

## **Commission’s explanatory note regarding Transpower and PwC feedback on EMCa report**

On 10 June 2019, Transpower provided feedback to the Commission on EMCa’s review of Transpower’s proposed Information and Communications Technology (ICT) expenditure in its RCP3 proposal (EMCa report).

To ensure that matters that are commercially sensitive to Transpower are not publicly disclosed, we provided Transpower with the opportunity to identify anything that should be redacted for confidentiality reasons.

In response to Transpower’s feedback, EMCa has redacted matters in its report that Transpower asked us to keep confidential. EMCa has also corrected errors of fact identified by Transpower, and today we have published the EMCa report.

We have also published Transpower’s interim feedback on the EMCa review, including a review of the EMCa report by PricewaterhouseCoopers which Transpower had commissioned.

In making our final decisions on the Transpower IPP for RCP3, we will take into account any clarifications or new information provided by Transpower in its interim feedback on the EMCa report, in addition to its submission on our draft decisions.
