

## How to help local businesses

- Spaces near public transport hub can be used to let local growers and small manufacturer sell their products.
- This should not take away already existed park and ride facility spaces.
- This should be like a small scale market.
- This gives incentives for public to use public transport and help local small businesses.
- If space allows there should also be other facilities such as packages pick up spots. This gives extra incentives to use public transport and reduce emission from the delivery.
