### **Feedback on Recent Customised Price-Quality Path Processes**

Thank you for giving us the opportunity to comment on recent price-quality path processes. We appreciate the Commission engaging with stakeholders to identify any improvements.

We support the case for including CBA as an evaluation tool for future applications. We also see the CPP review an opportunity to improve assessment around asset health, transparency on the long-term pricing impacts of a CPP, and there should be deliverability and accountability of CPP commitments.

We support the Electricity Retailers' Association of New Zealand submission which sets out detail around these improvements.

Yours sincerely

Rebekah McCrae  
**Regulatory Advisor**
