**Subject:** Aurora Central Otago Plan

Hello John Crawford,

As we stated in our last email the issue for us is not whether the network needs urgent maintenance but rather where past payments went instead of into maintenance. There has been plenty of publicity stating that payments were deliberately used to help pay for the Dunedin stadium instead of the network. We have not seen a denial from the Dunedin City Council. If true then the DCC is directly responsible for the condition of the network and should pay for the maintenance required. Payments to Aurora were not used for the reason they were collected and appear to have been taken under false pretences. We were charged for for a service that was not delivered! We hope the Commission considers this.

Kind regards,

[REDACTED]
