**Subject:** Electricity pricing.

As far as I as I am concerned there should be no increase in power prices as Aurora and the DCC as these two "companies", worked together and did not do the maintenance that should have been done and this was spoken about by the gentleman, Richard who later left Aurora and became a whistle blower but was proved right and no-one listened. So no increase for mismanagement. You guys cheated the Ratepayers and now expect us to pay for your miss management. A downright scam if ever there was one. This Council is just not playing ball at all. [REDACTED], Ratepayer for 56 years. I expect more than that from you as a public authority.
