

Aurora Energy's submission

**[Draft] Electricity Distribution Services Input  
Methodologies (Wash-up Amounts)  
Amendment Determination 2024**

1 November 2024

## Introduction

1. Aurora Energy Limited (Aurora Energy) welcomes the opportunity to submit its views on the Commerce Commission's (the Commission's) [Draft] Electricity Distribution Services Input Methodologies (Wash-up Amounts) Amendment Determination 2024.
2. No part of our submission is confidential.

## Aurora Energy supports the proposed IM amendments to the revenue wash-up mechanism

3. Aurora Energy support the Commission's proposed amendments to the revenue wash-up mechanism. In our view the proposed amendments remedy errors in the existing IMs and give effect to the original intent of the wash-up mechanism.
4. We note there are proposed amendments which are specific to Aurora Energy due to Aurora Energy's Customised Price-quality Path (CPP). We believe these specific amendments are appropriate and are consistent with the intent of the wash-up mechanism.
