

## Appendix 1

### SCOURS LISTED IN CAVALIER APPLICATION

The Cavalier Application lists possible overseas wool scours. This is the same list that was provided in 2011.

- 1 Fine Wool Spinning Factory of Jiangsu is an apparel textile manufacturer, not a commission wool scourer;<sup>1</sup>
- 2 Hebei Diamond Cashmere Products specialise in fine and cashmere wool and scour for their own use;<sup>2</sup>
- 3 Inner Mongolia Muwang Co. Godfrey Hirst was unable to find any information other than an animal by-product company. It would not be practical to process NZ wool in Mongolia;
- 4 Reward Ningbo Wool Industry state that they process Australian wool suggesting they are fine wool processors. They are also, vertically integrated to spinning and weaving, not commission scouring;<sup>3</sup>
- 5 Zhejiang Xiniao Textiles Group are a yarn manufacturer, processing fine Australian Wool for apparel. They do not offer commission wool scouring;<sup>4</sup>
- 6 Chargeurs and Schneider are international wool traders and top makers. The process only fine wool, not coarse carpet types;<sup>5,6</sup>
- 7 JingAo Scour Company (Jiang Shu) - Godfrey Hirst could not find any information on this business;
- 8 ZhongAo Top Company are a wool top producer, not a commission scourer;<sup>7</sup> and
- 9 Tianyu Wool Industry are fine wool processors.<sup>8</sup>

## ABOUT US

Located in the Cashmere Capital city of China-Qinghe, Hebei Diamond Cashmere Products co.,Ltd have been engaging in cashmere industry for over 20 years and is one of the Chinese leading manufacture in this field. Covering 100 thousands sq.m. working area, 58 thousands sq.m. building area, with total assets 20 million RMB, the company have 800 employees and with 230 managing staffs and technicians included. Our subsidiaries: wool and cashmere scouring factory, wool and cashmere carding factory, spinning factory and knitting factory.

There are 3 sets of fine-scouring equipments and carbonized equipments in the scouring factory, 77 sets of equipments in the carding factory, the spinning factory has 4 sets of Italian woollen spinning production lines and with production ability 200 tons(14-32N) annually and has 5000 spindles of domestic equipment for semi-worsted and worsted spinning with 180 tons(14-60N) production ability annually. 500 sets of knitting machines and 110 sets of linking machine etc in the knitting factory.

With the high quality and good services, 95% of our products have been exporting abroad, we have established very good business relations with our customers from Italy, UK, Germany, USA, Japan, India, Nepal and Hong Kong etc.

Address: Rm C-1802,Wonder Mall,No.15 Yuhua West Road,Shijiazhuang, Hebei, China 冀ICP备07009404号 Tel: 0311-66600768

Reward (Ningbo) Wool Industry Co., Ltd. Was established in October 1992 by Mr. Ing Chang Qi, a renown entrepreneur. Reward Ningbo, an industry leader in the production of various wool products is known for its specialization and sophisticated technical skill in the processing of wool tops and carbonized wool. Our company has drawn international attention for its high quality standards and premium wool products.

Reward Ningbo is located in the Ningbo Economic Development zone. The site encompasses over 230,000 square meters nestled between Jiangnan Road and Beilun Port on the adjacent side. The facility is situated in a logistical location and provides ideal transportation access and communication for business operation.

To date, Reward Ningbo has invested a total of 55 million U.S dollars and can annually supply 16,800 tons of first-grade wool top and 9000 tons of carbonized wool. All raw materials are imported from Australia for refining, cleaning and processing at the Ningbo facility. Reward Ningbo uses the most advanced production technology and equipment such as: Fufeng scouring machines from Taiwan; Temafa blending-bin systems from Germany; Thibeau carding machines and NSC combing/gilling machines from France; Gualchierani packing machines from Italy and shrink-proof machines by Fleissner of Germany.

We offer a wide range of super wash wool tops of premium quality. Our wool products are consistent in wool fiber length with minimal short fibers and possess a high level of whiteness. Our wool top products allow for the manufacture of superior spinning yarn and carbonized wool products for the production of woollen cloth and velvet fabric.

Years of continual and persistent dedication to offering the best products, Reward Ningbo has positioned itself as an industry leader in the world market. The company has been #1 in sales volume domestically and a major supplier internationally. Reward Ningbo has been touted as the #1 enterprise in Zhejiang province. Since 1985, we have received frequent honors as the model enterprise in Ningbo by the provincial government and have driven economic and industry development in Ningbo, setting an example to further encourage investment in the area from other multi-national companies.

The mission of Reward Ningbo is to develop local industry and spur economic development in working to better the lives of the local community and the Chinese nation as a whole are committed to relentlessly strive for the highest quality wool products and create new opportunities that will continually benefit the community.

### Chargeurs Wool

Chargeurs Wool specializes in topmaking, which consists of creating long, fine blended-wool fibers, known as tops, that successfully meet the needs of spinning mills. It is a major world player in combed wool sales, with a powerful international network and the support of solid local industrial partners.

Following scouring which rids the wool of impurities, raw wool is carded and combed into tops : a large sliver of wool which is sold to spinners. Tops are made from blends, which ensure consistent production quality. Fibers are measured in microns which determine the final uses.

#### The year 2013

In November 2013, Chargeurs finalized an agreement whereby China's Jiangsu Longjin acquired its 25% interest in Zhangjiagang Yangtse Wool Combing Co. This reduced Chargeurs' stake in the mill to 25% and enabled Chargeurs Wool to complete its transformation into a services business, organized around a global sales network and backed by industrial assets owned in partnership.

Having sharply reduced its invested capital and fixed costs in order to focus on customer relationships and its topmaking business, Chargeurs Wool now presents a different profile. The decline in 2013 revenue reflected the sharp 20.2% negative impact of changes in the scope of consolidation due to the disposals carried out since 2012, an 11.6 % negative impact from the falloff in volumes and the 5.2 % negative effect of lower raw wool prices. On the other hand, operating profit rose during the year.

**ABOUT US**

**OUR MISSION**

"WE SELECT THE BEST ANIMAL NATURAL FIBRES DIRECTLY WHERE MOTHER NATURE PRODUCES THEM TO OFFER THEM CLEAN TO OUR CLIENTS ALL AROUND THE WORLD".

We receive very much from nature. It gives us its most precious raw materials and we transform them into wonderful products that make our life more pleasant. Hence, we have a moral commitment towards nature, almost a debt of gratitude. It is our very duty to respect it in every phase of the processing of our products.

**THE STORY**

The Schneider Group was established in Australia in the 20's on the initiative of a young wool buyer, Mister Giovanni Schneider who, together with some business colleagues, decided to start his own wool trading company. At first he acted mainly as a wool broker; subsequently, as the financial resources allowed it, as a trader with his own company.

Due to the significant changes in the wool industry after the Second World War, the consumption of greasy wool in spinning and weaving mills had fallen dramatically, replaced by an increasing demand of semi processed products. This has led to an important evolution of the activity of the Group: in addition to trade, it also started industrial production of semi-processed products. Initially, the manufacturing process was contracted-out to other firms; however, at a later date the Group needed a more direct control over quality and service therefore the in-house industrial activity began. This evolution led to the formation of S.E.F.I.T Group (Société Européenne pour le Financement d'Initiatives Textiles) and the 'G.Schneider' trademark maintained the trading activity.

**TODAY**

Today the Group operates in Italy, Argentina, China, Iran, Mongolia and Egypt with production facilities managed by a separate INDUSTRIAL DIVISION of the Group.

An international network comprising brokers, laboratories for quality tests and fully owned purchasing organisations located in Australia, New Zealand, Argentina, China, Mongolia and Iran, takes care of the TRADITIONAL COLLECTING AND SELECTION OF RAW MATERIALS in the producing countries.

The TRADING ACTIVITY uses facilities located in the main textile centres of the world.

We do not only sell our products, we also provide clients with the very best advice and technical assistance. The Group philosophy is to offer not only products but also tailor-made services and solutions to promote the use of precious natural fibres to an ever greater number of customers, so they can appreciate the combination of this values.

Great importance is also given to the work of the FINANCIAL DIVISION, which assists all the firms of the Group, by providing a wide range of services, thus allowing single companies members of the Group to focus exclusively on their core business.

The financial division is a kind of internal bank, an important advantage for the Group, putting it at the same level of most important multinational enterprises.

**OUR PHILOSOPHY: FROM NATURE TO NATURE**

Our core business, which consists in the procurement and processing of precious natural fibres, has always given us the extraordinary opportunity of being in direct contact with nature, since almost one century; this unique opportunity has developed within our Company a culture of respect for the environment which has strongly influenced our strategic choices of

#### About Us

Zhangjiagang Free Trade Zone Zhongao Wool Combing Industry Co., Ltd. is a large manufacturer which specializes in wool tops and wool grease as well as some relatives in China. We work closely with some famous raw wool corporations in Australia and New Zealand as well as the South Africa.

We would like to offer high quality wool tops to you for consideration. The quality is excellent and we can offer very competitive prices. We welcome you to inspect the grade and quality of our products. If you are interested we would like to send you a small sample for examination. The wool tops can be inspected by your choice of inspector or certifier.

You are also warmly invited to our company and factory for a business tour. A win-win cooperation is highly expected between both of us in the near future. Any response from you will be closely noted.
