Subject: Feedback

My feedback for the electric charge increase is that the increase should be sent to building / house owners on a tack on to their rates, not added onto the electric bills. Lots of people in wanaka, Queenstown, and Dunedin do not own their own houses they rent houses or shops, having the bills passed on to the tenants on the electric bills is unfair as they do not get the long term benefits of the improvements. Permanent house owners will get the long term benefits therefore they should be paying not on top of the electric bills.

Regards,
