Invitation for cross-submissions on section 30R reviews of five regulated telecommunications services' standard terms determinations

Good afternoon

Today we have published submissions we received responding to our section 30R reviews of five regulated telecommunications services' standard terms determinations.

We received submissions from:

- Chorus; and
- Spark

We thank these parties for their submissions. The submissions are available on our website at: <https://comcom.govt.nz/regulated-industries/telecommunications/regulated-services/copper-services/section-30r-reviews-of-the-copper-standard-terms-determinations>

In our explanatory paper we did not invite cross-submissions. However, we have now decided that we would like to provide stakeholders with an opportunity to provide feedback on these submissions. In particular, the following **new issues** have been raised through submissions, and are under active consideration by the Commission:

- Spark's suggestion to broaden the process for requesting Operations Manual and SLA changes to support potential RSQ standards in the future; and
- Chorus's suggestion to amend the UCLF Backhaul STD Schedule 3, cl 9.2 reporting obligation from monthly to quarterly.

If you wish to provide feedback, please do so by responding to regulation.branch@comcom.govt.nz with the subject line "STD s 30R reviews cross-submission" before **5pm Tuesday 5 November 2019**. Our expected date for finalising these reviews remains unchanged for 9 December 2019.

Kind regards

Simon Thomson
