Subject: Aurora network update feedback and submission.

I have to agree our network does require urgent repair and updates due to years of neglect caused by the plundering of Auroras resources and our lines charges by Dunedin City Council.

As far as I am concerned, I believe the consumers have already paid for this work to be done, but that money has been diverted into Dunedin City Council coffers in undue dividends to benefit projects for the city that doesn't benefit the majority of Auroras customers.

Before we are asked to pay any further charges, Dunedin City Council should be required to return the misappropriated funds and a much stronger oversight of how this company is being managed needs to be put in place. Ideally the company should be removed from its malevolent shareholder.
