$	$C6 \times ((1 + A1)^{196.5/365} - 1) / (1 + A1)^{163/365}$

FORECAST MAR BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR FORECAST INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO FORECAST NOMINAL VALUE INPUT	FORECAST MAR BUILDING BLOCK VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
Return on forecast VCA _{JAN}		C7	$((1 + A1)^{165.5/365} - 1) / (1 + A1)^{163/365}$	$C7 \times ((1 + A1)^{165.5/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{FEB}	Forecast sum of value of commissioned asset for the month in the disclosure year	C8	$((1 + A1)^{136/365} - 1) / (1 + A1)^{163/365}$	$C8 \times ((1 + A1)^{136/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{MAR}		C9	$((1 + A1)^{106.5/365} - 1) / (1 + A1)^{163/365}$	$C9 \times ((1 + A1)^{106.5/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{APR}		C10	$((1 + A1)^{76/365} - 1) / (1 + A1)^{163/365}$	$C10 \times ((1 + A1)^{76/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{MAY}		C11	$((1 + A1)^{45.5/365} - 1) / (1 + A1)^{163/365}$	$C11 \times ((1 + A1)^{45.5/365} - 1) / (1 + A1)^{163/365}$
Return on forecast VCA _{JUN}		C12	$((1 + A1)^{15/365} - 1) / (1 + A1)^{163/365}$	$C12 \times ((1 + A1)^{15/365} - 1) / (1 + A1)^{163/365}$
Total forecast capital charge		Sum of forecast MAR building block values for formulae B to C12		

FORECAST MAR BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR FORECAST INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO FORECAST NOMINAL VALUE INPUT	FORECAST MAR BUILDING BLOCK VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
Forecast revaluation	Forecast revaluation , recognised consistent with the cash flow timing of the forecast depreciation , and treated as income in accordance with clause 2.2.9 of the Transpower IM	E1	$1 / (1 + A1)^{163/365}$	$E1 / (1 + A1)^{163/365}$
Forecast depreciation	Forecast depreciation	E2	$1 / (1 + A1)^{163/365}$	$E2 / (1 + A1)^{163/365}$
Operating expenditure	Opex allowance as specified in Schedule C5	F	$(1 + A1)^{19/365}$	$F \times (1 + A1)^{19/365}$
Forecast tax	Forecast regulatory tax allowance , calculated in accordance with clause 33.2.9	G	$(1 + A1)^{19/365}$	$G \times (1 + A1)^{19/365}$
Forecast TCSD	Forecast term credit spread differential allowance , calculated in accordance with Part 3, Subpart 5 of the Transpower IM	H	$(1 + A1)^{19/365}$	$H \times (1 + A1)^{19/365}$

FORECAST MAR BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR FORECAST INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO FORECAST NOMINAL VALUE INPUT	FORECAST MAR BUILDING BLOCK VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
Forecast EV adjustment	Forecast EV adjustment , as specified in clause 35.1, including a tax gross up calculated at the corporate tax rate	I	$1 / (1 + A1)^{163/365}$	$I / (1 + A1)^{163/365}$
Forecast pass-through costs	Forecast pass-through costs in accordance with Part 3, Subpart 1 of the Transpower IM , as specified in Schedule C7	J	$(1 + A1)^{19/365}$	$J \times (1 + A1)^{19/365}$
Forecast recoverable costs	Forecast recoverable costs in accordance with Part 3, Subpart 1 of the Transpower IM , as specified in Schedule C7	K	$(1 + A1)^{19/365}$	$K \times (1 + A1)^{19/365}$

FORECAST MAR BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR FORECAST INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO FORECAST NOMINAL VALUE INPUT	FORECAST MAR BUILDING BLOCK VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
TOTAL FORECAST MAR INCLUSIVE OF FORECAST PASS-THROUGH COSTS AND FORECAST RECOVERABLE COSTS	Sum of forecast MAR building block values			Sum L = Sum D plus sum of forecast MAR building block values E2 to K, less forecast MAR building block value E1

Schedule E: Wash-up building blocks calculation

WASH-UP BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO NOMINAL VALUE INPUT	WASH-UP VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
WACC updated for actual CPI	Sum of WACC updated as specified in the formula in clause 32.3 to reflect the disparity between forecast CPI specified in Schedule C8 and actual CPI	A1		
Return on opening RAB value	Sum of opening RAB value for the disclosure year	B	A1	B x A1
Return on VCA _{JUL}	Sum of value of commissioned asset for the month in the disclosure year	C1	$(1 + A1)^{349.5/365} - 1$	$C1 \times ((1 + A1)^{349.5/365} - 1)$
Return on VCA _{AUG}		C2	$(1 + A1)^{318.5/365} - 1$	$C2 \times ((1 + A1)^{318.5/365} - 1)$
Return on VCA _{SEP}		C3	$(1 + A1)^{288/365} - 1$	$C3 \times ((1 + A1)^{288/365} - 1)$
Return on VCA _{OCT}		C4	$(1 + A1)^{257.5/365} - 1$	$C4 \times ((1 + A1)^{257.5/365} - 1)$
Return on VCA _{NOV}		C5	$(1 + A1)^{227/365} - 1$	$C5 \times ((1 + A1)^{227/365} - 1)$
Return on VCA _{DEC}		C6	$(1 + A1)^{196.5/365} - 1$	$C6 \times ((1 + A1)^{196.5/365} - 1)$
Return on VCA _{JAN}		C7	$(1 + A1)^{165.5/365} - 1$	$C7 \times ((1 + A1)^{165.5/365} - 1)$

WASH-UP BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO NOMINAL VALUE INPUT	WASH-UP VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
Return on VCA_{FEB}		C8	$(1 + A1)^{136/365} - 1$	$C8 \times ((1 + A1)^{136/365} - 1)$
Return on VCA_{MAR}	Sum of value of commissioned asset for the month in the disclosure year	C9	$(1 + A1)^{106.5/365} - 1$	$C9 \times ((1 + A1)^{106.5/365} - 1)$
Return on VCA_{APL}		C10	$(1 + A1)^{76/365} - 1$	$C10 \times ((1 + A1)^{76/365} - 1)$
Return on VCA_{MAY}		C11	$(1 + A1)^{45.5/365} - 1$	$C11 \times ((1 + A1)^{45.5/365} - 1)$
Return on VCA_{JUN}		C12	$(1 + A1)^{15/365} - 1$	$C12 \times ((1 + A1)^{15/365} - 1)$
Return on lost assets		Sum of the opening RAB value of lost assets in the disclosure year	D	$1 - (1 + A1)^{182/365}$
Return on found assets	Sum of the value of found asset of found assets in the disclosure year	E	$(1 + A1)^{182/365} - 1$	$E \times ((1 + A1)^{182/365} - 1)$
Return on disposed assets	Sum of opening RAB value of disposed assets in the disclosure year	F	$1 - (1 + A1)^{182/365}$	$F \times (1 - (1 + A1)^{182/365})$
Capital charge adjusted for CPI disparity	Sum of wash-up values for formulae B to F			Sum G1 = sum of wash-up values B to F

WASH-UP BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO NOMINAL VALUE INPUT	WASH-UP VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
Transmission revenues received	Sum of actual transmission revenue converted to a disclosure year value in accordance with clause 32.1.11(a)	H	$(1 + A1)^{163/365}$	$H \times (1 + A1)^{163/365}$
Transpower adjustment to recognise voluntarily foregone revenues	Amount of electricity transmission revenue permanently foregone by Transpower	J	$(1 + A1)^{163/365}$	$J \times (1 + A1)^{163/365}$
Other regulated income	Sum of other regulated income in accordance with clause 32.1.11(b)	K1	$(1 + A1)^{182/365}$	$K1 \times (1 + A1)^{182/365}$
Revaluation	Actual revaluation recognised consistent with the cash flow timing of depreciation , and treated as income in accordance with clause 2.2.9 of the Transpower IM	K2		K2
Gain/(loss) on disposal of assets	Sum of disposal proceeds less opening RAB value for disposed assets	L	$(1 + A1)^{182/365}$	$L \times (1 + A1)^{182/365}$
Total income	Sum of wash-up values for formulae H to L			Sum M = sum of wash-up values H, J, K1, K2, and L

WASH-UP BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO NOMINAL VALUE INPUT	WASH-UP VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
Operating expenditure	Opex allowance as specified in Schedule C5, and as adjusted for any disparity between the forecast CPI specified in Schedule C8 and actual CPI	N	$(1 + A1)^{182/365}$	$N \times (1 + A1)^{182/365}$
Depreciation	Actual depreciation (excluding depreciation on disposed assets)	O		O
TCSD	The term credit spread differential allowance , calculated in accordance with Part 3, Subpart 5 of the Transpower IM	P	$(1 + A1)^{182/365}$	$P \times (1 + A1)^{182/365}$
Pass-through costs and recoverable costs	Actual pass-through costs and recoverable costs as set out in Schedule H, Formulae F and M.	Q	$(1 + A1)^{182/365}$	$Q \times (1 + A1)^{182/365}$
Net operating profit/(loss) before tax	Sum of wash-up values for Sum M and formulae N to P			Sum R = Sum M, less wash-up values N to Q
Tax	The regulatory tax allowance calculated in accordance with clause 33.2.9	S	$(1 + A1)^{182/365}$	$S \times (1 + A1)^{182/365}$

WASH-UP BUILDING BLOCK	DESCRIPTION OF NOMINAL VALUE INPUT TO BE APPLIED	FORMULA FOR INCOME/ EXPENDITURE/ OTHER NOMINAL VALUES	CASH FLOW TIMING FACTOR TO APPLY TO NOMINAL VALUE INPUT	WASH-UP VALUE
[Column 1]	[Column 2]	[Column 3]	[Column 4]	[Column 5]
Net operating profit/(loss) after tax	Sum of wash-up values for Sum R and formula S			Sum T = Sum R, less wash-up value S
AFTER-TAX EX-POST ECONOMIC GAIN OR LOSS	Difference between the capital charge adjusted for CPI disparity (Sum G1) and the net operating profit/(loss) after tax (Sum T)			Difference U = Sum G1 less Sum T
Forecast EV adjustment included in forecast MAR	Adjustment to recognise the forecast EV adjustment for the disclosure year , before tax gross up, as applied in setting the forecast MAR for the relevant pricing year	V		V
EV ACCOUNT ENTRY	This is the ex-post economic gain or loss adjusted for the forecast EV adjustment applied in setting the forecast MAR for the relevant pricing year , and is an EV account entry			Difference W = Difference U plus value V

Schedule EA: Delivery risk adjustment

Pricing year ending:	31 March 2026	31 March 2027	31 March 2028	31 March 2029	31 March 2030
Target FTE total	1,050	1,055	1,054	1,056	
Decision FTE total	1039	996	995	996	
Disclosure year ending:	30 June 2026	30 June 2027	30 June 2028	30 June 2029	30 June 2030
Base capex per FTE (\$)		490,955	539,838	537,302	572,428
Opex per FTE (\$)		257,790	281,985	316,049	323,869
Maximum base capex increase (\$)		29,067,769	31,815,739	32,147,196	30,406,662
Maximum opex increase (\$)		15,262,861	16,619,010	18,909,479	17,203,494

1. For the purposes of this schedule:

- a. 'base capex increase' means an increase in **base capex allowance** for a **pricing year** that is part of a **delivery risk adjustment** and calculated in accordance with this schedule;
- b. 'base capex per FTE' means an amount of **base capex** specified in the table;
- c. 'FTE update' is the number of full-time equivalent employees employed by **Transpower** as at 31 August in a **pricing year**;
- d. 'opex increase' is an increase in **opex allowance** for a **pricing year** that is part of a **delivery risk adjustment** and calculated in accordance with this schedule;
- e. 'opex per FTE' means an amount of **opex** specified in the table;
- f. 'PY_n' is a **pricing year** and, as a subscript, indicates a value specified in the table, calculated in accordance with this schedule, or (in the case of FTE update) provided by **Transpower** for that **pricing year**; and

- g. 'PY_{n-1}' is the **pricing year** before the **pricing year** in question and, as a subscript, indicates a value specified in the table, calculated in accordance with this schedule, or (in the case of an FTE update) provided by **Transpower**, for that previous **pricing year**.
2. **Transpower** is not eligible for a **delivery risk adjustment**:
- in the first **pricing year**; or
 - in respect of a **pricing year** that has commenced at the time that **Transpower** applies for the **deliverability risk adjustment**.
3. In a **pricing year** (PY_n) other than the first **pricing year**, **Transpower** is eligible for a **delivery risk adjustment**:
- based on **Transpower's** attainment of full-time equivalent employees as at 31 August in the previous **pricing year** (PY_{n-1}); and
 - as calculated in accordance with clauses 4 to 7 of this schedule.
4. If, in a **pricing year** (PY_{n-1}), the FTE update is equal to or greater than the target FTE total, then, for the following **pricing year** (PY_n) and for each remaining **pricing year** in the **RCP**:
- the **base capex** increase equals the maximum **base capex** increase specified for that **pricing year** in the table; and
 - the **opex** increase equals the maximum **opex** increase specified for that **pricing year** in the table.
5. Unless or until an FTE update is equal to or greater than the target FTE total, the **delivery risk adjustment** must be calculated under clauses 6 and 7 of this schedule.
6. In a **pricing year** (PY_n) other than the first **pricing year**:
- the **base capex** increase is calculated using the following formula:

$$\text{base capex increase}_{PY_n} = (\text{FTE update}_{PY_{n-1}} - \text{decision FTE total}_{PY_{n-1}}) \times \text{base capex per FTE}_{PY_n}$$
 - the **opex** increase is calculated using the following formula:

$$\text{opex increase}_{PY_n} = (\text{FTE update}_{PY_{n-1}} + 10 - \text{decision FTE total}_{PY_{n-1}}) \times \text{opex per FTE}_{PY_n}$$
7. The amounts calculated under clause 6 must be modified as necessary to meet the following requirements:
- the **base capex** increase in a **pricing year** must not exceed the maximum **base capex** increase specified for that **pricing year** in the table;
 - if, in a **pricing year** (PY_{n-1}), the FTE update less the decision FTE total is less than 10, the **opex** increase for the following **pricing year** (PY_n) is zero; and

- c. the **opex** increase in a **pricing year** must not exceed the maximum **opex** increase specified for that **pricing year** in the table.

Schedule H: Summary of actual pass-through costs and recoverable costs

Item	Formula	Description
[Column 1]	[Column 2]	[Column 3]
Local authority rates	A	Rates payable to a local authority on system fixed assets in accordance with clause 3.1.2(2)(a) of the Transpower IM
Commerce Act levies	B	Levies payable in accordance with clause 3.1.2(2)(b)(i) of the Transpower IM
Electricity Authority levies	C	Levies payable in accordance with clause 3.1.2(2)(b)(ii) of the Transpower IM
Utilities Disputes Limited levies	D	Levies payable in accordance with clause 3.1.2(2)(b)(iii) of the Transpower IM
Other pass-through costs levies	E	Any other levies that are pass-through costs in accordance with clause 3.1.2(1)(b) of the Transpower IM
Total pass-through costs	F = A + B+ C+D+E	Sum of pass-through costs for the disclosure year
Incremental rolling incentive scheme recoverable costs	G	Sum of recoverable costs under the incremental rolling incentive scheme in accordance with clause 3.1.3(1)(a) of the Transpower IM
Instantaneous reserves availability charge	H	Instantaneous reserves availability charges in accordance with clause 3.1.3(1)(b) of the Transpower IM
Transmission alternative operating costs	I	Transmission alternative operating costs in accordance with clause 3.1.3(1)(c) of the Transpower IM
Operating costs incurred as part of a major capex project	J	The amount of any operating costs that are recoverable costs in accordance with clause 3.1.3(1)(d) of the Transpower IM
Net additional operating costs incurred in responding to a reopener event	K	The amount of recoverable costs in accordance with clause 3.1.3(1)(e) of the Transpower IM
Any levy payable to Fire and Emergency New Zealand under the Fire and Emergency New Zealand Act 2017	L	The amount of recoverable costs in accordance with clause 3.1.3(1)(f) of the Transpower IM
Total recoverable costs	M = G + H + I + J + K + L	Sum of recoverable costs for the disclosure year
Total pass-through costs and recoverable costs	N = F + M	Sum of total pass-through costs and recoverable costs for the disclosure year

Schedule I: Listed projects

Line Name (Section)	Project Estimated Cost
	RCP4 (\$m)
Huntly–Ōtāhuhu A reconductoring	45.3
Haywards bus rationalisation	49.8
Rangipō gas insulated switchgear replacement	67.9
HVDC cables replacement	78.7
Ōtāhuhu–Whakamaru A and B reconductoring	61.7
Total estimated cost	301.62

Schedule J: Directors' certificate – pricing compliance statement

We, [insert full name of first director] and [insert full name of second director], being directors of Transpower New Zealand Limited, certify that, having made all reasonable enquiries, to the best of our knowledge and belief, the attached summary of forecast total revenues applied in the Transpower transmission pricing methodology under the Electricity Industry Participation Code for the period [insert pricing year] complies with the requirements of the Transpower Individual Price-Quality Path Determination 2025 *[except in the following respects].

*[insert description of non-compliance if applicable]

[Signatures of directors]

[Date]

*Delete if inapplicable.

Schedule K: Directors' certificate – annual compliance statement

We, [insert full name of first director] and [insert full name of second director], being directors of Transpower New Zealand Limited, certify that, having made all reasonable enquiries, to the best of our knowledge and belief, the Annual Compliance Statement (and any supporting documents) for the period [insert disclosure year] and dated [insert date] complies with the requirements of the Transpower Individual Price-Quality Path Determination 2025*[except in the following respects].

*[insert description of non-compliance if applicable]

[Signatures of directors]

[Date]

*Delete if inapplicable.

Schedule L: Chief executive officer’s certificate – proposal to update forecast MAR and forecast SMAR

I, [insert full name of chief executive officer], being the chief executive officer of Transpower New Zealand Limited, certify that, having made all reasonable enquiries, to the best of my knowledge and belief, the proposed update of the forecast MAR and the forecast SMAR for the period [insert pricing year(s)] and dated [insert date] complies with the requirements of the Transpower Individual Price-Quality Path Determination 2025*[except in the following respects].

*[insert description of non-compliance if applicable]

[Signature of chief executive officer]

[Date]

*Delete if inapplicable.

Explanatory note

The Transpower Individual Price-Quality Path Draft Determination 2025 [2024] NZCC XX (the Transpower IPP) sets an individual price-quality path for Transpower New Zealand Limited (Transpower) for the period 1 April 2025 to 31 March 2030 (referred to as 'RCP4').

The Commission has made this determination pursuant to Part 4 of the Commerce Act 1986 (the Act). It succeeds the individual price-quality path that commenced on 1 April 2020 and that expires on 31 March 2025.

The Transpower IPP sets out Transpower's price path in terms of its annual maximum allowable revenue (being the forecast smoothed maximum allowable revenue) for each pricing year in RCP4. Key input values used to calculate Transpower's annual maximum allowable revenue were determined by the Commission on [date] as required by the *Transpower Capital Expenditure Input Methodology Determination* [2012] NZCC 2.

The Transpower IPP also sets out the quality standards that Transpower must comply with for each disclosure year in RCP4. Transpower is incentivised to maintain or improve its quality of supply of electricity transmission services, as a range of quality standards are linked by formulae to Transpower's revenue.

For the purposes of monitoring compliance with Transpower's price-quality path, Transpower must provide the Commission with a pricing compliance statement for each pricing year and must provide an annual compliance statement and annual delivery report (and supporting information) following each disclosure year ending 30 June. The Transpower IPP also requires Transpower to publicly disclose those statements and other information on its website. These additional information disclosure requirements are included within the Transpower IPP (rather than the *Transpower Information Disclosure Determination 2014* [2014] NZCC 5) because they give effect to an operational feature of the price-quality path, or are linked to Transpower's development plans for RCP4, rather than being enduring disclosures.

The Commission conducted a comprehensive process of consultation before determining this Transpower IPP. The determination and a reasons paper providing detailed background to, and analysis of, this Transpower IPP can be found on our website at:

https://comcom.govt.nz/regulated-industries/electricity-lines/electricity-transmission/transpowers-price-quality-path/2025-transpower-individual-price-quality-path/_nocache

Copies of this determination are also available for inspection free of charge at the Commission (during ordinary office hours), and they are available for purchase at a reasonable price at the Commission.
