Process & Issues Paper for determining TSLRIC price for Chorus UCLL

Dear Keston,

I am writing to you to support the positions of Vodafone and Telecom with respect to the proposed consultation dates set out in the process and issues paper.

CallPlus closes its office for staff from 20th December through to 13th January. Given the difficulties of the xmas period and the importance and complexity of the UCLL FPP we do not support the proposed timeline and agree with Telecom & Vodafone that a more appropriate timeframe would be to have submissions due 28th of February.

Given the importance of UCLL pricing as the underpinning price for copper services it is critical that the Commission and parties have adequate time to consider complex issues.

Regards

Graham Walmsley
