PART 1 - DOCUMENT INFORMATION

1. Introduction

- | | | |
|--|-------|--|
| 1.1 Purpose | 1.1.1 | This Operations Manual (Manual) is part of the UCLF Terms and sets out the operational procedures for supply of the UCLF Service. |
| 1.2 Relationship with the UCLF Terms | 1.2.1 | This Manual should be read in conjunction with the other documents which make up the UCLF Terms, in particular the UCLF General Terms. |
| 1.3 Change Mechanism and Distribution | 1.3.1 | This Manual may be changed in accordance with the change mechanism set out in section 9 of the UCLF General Terms. |
| | 1.3.2 | Chorus will make the current version of this Manual available on a Chorus website accessible by the Access Seeker. |
| | 1.3.3 | Chorus will review this Manual every second year after the determination date starting on 7 November 2007 (or earlier if requested by the Access Seeker and an earlier review is agreed by Chorus). The same change mechanism (set out in section 9 of the UCLF General Terms) will apply to any changes proposed by Chorus as a result of any review. |
| 1.4 Definitions | 1.4.1 | References to clauses or sections are references to clauses or sections in this Manual unless expressly provided otherwise. The Glossary (Appendix A) sets out definitions for terms contained in this Manual that are not defined in the UCLF General Terms. Otherwise, the definitions set out in the UCLF General Terms apply. |

2. People and Contact Details

- | | | |
|--------------------|-------|---|
| 2.1 General | 2.1.1 | Immediately following the Access Date, the Access Seeker and Chorus must provide each other with the people and contact details set out in clause 2.2. Any change to the people or contact details must be advised in writing to the other party's principal point of contact. All people and contact details will remain valid until a party has advised the other in writing of a change (and provided an updated list of people and contact details). In addition to the people and contact details provided, where Chorus details are specified in the body of this Manual, the Access Seeker must use those details. |
| | 2.1.2 | If for any reason a party is prevented from giving any Notice pursuant to the UCLF Terms to the relevant person or contact advised by the other party, the same Notice may be given to the other party's principal point of contact. If for any reason the other party's principal point of contact is unavailable or his or her identity and contact details have not been advised, the same Notice may be given by serving it either: |

- (a) at the other party's contact address for giving Notice under the UCLF Terms; or
- (b) personally (if the other party is a natural person); or
- (c) at the other party's registered office (if the other party is incorporated).

2.2 People and Contact Details

Contact and detail required	Purpose
<p><i>Both parties provide</i> Contact address for giving Notice under the UCLF Terms. (This must include a street address and a fax number.)</p>	<p>This is the street address and fax number that Notices can be sent to under the UCLF Terms by the other party.</p>
<p><i>Both parties provide</i> Principal point of contact. (This must include the principal point of contact's email address, mobile and work telephone numbers.)</p>	<p>This is the person responsible for the overall relationship between the parties with respect to the UCLF Service. For Chorus this will usually be the account manager for the relevant Access Seeker.</p>
<p><i>Chorus only provides</i> Service Delivery Manager. (This must include the Service Delivery Manager's email address, mobile and work telephone numbers.)</p>	<p>This is the person responsible for service delivery of the UCLF Service to the Access Seeker.</p>
<p><i>Chorus only provides</i> Provisioning manager. (This must include the provisioning manager's email address, mobile and work telephone numbers.)</p>	<p>This is the person responsible for the provisioning of the UCLF Service to the Access Seeker.</p>
<p><i>Access Seeker only provides</i> Provisioning and forecasting manager. (This must include the provisioning and forecasting manager's email address, mobile and work telephone numbers.)</p>	<p>This is the Access Seeker's counterpart to the Chorus provisioning manager.</p>
<p><i>Access Seeker only provides</i> Email address for Chorus to send cabinetisation forecasts.</p>	<p>This is the email address to which Chorus will send the cabinetisation forecasts described in section 7 below.</p>
<p><i>Access Seeker only provides</i> Names and email addresses of one or two people to become OO&T user administrators.</p>	<p>These people will manage the creating and disabling of Access Seeker staff accounts to access the OO&T website.</p>
<p><i>Access Seeker only provides</i> People who are authorised to download eBill files.</p>	<p>These are the people who will be set up with access to Chorus' secure HTTP site from which the Access Seeker's eBills can be viewed and downloaded.</p>

Access Seeker only provides
People who are authorised to download the UCLF Price List file.

These are the people who will be set up with access to Chorus' secure HTTP site where the UCLF Price List file can be viewed and downloaded.

Access Seeker only provides
Order confirmation email address.

This is the email address to which Chorus will send confirmation of Orders in cases where the Access Seeker has submitted a provisioning request via email.

Chorus only provides
Fault reporting contact details. (This must include an 0800 fault reporting service number.)

These are the contact details the Access Seeker must use for the reporting of faults in instances where Chorus has advised that OFM is unavailable under clause 10.3.6 below.

Chorus only provides
Business continuity email address.

This is the email address to send forms to under clause 8.1.28.

Chorus only provides
Billing team email address.

This is the email address to which the Access Seeker will send billing queries under clause 12.3 below.

Access Seeker only provides
Name, email address, mobile and work telephone number of person Chorus should respond to for billing queries.

This is the email address to which Chorus will respond in relation to billing queries.

Access Seeker only provides
Contact with respect to faults - name, email address, mobile and work telephone numbers.

This is the contact Chorus will deal with in respect of faults.

Access Seeker only provides
Contact for UCLF Performance Reports. (This must include a name, email address and mobile and landline telephone numbers.)

This is the contact to whom Chorus will send UCLF Performance Reports.

3. Technical Manuals and User Guides

3.1 General

3.1.1 This Manual refers to various technical manuals (including published New Zealand and international standards) and user guides that contain technical and procedural detail. Such reference is necessary for both the Access Seeker and Chorus so that:

- (a) uniform standards of best practice are set;
- (b) the performance of the Local Loop Network is maintained;
- (c) the health and safety of the Access Seeker's and Chorus' employees, contractors and other agents can be protected;

- (d) systems are in place for the management of outages, faults and any work the Access Seeker or Chorus need to undertake; and
 - (e) the Access Seeker's and Chorus' employees, contractors and other agents have access to uniform technical instructions.
- 3.1.2 To the extent that this Manual creates any obligation to comply with a technical manual or user guide, the Access Seeker and Chorus must:
- (a) apply the technical manual or user guide in good faith;
 - (b) interpret the technical manual or user guide consistently with the UCLF Terms; and
 - (c) comply with the technical and/or procedural detail the technical manual or user guide contains.
- 3.1.3 Electronic copies of all the relevant technical manuals and user guides will be made available to the Access Seeker as soon as practicable after the Access Date or following a earlier request from the Access Seeker.

4. Good Faith and Dispute Resolution

- 4.1 General**
- 4.1.1 The parties will deal with each other in good faith in relation to this Manual. The parties will act co-operatively and in good faith to facilitate the procedures required for supply of the UCLF Service.
- 4.1.2 Any dispute, question or difference (including a dispute, question or difference under clause 3 above) that arises between the parties must be dealt with in accordance with the Escalation Protocol in Appendix B. The parties must use all reasonable endeavours to resolve the issue in this way before giving a Dispute Notice under section 38 of the UCLF General Terms.
- 4.1.3 In some parts this Manual provides that any Dispute in relation to a particular issue will be of a technical, operational or implementational nature which requires significant investigation of factual matters, and therefore, in the event of a Deadlock, must be resolved by an expert determination. However, nothing in this Manual will prevent the Access Seeker or Chorus from seeking any remedies available under the Act.

5. Prerequisites

- 5.1 Overview**
- 5.1.1 In addition to the commercial prerequisites set out in section 6 of the UCLF General Terms, the Access Seeker must satisfy the following operational prerequisites in relation to the UCLF Service. The Access Seeker may, at its option, enter into a non-disclosure agreement with Chorus covering discussions prior to placing an Order for the UCLF Service (but neither Chorus nor the Access Seeker will be under any obligation to do so).

5.2 Operational

5.2.1 Prior to placing the first Forecast with Chorus Chorus must have granted to the Access Seeker, and the Access Seeker has verified it has access to, the Chorus operational support systems required for the provision of the UCLF Service Forecasts, namely the secure UCLF web portal (this is required in order to download soft copies of the Forecasting Spreadsheet).

5.2.2 Prior to placing its first Order with Chorus in relation to any Exchange, the following prerequisites must be met:

- (a) Chorus has granted to the Access Seeker, and the Access Seeker has verified it has access to, Chorus' Operational Support Systems required for the provision for the UCLF Service, including:
 - (i) the UCLF Pre-qualification system;
 - (ii) Chorus' online ordering and tracking system (**OO&T**); and
 - (iii) Chorus' online fault management system (**OFM**);
- (b) the Access Seeker must have the capability at the required Exchange to access and interconnect with the Local Loop Network (whether by co-locating its equipment at the Exchange or otherwise); and
- (c) the Access Seeker must have submitted a Forecast for the relevant Forecast Cluster.

PART 2 - FORECASTING

6. Access Seeker Forecasting

6.1 Access Seeker Forecasting *Overview*

- 6.1.1 The Access Seeker must use all reasonable endeavours to provide Chorus with Forecasts of the volumes of its expected Orders as outlined in clauses 6.1.9, 6.1.10, 6.1.13, 6.1.14 and 6.1.19 below.
- 6.1.2 There are four Forecast types that Access Seekers must provide:
- (a) Bulk Transfer Forecasts;
 - (b) BAU Forecasts;
 - (c) Exception to BAU Forecasts and
 - (d) Remote Tie Cable Forecasts.
- 6.1.3 A Forecasting Template will be provided by Chorus with a separate worksheet for each Forecast type. The Forecasting Template will be published on a Chorus website and available at the time the Forecast is required. Each time the Access Seeker is required to submit a Forecast, it must email to Chorus a copy of the Forecasting Template with all information in the relevant worksheets completed in full. Chorus may update the Forecasting Template from time to time as may be reasonably necessary or appropriate for providing the UCLF Service. In the event that Chorus updates the Forecasting Template, it will email a copy of the updated Forecasting Template to the Access Seeker's provisioning and forecast manager 20 Working Days prior to the date on which forecast managers will be expected to make use of the revised Forecasting Template, and update the Forecasting Template on its website.
- 6.1.4 Where the Access Seeker fails to submit the required BAU Forecasts, Chorus will use all reasonable endeavours to process any relevant orders but there will be no requirement for Chorus to meet the Service Levels in respect of the services or transactions to which the missing Forecast should have related.

Bulk Transfer Forecasts

Definition of Bulk Transfer

- 6.1.5 A Bulk Transfer is the transfer, in a coordinated manner, of 20 or more MPFs or 20 or more End Users onto services based on the UCLF Service supplied to the Access Seeker. Bulk Transfer involves a number of MPF Transfer Orders and/or Other Service to MPF Transfer Orders that may need to be synchronised, and resources co-ordinated, in order to meet the specific requirements of the Access Seeker and may involve dedicated or additional resource at the Exchange.

6.1.6 Subject to clause 6.1.7 there are three circumstances where an Access Seeker may request a Bulk Transfer:

- (a) initial migration of the Access Seeker's End Users from other Chorus provided services to the UCLF Service;
- (b) subsequent Bulk Transfers as Access Seekers build End Users on other Chorus provided services, and then migrate them to the UCLF Service; and
- (c) transfers of End Users between an Other Service Provider and the Access Seeker as the result of a mass acquisition.

6.1.7 Bulk Transfers:

- (a) must be a planned and managed event with representatives from Chorus the Access Seeker (and in the case of Bulk Transfers as the result of mass acquisition, the Losing Service Provider) working through an agreed process;
- (b) must involve End Users all fed from the same Exchange;
- (c) must not include new End User connections (i.e. End Users that were not End Users of either the Access Seeker or, in the case of Bulk Transfers as the result of a mass acquisition, the Losing Service Provider, prior to the Bulk Transfer);
- (d) must not include MPF Move Address or MPF Relinquishment Orders; and
- (e) must not include any requests for additional services on an MPF as part of the process.

6.1.8 Bulk Transfers are carried out in accordance with an agreed plan and are not subject to the Service Levels set out in the SLA.

Forecasting Requirements

6.1.9 For any proposed Bulk Transfer the Access Seeker must submit to Chorus a Bulk Transfer Forecast at least three months and two Working Days before the first day of the month in which the Access Seeker requests the Bulk Transfer to commence. The date the Access Seeker requests the Bulk Transfer to commence is referred to below as MPF Day Zero. Further, more detailed Bulk Transfer Forecasts for that Bulk Transfer must then be submitted:

- (a) two months and two Working Days before the first day of the month of MPF Day Zero; and
- (b) one month and two Working Days before the first day of the month of MPF Day Zero.

An Access Seeker can request a Bulk Transfer of less than the 20 lines specified in clause 6.1.5, however the transfer must be a planned and

managed event in accordance with clause 6.1.7(a). The Access Seeker must forecast a Bulk Transfer of less than the 20 lines along with other Bulk Transfer of 20 lines or more noting that Chorus will charge for this managed service and below 20 lines there will be no economies of scale in the transfer fee.

- 6.1.10 The detail required in the Bulk Transfer Forecasts increases as MPF Day Zero is approached. All Bulk Transfer Forecasts must contain all of the information indicated in the relevant worksheet of the Forecasting Template and must include the date the Bulk Transfer Forecast is submitted, the date of MPF Day Zero and the Exchange at which the Bulk Transfer is to take place. In addition:
- (a) the Bulk Transfer Forecast submitted three months and two Working Days before the first day of the month of MPF Day Zero must show the number of proposed MPF Transfer Orders and Other Service to MPF Transfer Orders at each Exchange for the month of MPF Day Zero;
 - (b) the Bulk Transfer Forecast submitted two months and two Working Days before the first day of the month of MPF Day Zero must show the number of proposed MPF Transfer Orders and Other Service to MPF Transfer Orders at each Exchange for each week in the month of MPF Day Zero; and
 - (c) the Bulk Transfer Forecast submitted one month and two Working Days before the first day of the month of MPF Day Zero must show the number of proposed MPF Transfer Orders and Other Service to MPF Transfer Orders at each Exchange for each Working Day in the month of MPF Day Zero.

BAU Forecasts

Definition

- 6.1.11 BAU Forecasts involve the ongoing every day forecasting of any of the following categories of Orders:
- (i) UCLF MPF New Connection Orders;
 - (ii) UCLF MPF Transfer Orders; and
 - (iii) Other Service to UCLF MPF Transfer Orders (if any).
- 6.1.12 Bulk MPF transfer for a single End User as part of the UCLF Service is considered part of BAU Forecasting. However, Access Seekers may, at their cost, request additional capacity to support the business customer situation where there are multiple lines to be transferred in a coordinated manner (provided at least 10 lines are involved). Where Access Seekers wish to make such a request, they should contact their Chorus Service Delivery Manager. Chorus and the Access Seeker will agree any additional capacity required. Any additional capacity will be charged for in accordance with the UCLF Price List.

Forecasting Requirements

6.1.13 (a) The Access Seeker must each month submit to Chorus a BAU Forecast of its expected volumes of each of the following:

- (i) UCLF MPF New Connection Orders;
- (ii) UCLF MPF Transfer Orders; and
- (iii) Other Service to UCLF MPF Transfer.;

at each Forecast Cluster for each month in the following 12 month BAU Forecast period. BAU Forecasts are therefore rolling forecasts that are submitted each month. For the avoidance of doubt and for the purposes of the joint forecasting arrangements, the Access Seeker is not required to submit:

- (a) (bi) BAU Forecasts in accordance with the UCLF Operations Manual.
- (b) BAU Forecasts for the UCLF Service under this clause 6.1.13 and any other joint forecasts required by this Manual:
 - (i) are designed to reduce compliance costs for Access Seekers and Chorus because Access Seekers are required to produce a combined forecast for the UCLF Service; and
 - (ii) must comply with the terms and conditions of this Manual.

6.1.14 Each BAU Forecast must be provided at least one month and two Working Days before the start of the 12 month BAU Forecast period to which it relates. A BAU Forecast must contain all of the information indicated in the relevant worksheet of the Forecasting Template including the date it is submitted to Chorus .

**Exception to BAU
Forecasts**

Definition

6.1.15 These are Forecasts of MPF New Connection Orders, MPF Transfer Orders, and Other Service to MPF Transfer Orders submitted for a one-off market event and have the following characteristics:

- (a) they are separate from (and in excess of) BAU Forecasts; and
- (b) they may require increased resource at the Exchange.

6.1.16 The key requirement is for Chorus to provide a capability such as a 'Rapid Response' churn of End Users, resulting from initiatives such as a door knock selling campaign, whereby MPF New Connection Orders, MPF Transfer Orders, and Other Service to MPF Transfer Orders can be processed immediately and service swung over in a relatively short timeframe.

- 6.1.17 The additional capacity required to meet the requirements of an Exception to BAU Forecast will be agreed by Chorus and the Access Seeker. Any additional capacity will be charged for at the price determined in accordance with the UCLF Price List.
- 6.1.18 Exception to BAU Orders are not subject to the Service Levels as defined in the SLA. The earlier the Access Seeker's Exception to BAU Forecast is submitted to Chorus the more likely it will be that Chorus will be able to provide capability that meets the Access Seeker's requirements.

Forecasting Requirements

- 6.1.19 For any proposed Exception to BAU Order, the Access Seeker must submit to Chorus an Exception to BAU Forecast at least three months and two Working Days before the first Working Day of the month in which the Access Seeker requests the Exception to BAU to commence. The date the Access Seeker requests the Exception to BAU to commence is referred to below as Exception to BAU Day Zero. Further, more detailed Exception to BAU Forecasts for that Exception to BAU must then be submitted:
- (a) two months and two Working Days before the first day of the month of Exception to BAU Day Zero; and
 - (b) one month and two Working Days before the first day of the month of Exception to BAU Day Zero.
- 6.1.20 The detail required in the Exception to BAU Forecasts increases as Exception to BAU Day Zero is approached. All Exception to BAU Forecasts must contain all of the information indicated in the relevant worksheet of the Forecasting Template and must include the date the Exception to BAU Forecast is submitted, the date of Exception to BAU Day Zero and the Forecast Cluster at which the Exception to BAU Order is to take place. In addition:
- (a) the Exception to BAU Forecast submitted three months and two Working Days before the first day of the month of Exception to BAU Day Zero must show the number of proposed MPF New Connection Orders, MPF Transfer Orders and Other Services to MPF Transfer Orders at each Exchange Cluster for the month of Exception to BAU Day Zero;
 - (b) the Exception to BAU Forecast submitted two months and two Working Days before the first day of the month of Exception to BAU Day Zero must show the number of proposed MPF New Connection Orders, MPF Transfer Orders and Other Service to MPF Transfer Orders at each Forecast Cluster for each week in the month of Exception to BAU Day Zero; and
 - (c) the Exception to BAU Forecast submitted one month and two Working Days before the first day of the month of Exception to

BAU Day Zero must show the number of proposed MPF New Connection Orders, MPF Transfer Orders and Other Service to MPF Transfer Orders at each Forecast Cluster for each Working Day in the month of Exception to BAU Day Zero.

Remote Tie Cable Forecasts

Definition

- 6.1.21 Tie Cable Forecasts involve the monthly forecasting of Remote Tie Cable Service Orders. Only one Remote Tie Cable Forecast is required for Remote Tie Cables associated with the UCLF Service. Forecasts for Intra-Exchange Tie cables are provided as part of the Co-location Forecasts described in the UCLF Co-location Operations Manual.

Forecasting Requirements

- 6.1.22 The Access Seeker must each month submit to Chorus a Remote Tie Cable Forecast of its expected volumes of Remote Tie Cable Orders at each Exchange for each month in the following 12 month Tie Cable Forecast period. Remote Tie Cable Forecasts are therefore rolling forecasts that are submitted each month.
- 6.1.23 Each Remote Tie Cable Forecast must be provided at least one month and two Working Days before the start of the 12 month Remote Tie Cable Forecast period to which it relates. A Remote Tie Cable Forecast must contain all of the information in the relevant worksheet of the Forecasting Template including the date it is submitted to Chorus .

Forecasting Submission

Forecasting Submission Process

- 6.1.24 Each Forecast will be emailed to the email address advised by Chorus from time to time.
- 6.1.25 The Access Seeker will ensure each Forecast is as accurate as possible.
- 6.1.26 The Access Seeker will ensure that each Forecast is received by the dates specified above, as applicable.
- 6.1.27
- (a) Chorus may make a reasonable request of the Access Seeker to provide additional information relating to a Forecast already provided. The Access Seeker must prepare the requested information with reasonable care and provide the information promptly.
 - (b) The Access Seeker's Forecast is Confidential Information for the purposes of section 33 of the UCLF General Terms.

BAU Underforecast/overforecast

- 6.1.28 An Access Seeker may forecast any level of BAU Orders it considers appropriate subject to this section 6. The intent of the following

provisions is to progressively increase the accuracy of forecasts and to limit variations in Forecasts during the 12 month period of BAU Forecasts leading up to the Order Month.

6.1.29 In this clause 6.1:

- (a) "All Orders" means together, (i) MPF New Connection Orders, MPF Transfer Orders and Other Service to MPF Transfer Orders;;
- (b) "Previous Forecast" means the total of All Orders forecasted for the relevant Order Month in the BAU Forecast submitted in respect of the previous month;
- (c) "Order Month" means the month in which All Orders are made, or which forecasts relate to, as applicable;
- (d) "Order Volume" means the total volume of All Orders forecasted by the Access Seeker;
- (e) "Month [x]" means the month that is x months before the relevant Order Month. For example, Month 2 means the month that is two months before the relevant Order Month.

6.1.30 BAU Forecasts submitted in respect of Months 1 and 12 shall include forecast of All Orders on a per Forecast Cluster basis. An Access Seeker must submit BAU Forecasts for months 7 to 12 even though BAU Forecasts for these months are not governed by clause 6.1.31. Where the Access Seeker is aware that volume is not likely to be evenly distributed within any Forecast Cluster over the month or across weeks within the month, BAU Forecasts submitted in respect of:

- (a) Month 2 shall include Forecasts of All Orders on a per week, per Forecast Cluster basis across all Forecast Clusters; and
- (b) Month 1 shall include Forecasts of All Orders on a per day, per Forecast Cluster basis across all Forecast Clusters.

for the Order Month.

6.1.31 Where the Access Seeker provides a BAU Forecast of 10 or more connections for any Order Month, the Order Volume for that Order Month must be:

- (a) where the BAU Forecast is for Month 6 or Month 5 (inclusive) (in this paragraph (a), "relevant month") no greater than 120% and no less than 80% of the total of the Previous Forecast (if any); and where the Order Volume for the relevant month is:
 - (i) greater than 120%; or
 - (ii) less than 80%

of the Previous Forecast (or deemed to be forecasted under this clause 6.1.31), then the BAU Forecast submitted in respect of the

relevant month will be deemed to be a forecast for an amount of All Orders equal to:

- (iii) 120% of the total of the All Orders forecasted where paragraph (i) above applies; or
 - (iv) 80% of the total of the All Orders forecasted where paragraph (ii) above applies;
- (b) where the BAU Forecast is for Month 4 or Month 3 (inclusive) (in this paragraph (b), “relevant month”), no greater than 115% and no less than 85% of the Previous Forecast; and where the Order Volume for that Order Month is:
- (i) greater than 115%; or
 - (ii) less than 85%

of the Previous Forecast (or deemed to be forecasted under this clause 6.1.31), then the BAU Forecast submitted in respect of the relevant month will be deemed to be a forecast for an amount of All Orders equal to:

- (iii) 115% of the total of the All Orders forecasted where paragraph (i) above applies; or
 - (iv) 85% of the total of the All Orders forecasted where paragraph (ii) above applies;
- (c) where the BAU Forecast is for Month 2 (in this paragraph (c), “relevant month”), no greater than 110% and no less than 90% of the Previous Forecast, per Forecast Service Area and where the Order Volume for the relevant month for a Forecast Service Area is:
- (i) greater than 110%; or
 - (ii) less than 90%

of the Previous Forecast for that Forecast Service Area (or deemed to be forecasted under this clause 6.1.31), then the BAU Forecast submitted in respect of the relevant month will be deemed to be a forecast for an amount of All Orders equal to:

- (iii) 110% of the total of the All Orders forecast for that Forecast Service Area where paragraph (i) above applies; or
 - (iv) 90% of the total of the All Orders forecast for that Forecast Service Area where paragraph (ii) above applies
- (d) Where the BAU Forecast is for Month 1 (in this paragraph (d), “relevant month”), no greater than 105% and no less than 95% of the Previous Forecast, per Forecast Service Area and where the
-

Order Volume for the relevant month for a Forecast Service Area is:

- (i) greater than 105%; or
- (ii) less than 95%

of the Previous Forecast for that Forecast Service Area (or deemed to be forecasted under this clause 6.1.31), then the BAU Forecast submitted in respect of the relevant month will be deemed to be a forecast for an amount of All Orders equal to:

- (iii) 105% of the total of the All Orders forecast for that Forecast Service Area, where paragraph (i) above applies; and
- (iv) 95% of the total of the All Orders forecast for that Forecast Service Area, where paragraph (ii) above applies.

Chorus will notify the Access Seeker of the deeming effects of paragraphs (a) to (d) and the reallocation provisions of paragraph (f) of this clause 6.1.31 so that the Access Seeker is aware of its then current BAU Forecast for a month.

6.1.32 The volume of All Orders actually made in an Order Month should be no greater than 105% or no less than 95% of the Previous Forecast per Forecast Service Area, and in the case of each day of the Order Month per Forecast Service Area:

- (a) no greater than 130% of the Forecast submitted in respect of Month 1 for that same day of the Forecast Service Area, if such Forecast is submitted in accordance with clause 6.1.30(b); or
- (b) if no such Forecast is submitted for that same day in accordance with clause 6.1.30(b), no greater than 130% of the average daily forecast of Month 1 (i.e. when the Forecast for Month 1 is divided by the number of Working Days in the month and rounded to the nearest whole number) for the Forecast Service Area.

The +/-5% is the “tolerance level”, and the +30% is the “daily tolerance level”. If the tolerance level for a Forecast Service Area is exceeded, the provisions of clause 6.1.33 or 6.1.34 apply.

6.1.33 (A) Where the volume of All Orders actually made (excluding those orders that have been cancelled or rejected as at the end of the month) by the Access Seeker for an Order Month for a Forecast Area is less than 95% of the Previous Forecast for that Forecast Service Area (or deemed to be forecasted under clause 6.1.31) for that Order Month (“Overforecast”) then, if requested by Chorus the Access Seeker will pay to Chorus the sum of \$20 per All Orders for each of the All Orders which fall between All Orders actually made and the 95% threshold, (the ‘Overforecast Reimbursement’), unless the Access Seeker has paid the Overforecast Reimbursement under another determination in

which case the Overforecast Reimbursement under clause 6.1.33(A) is not payable.

6.1.34 Where the volume of All Orders actually made (excluding those orders that have been cancelled or rejected as at the end of the month) by the Access Seeker for an Order Month for a Forecast Service Area is greater than 105% of the Previous Forecast for that Forecast Service Area (or deemed to be forecasted under clause 6.1.31) for that Order Month (“Underforecast”), then there will be no requirement for Chorus to meet the relevant service levels to the extent that they relate to Orders within the volume of All Orders that exceed the 105% threshold that applies.

6.1.35 Where the volume of All Orders actually made (excluding those orders that have been cancelled or rejected as at the end of the month) for a day of an Order Month for Forecast Service Area (in this clause 6.1.35, “the relevant day”):

- (a) Is greater than 130% of the Forecast submitted in respect of Month 1 for that same day for the Forecast Service Area, if such Forecast is submitted in accordance with clause 6.1.30(b); or
- (b) if no such Forecast is submitted for that same day in accordance with clause 6.1.30(b), is no greater than 130% of the average daily forecast of Month 1 (i.e. when the Forecast for Month 1 is divided by the number of Working Days in the month and rounded to the nearest whole number) for the Forecast Service Area;

(“Excess Orders”)

there will be no requirement for Chorus to meet the Service Levels set out in the SLA to the extent that they relate to Orders that are Excess Orders.

6.1.36 To the extent that clause 6.1.34 or 6.1.35 applies, and so far as is practicable, Chorus will consult with the Access Seeker about any All Orders actually made during a week of a month that:

- (a) exceed the Month 1 BAU Forecast; or
- (b) exceed the daily tolerance level (as described under clause 6.1.32).

6.1.37 Chorus will notify the Access Seeker of:

- (a) any sum claimed by Chorus in respect of any Overforecast under clause 6.1.33; and
- (b) the extent to which Chorus was unable to meet the Service Levels in the SLA as the result of any Underforecast or any Excess Orders in accordance with clauses 6.1.34 or 6.1.35.

6.1.38 The parties acknowledge that:

- (a) for the purposes of clauses 6.1.30 to 6.1.31, a Forecast “in respect” of a month shall in practice be submitted 1 month and 2 Working Days before that month;
- (b) where the volume of All Orders actually made (as calculated at the end of the Order Month) by the Access Seeker for a Forecast Service Area for an Order Month as compared against the Previous Forecast for that Forecast Service Area (or deemed to be forecasted under clause 6.1.31) for that Order Month has a variance of less than 10, the consequences for inaccurate forecasting set out in clauses 6.1.33 to 6.1.34 will not apply; and
- (c) where the volume of All Orders actually made (as calculated at the end of the Order Month) by the Access Seeker for a Forecast Service Area for an Order Month is less than 10, the consequences for inaccurate forecasting set out in clause 6.1.35 will not apply.

6.1.39 Until the Access Seeker has provided at least two consecutive months of monthly BAU Forecasts, Chorus will use all reasonable endeavours to process any Orders but there will be no requirement for Chorus to meet the relevant Service Levels set out in the SLA.

7. Cabinetisation Forecasting

7.1 Cabinetisation Forecasting	7.1.1	Chorus will provide the Access Seeker a written rolling three year cabinetisation forecast in accordance with section 37 of the UCLF General Terms.
---------------------------------------	-------	---

PART 3 - PROVISIONING

8. Provisioning

8.1 OO&T

Overview

8.1.1 Subject to the provisions below relating to business continuity all Access Seeker Orders for the UCLF Service must be placed using OO&T. Any Orders that the Access Seeker attempts to place by other means (for example, by email or by fax) will be invalid and may be disregarded by Chorus. If an Access Seeker does place an invalid Order Chorus will use all reasonable endeavours to notify the Access Seeker if such Orders have been received.

8.1.2 OO&T allows the Access Seeker to:

- (a) submit and track the status of Orders; and
- (b) update existing Orders (up to the time they are accepted).

8.1.3 Access Seekers requesting:

- (a) Bulk transfer for a single End User as described in clause 6.1.12; or
- (b) Exception to BAU Orders as described in clauses 6.1.15 and 6.1.16,

must contact their Chorus Service Delivery Manager to agree what additional capacity is required, how Orders relating to that capacity will be processed, and how the additional capacity will be delivered.

8.1.4 Access Seekers requesting Bulk Transfers as described in clauses 6.1.5 to 6.1.8 or the Tie Cable Service must, prior to submitting Orders through OO&T, contact their Chorus Service Delivery Manager, to begin discussing the relevant details.

Terms of Provision

8.1.5 OO&T is a Chorus System provided by Chorus in accordance with the UCLF General Terms and this Manual.

B2B

8.1.6 The Access Seeker can choose to directly integrate its systems with OO&T via the OO&T Business to Business Web Services Interface (**B2B**). If the Access Seeker is interested in B2B it can contact its account manager for documentation describing the development required to interact with B2B. A trial agreement must be signed before access to a test site, after which an Integration Access Agreement is required to be executed prior to migrating to a production instance.

Training and Support

- 8.1.7 Chorus will provide reasonable initial set up training on OO&T.
- 8.1.8 "Reasonable initial set up training" in this context consists of a workshop held at a Chorus location. The workshop will address:
- (a) overview of forms for forecasting;
 - (b) overview of forms for ordering;
 - (c) basic details of the OO&T system (including demonstration of the system);
 - (d) overview of billing and accounts; and
 - (e) Q&A.
- 8.1.9 The Access Seeker will ensure that a reasonable number of staff (up to a maximum number of 10) attend any training provided.
- 8.1.10 Any additional training required by the Access Seeker beyond reasonable initial set up training will be charged for by Chorus in accordance with the UCLF Price List.

Access to OO&T

Description of OO&T

- 8.1.11 OO&T allows the Access Seeker to log on to a secure site for placing and monitoring Orders with Chorus.

Access for Authorised Personnel

- 8.1.12 The Access Seeker will provide Chorus with the names of one or two people to become OO&T user administrators. These people will then manage the creating and disabling of Access Seeker staff accounts to access OO&T.
- 8.1.13 On request from the Access Seeker, Chorus will reset, disable or alter the user administrator accounts.

Right to Restrict or Prohibit Use of OO&T

- 8.1.14 Subject to clause 8.1.15, Chorus reserves the right to restrict or prohibit access to OO&T if any of the Access Seeker's staff or systems:
- (a) perform malicious or unintentional actions that damage or may potentially damage OO&T; or
 - (b) use OO&T in an unauthorised manner or in such a way that causes or may cause material performance issues,

provided that Chorus will restrict or prohibit access to the minimum extent practicable to protect OO&T and any related system.

- 8.1.15 Chorus must use all reasonable endeavours to provide the Access Seeker with reasonable prior Notice of such restrictions or prohibitions. Where this is not practicable in the circumstances, Chorus will give the Access Seeker Notice of the restriction or prohibition as soon as practicable after the event.

Additional Functionalities or Enhancements to OO&T

- 8.1.16 Where Chorus creates any additional functionality within OO&T or makes any enhancement to it, Chorus will give Notice to the Access Seeker. The Access Seeker will modify its own provisioning systems and/or operational procedures to the extent required. Chorus must consult with the Access Seekers before notifying Access Seekers of any additional functionality or enhancements to OO&T which affect the use of OO&T in relation to the UCLF Service.
- 8.1.17 The Access Seeker will utilise the additional functionalities or enhancements to OO&T as notified by Chorus from the date specified in Chorus' Notice (at the latest).
- 8.1.18 The Access Seeker is responsible for ensuring that its own systems are configured in accordance with its use of OO&T and complies with the requirements in the Chorus Web Services Interface Software Development Kit and the OO&T User Guide (reference ASD-001).

Costs

Chorus Costs

- 8.1.19 Chorus will be solely responsible for Chorus' costs of designing and developing OO&T, including any modifications and enhancements.

Access Seeker's Costs

- 8.1.20 The Access Seeker will be solely responsible for the costs of modifying its systems to interface with OO&T and B2B and for participating in the consultation and implementation process.

OO&T Fees

- 8.1.21 Chorus will charge a monthly licence fee for OO&T as set out in the UCLF Price List.

Terms of Use

Use of OO&T

- 8.1.22 The Access Seeker must only use OO&T for purposes authorised by Chorus.

Availability

- 8.1.23 Chorus will use all reasonable endeavours to ensure that OO&T is available to Access Seekers 24 hours a day, 7 days a week.

- 8.1.24 Although Chorus intends to take reasonable steps to prevent the introduction of viruses or other destructive features to OO&T, Chorus does not guarantee that it is free of such viruses or other destructive features.

Business Continuity

- 8.1.25 If Chorus advises the Access Seeker OO&T is unavailable the Access Seeker may submit provisioning requests by emailing the relevant form to Chorus as outlined below.

- 8.1.26 Chorus will make the following business continuity forms available to the Access Seeker:

- (a) Pre-qualification form;
- (b) MPF New Connection form;
- (c) MPF Transfer form;
- (d) Other Service to MPF Transfer form;
- (e) Bulk Transfer form;
- (f) MPF Relinquishment form;
- (g) MPF Move Address form;
- (h) Tie Cable Service form; and
- (i) MPF Pair Change and Re-termination form.

- 8.1.27 All business continuity forms submitted in accordance with this clause should come from a generic mailbox. This mailbox must include the Access Seeker's name in the email subject line as below:

- (a) [UCLF Form Name] - [Access Seeker Name] - [Access Seeker reference number]

- 8.1.28 Once completed, business continuity forms must be sent to the business continuity email address advised by Chorus in accordance with section 2.

8.2 Order Processing

Order Types

- 8.2.1 The following types of Orders may be made and each will be processed as outlined below:
- (a) Pre-qualification;
 - (b) MPF New Connection;
 - (c) MPF Transfer;

- (d) Other service to MPF Transfer;
- (e) Bulk Transfer;
- (f) MPF Relinquishment;
- (g) MPF Move Address;
- (h) Remote Tie Cable Service; and
- (i) MPF Pair Change or Re-termination.

Mandatory Fields

- 8.2.2 For each Order that is submitted either via OO&T or by email as outlined in clauses 8.1.25 to 8.1.28, the Access Seeker must complete all of the fields on the relevant form that are marked as mandatory.

Order Acknowledgement

- 8.2.3 For each Order that is submitted either via OO&T, or by email as outlined in clauses 8.1.25 to 8.1.28, Chorus will provide the Access Seeker with acknowledgement of receipt of that Order.

Business Hours

- 8.2.4 Orders will only be provisioned by Chorus during Business Hours.
- 8.2.5 Chorus will use all reasonable endeavours to ensure that all Orders entered into OO&T by Access Seekers outside of Business Hours on any Working Day are processed in the first Business Hour on the next Working Day. For the purpose of determining whether Chorus has met any relevant Service Levels as defined in the SLA for dealing with Orders, any Orders submitted to Chorus outside of Business Hours will be deemed to have been received by Chorus in the first Business Hour of the following Working Day.

Order Validation

- 8.2.6 An Order will be deemed invalid and may be rejected by Chorus if:
- (a) it is not submitted in accordance with this Manual; or
 - (b) one or more of the rejection criteria listed in Appendix C apply; or
 - (c) it is otherwise defective; or
 - (d) the Access Seeker will not have capability at the required Exchange to access and interconnect with the UCLF Service (whether by co-locating their equipment at the Exchange or otherwise).

8.2.7 Chorus will perform a validation check of each Order that it receives. That validation check will determine whether the Order complies with the requirements of clause 8.2.6.

8.2.8 If an Order is rejected, Chorus will advise the Access Seeker of that rejection and provide the Access Seeker with the applicable rejection reason.

Irregularities

8.2.9 Chorus will waive immaterial irregularities and process Orders where the intention is unambiguous. Examples of such irregularities include:

- (a) use of different conjunctions (e.g. "&" instead of "and");
- (b) improper application or omission of apostrophes;
- (c) variations in letter case;
- (d) use of initials instead of first names, or vice versa; and
- (e) names where letters have been accidentally transposed but the meaning is still clear (e.g. Dominoin = Dominion).

RFS Date

8.2.10 If an Order is accepted, Chorus will advise the Access Seeker of an expected Ready For Service (**RFS**) Date (where applicable to the type of Order involved).

8.2.11 Where Chorus becomes aware that it will be unable to meet the expected RFS Date notified under clause 8.2.10, Chorus will use all reasonable endeavours to advise the Access Seeker as soon as possible.

Updating an Order

8.2.12 The Access Seeker may change an existing Order that has been submitted using OO&T provided that:

- (a) changes to an existing Order by an Access Seeker can only be made within three Working Days of the RFS Date if Chorus has given its consent in writing to the change and that consent is not unreasonably withheld; and
- (a) if the Access Seeker changes an existing Order under this clause 8.2.12, all of the relevant Service Levels for that Order as defined in the SLA will be restarted as from the date of change of the Order and will be measured against the amended Order.

Local and Mobile Number Portability

- 8.2.13 Where an Order is raised by an Access Seeker that is associated with a number portability request, the Access Seeker may request that the Order is completed within a morning or afternoon time slot on a particular date that corresponds with the date and timeslot within which the number portability request related to that line is to be completed.
- 8.2.14 When an Access Seeker requests that Chorus completes a request for an Order in accordance with clause 8.2.13, Chorus will use reasonable endeavours to ensure that the Order is actioned on the date and within the time slot agreed with the Access Seeker.
- 8.2.15 If the date and time slot agreed between Chorus and the Access Seeker is outside the Standard Lead-Time in the UCLF Service Level Terms, actioning of the Order within the agreed time slot will not constitute a failure to meet the Standard Lead-Time specified in the UCLF Service Level Terms. Completion of the Order by Chorus on the date and within the time slot agreed between Chorus and the Access Seeker will not constitute a failure to meet Service Level 5 (meeting the expected RFS date) in the UCLF Service Level Terms.

Confirmations

- 8.2.16 Chorus will provide the Access Seeker with confirmation that provisioning of an Order has been completed.
- 8.2.17 Order confirmations submitted to the Access Seeker outside of Business Hours will be deemed to have been received by the Access Seeker in the first Business Hour of the following Working Day.

8.3 Charges

- 8.3.1 Charges for all the transactions, processes and services referred to in this Part are set out in the UCLF Price List. Charges may only be made for valid Orders following the validation provided for in clause 8.2.7.

8.4 Ordering UCLF Pre-qualification

Overview

- 8.4.1 Pre-qualification is a service that enables the Access Seeker to:
- (a) confirm the Exchange that serves a given address or existing MPF to ensure the Access Seeker has co-location or remote co-location capacity at that Exchange;
 - (b) receive estimated line attenuation ranges or actual electrical characteristics for an address or MPF; and
 - (c) receive information on the MPFs potentially available to an End User's site.
- 8.4.2 There are four types of pre-qualification:

- (a) unauthorised automatic pre-qualification;
- (b) authorised automatic pre-qualification;
- (c) special manual pre-qualification investigation; and
- (d) manual line testing.

Pre-qualification Acknowledgement

8.4.3 For each pre-qualification Order that is received by Chorus, Chorus will provide the Access Seeker with acknowledgement of receipt of the Order.

8.5 Unauthorised Automatic Pre-qualification

Overview

8.5.1 Unauthorised automatic pre-qualification is available when the Access Seeker does not have End User authorisation to supply services to the End User's service address.

Information Supplied

8.5.2 The Access Seeker will supply the item to be pre-qualified. That item may either be a service address or an existing MPF.

8.5.3 For a service address entry to be pre-qualified, a single address needs to be identified by selection from the existing Chorus address list using OO&T.

8.5.4 For an existing MPF entry to be pre-qualified, the associated ASID needs to be supplied.

Information Returned

8.5.5 The information returned by OO&T may include:

- (a) a single, total count of all MPFs currently working at the address plus all MPFs that are either present at the address but not working or that could be connected to the address with jumpering and, if necessary, extra service leads to the address;
- (b) the theoretical estimated line attenuation range for each MPF;
- (c) the identifier for the Exchange that serves the address; and
- (d) a flag indicating if and when a line will be impacted by a planned cabinetisation.

8.5.6 If items in the unauthorised automatic qualification results are not populated (and this is not due to the End User's line terminating at a cabinet), Chorus will automatically do a manual population of the data and the results will be returned to the Access Seeker.

8.5.7 Note that for service address entry where the End User's line terminates at a cabinet, this will be indicated by Chorus in the information returned.

8.6 Authorised Automatic Pre-qualification

Overview

8.6.1 Authorised automatic pre-qualification is available where the Access Seeker has obtained End User authorisation to investigate the supply of services to the End User's service address.

Information Supplied

8.6.2 The Access Seeker will supply the item to be pre-qualified. That item may either be a service address or an existing MPF.

8.6.3 For a service address entry to be pre-qualified, a single address needs to be identified by selection from the existing Chorus address list using OO&T. (Note that if the service address is absent, a new address can be submitted and Pre-qualification would be manual - see below on special manual Pre-qualification investigations.)

8.6.4 For an existing MPF entry to be pre-qualified, the associated ASID needs to be supplied.

8.6.5 The Access Seeker must also indicate confirmation that the End User has authorised the Access Seeker to investigate the supply of services to the End User's service address.

8.6.6 The Access Seeker must retain for a period of one year, and produce to Chorus or another Access Seeker on demand, evidence that the End Customer has authorised the Access Seeker to make an investigation into the supply of services in accordance with clause 8.6.1.

Information Returned

8.6.7 The information returned by OO&T may include:

- (a) a count of all MPFs currently working at the address;
- (b) a count of all MPFs that are either present but not working or that could be connected with jumpering and, if necessary, extra service leads to the service address;
- (c) the theoretical estimated line attenuation range for each MPF; and
- (d) the identifier for the Exchange that serves the address.;

8.6.8 If items in the authorised automatic Pre-qualification results are not populated (and this is not due to the End User's line terminating at a cabinet), Chorus will automatically do a manual population of the data and the results will be returned to the Access Seeker.

- 8.6.9 Note that for service address entry where the End User's line terminates at a cabinet, this will be indicated in the information returned.
-

**8.7 Special
Manual Pre-
qualification
Investigation**

Overview

- 8.7.1 A special manual pre-qualification investigation is carried out in circumstances where the Access Seeker wishes to obtain information about a new address.

Information Supplied

- 8.7.2 The Access Seeker must submit the new address with all address elements provided (street name, number etc).
- 8.7.3 The Access Seeker must also supply confirmation that the End User has authorised the Access Seeker to supply services to the End User's service address.

Information Returned

- 8.7.4 OO&T will return the following information:
- (a) a count of all MPFs currently working at the address;
 - (b) a count of all MPFs that are either present but not working or that could be connected with jumpering and, if necessary, extra service leads to the service address;
 - (c) the theoretical estimated line attenuation range for each MPF; and
 - (d) the identifier for the Exchange that serves the address.
-

**8.8 Manual Line
Testing**

Overview

- 8.8.1 Manual line testing pre-qualification is available for Access Seekers to ascertain actual rather than theoretical estimated MPF electrical characteristics, such as might be required when an estimated result has returned a value that is marginal for an intended service. Measurements will be performed by a specialist group of service company staff and will be subject to scheduling according to their availability.

Information Supplied

- 8.8.2 The Access Seeker will supply:
- (a) the address or if available the ASID for the existing MPF to be measured;

- (b) confirmation that the End User has authorised the Access Seeker to supply services to the End User's service address and that the current service can be disrupted while measurement is carried out;
- (c) details of which of the following items should be included in the physical measurement of the MPF's electrical characteristics (from one end):
 - A&B earth and battery;
 - insertion loss at 160kHz;
 - A&B capacitance to earth;
 - loop capacitance;
 - loop resistance (to NTE termination);
 - Testing will not include the End User's premises wiring, only the Chorus network path from ETP to MDF.

Information Returned

- 8.8.3 OO&T will return the information requested in accordance with 8.8.2(c) once the site visit has been completed and the data captured in the system.

8.9 Authorisation for Transfer Orders

Overview

- 8.9.1 This section 8.9 applies to MPF Transfer Orders and Other Service to MPF Transfer Orders, where an End User is transferring from one Access Seeker (or Service Provider as the case may be) to another Access Seeker.
- 8.9.2 Access Seekers must obtain the Customer Authorisation to these transfers, in accordance with the terms of the Customer Transfer Code, before the relevant Order is submitted.
- 8.9.3 Chorus is entitled to rely on the Transfer Order as evidence that a valid Customer Authorisation has been obtained in accordance with the Customer Transfer Code. Chorus is not liable in the event that authorisation is found to be invalid or not in accordance with the Customer Transfer Code.
- 8.9.4 Chorus and the Access Seeker will comply with the Customer Transfer Code.

8.10 Orders

- 8.10.1 Orders for the following must be placed in OO&T using the relevant webform or B2B interface:
- (a) MPF New Connection;

- (b) MPF Transfer;
- (c) Other Service to MPF Transfer;
- (d) MPF Relinquishment;
- (e) MPF Move Address;
- (f) MPF Pair Change and Re-termination;
- (g) Remote Tie Cable Service.

8.10.2 These Orders will be processed in accordance with clause 8.2.

8.11 Bulk Transfer Orders

Overview

8.11.1 Bulk Transfers enable an Access Seeker to transfer large volumes of End Users or MPFs onto the MPF Service in a co-ordinated manner. Details of what a Bulk Transfer is and when a Bulk Transfer can be requested are set out in clauses 6.1.5 to 6.1.8 above.

Submitting Bulk Transfer Orders

8.11.2 Access Seekers should contact their Chorus Service Delivery Manager to discuss the requirements and timeframes of any Bulk Transfer before placing a Bulk Transfer Order.

8.11.3 All Bulk Transfer Orders are to be entered in the OO&T system at least 20 Working Days before the date on which the Access Seeker requests the first individual transfer included in the Bulk Transfer to occur.

8.11.4 Once a Bulk Transfer Order has been placed, Chorus and the Access Seeker must agree on a Bulk Transfer Plan that:

- (a) describes how the Bulk Transfer will be managed and carried out (including details of the dates on which the relevant batches of individual transfers will take place and, where appropriate, the resources to be used); and
- (b) states the price to be paid (excluding the charges for the individual transfers) by the Access Seeker for the provision of the Bulk Transfer service by Chorus . This price must be determined in accordance with the UCLF Price List.

8.11.5 Where there are resource contention issues in relation to the carrying out of the Bulk Transfer, the Bulk Transfer Plan must be consistent with the application of the priority rules set out in section 9 and Chorus can specify (without the agreement of the Access Seeker) the details of the plan (including individual transfer dates) to the extent necessary to enable compliance with those rules.

8.11.6 Once the Bulk Transfer Plan has been agreed, any necessary changes to the Bulk Transfer Order will be made and this order will be accepted

and allocated an accepted bulk transfer order number. The Access Seeker must then submit an individual Order for each transfer included in the Bulk Transfer. Each such individual Order must state that it is part of a Bulk Transfer and include the accepted bulk transfer order number for that Bulk Transfer.

- 8.11.7 If the parties cannot agree on the terms of the Bulk Transfer Plan, either party may refer the issue to the dispute procedure in section 38 of the UCLF General Terms. Any such dispute will be treated as a technical or operational dispute and in the event of a Deadlock, must be resolved by expert determination. Chorus is not required to undertake any Bulk Transfer until a Bulk Transfer Plan has been agreed by the Access Seeker and Chorus or determined by an expert.
- 8.11.8 Bulk Transfer Orders are not able to be cancelled within 10 Working Days of the date on which the first relevant individual transfer will take place. Cancellations made earlier than 10 Working Days before the date on which the first relevant individual transfer will take place will be subject to the cancellation fee as set out in the UCLF Price List.
- 8.11.9 Chorus is entitled to rely on a Bulk Transfer Order as evidence that valid Customer Authorisations have been obtained in accordance with the requirements of the Customer Transfer Code. Chorus is not liable in the event that the Customer Authorisations are found to be invalid or not in accordance with the Customer Transfer Code.
- 8.11.10 Access Seekers should note that the individual transfers covered by a Bulk Transfer Order are subject to the same processes, systems and rules as other transfers.
- 8.11.11 Chorus will use all reasonable endeavours to ensure that individual transfers covered by a Bulk Transfer Order will be completed in a timely manner. However workflow will be managed separately and Service Levels under the SLA will not apply to individual transfers covered by a Bulk Transfer Order.

9. Prioritisation of Bulk Transfers allocation of space on Exchange MDF and Prioritisation of MPF New Connections Orders

- 9.1 **Overview**
 - 9.1.1 Where there is contention for resources in relation to:
 - (a) space resource constraints at distribution frames for Bulk Transfers or MPF New Connections Order
 - (b) space resource constraints at distribution frames during initial build activity
 - (c) resource constraints during Bulk Transfers or resource constraints during processing of MPF New Connections Order
 - (d) circumstances where Bulk Transfer activity poses a risk to BAU provisioning activity,

-
- (e) circumstances where there is limited capacity on the copper feeder in the Exchange and multiple MPF New Connection Orders are received at the same time

Chorus will apply the following prioritisation rules.

Where there is no contention for resources, supply of the UCLF Service is essentially made on a "first come, first served" basis.

9.2 Prioritisation rules

- 9.2.1 BAU capability must be preserved above all other requirements.
- 9.2.2 Telecom will endeavour to give feedback to, and consult with, Access Seekers with the aim of reaching agreement on the prioritisation of Bulk Transfers and /or MPF New Connection Orders.
- 9.2.3 The order in which Bulk Transfers and/or MPF New Connections Orders will be carried out will be the order in which the Bulk Transfer Orders and/or MPF New Connections are received. However where two or more Access Seekers submit a Bulk Transfer Order and/ or MPF New Connection Order on the same day, and this gives rise to contention for resources, the order in which the Bulk Transfers and/or MPF New Connections Orders will be carried out will be decided by the "throw of a coin" where agreement on prioritisation cannot be reached.
- 9.2.4 Resources will be used in a serial fashion in a pre determined order (that matches the order of the relevant Bulk Transfers and MPF New Connection Orders). For example, if there is capacity to complete 100 transfers per day at an Exchange or 5 MPF New Connections per day at an Exchange, then that resource would work only on transfers and other orders for a single Access Seeker and when all their planned batches of transfers and orders are complete, start the work for the next Access Seeker.
- 9.2.5 In a case where more resource is available to perform transfers and other orders than is able to be supported by the Access Seeker (an Access Seeker cannot manage the volume of transfers or other orders possible per day at their end), the additional resource may be able to be used performing transfers and other orders for the next Access Seeker on the priority list.

9.3 Space allocation on Exchange MDF for Tie Cable termination

- 9.3.1 The allocation of space on the Exchange MDF to terminate Tie Cable pairs required to use the MPF Service will be allocated on a first come first served basis. However if total demand for such space exceeds supply in the short term Chorus will scale down all Orders for both the Remote Tie Cable Service and the Intra-Exchange Tie Cable proportionately with a minimum allocation per Access Seeker of MDF space to terminate 400 Tie Cable pairs. Orders for less than 400 Tie Cable pairs will not be scaled down.
- 9.3.2 The maximum amount of Tie Cable pair space that can be ordered at any one time (as part of an Order for either the Remote Tie Cable Service or an Intra-Exchange Tie Cable) will be space for 1000 pairs, unless the Access Seeker can provide evidence of a demonstrable
-

greater demand, in which case that Access Seeker can order space for as many Tie Cable pairs as they require.

9.4 Prioritisation and Allocation Disputes

9.4.1 In relation to any prioritisation or allocation issue, in the event that an Access Seeker feels the relevant prioritisation or allocation rules have not been correctly applied they may refer the issue to the dispute procedure in the UCLF General Terms. Any such dispute will be treated as a technical or operational dispute and in the event of a Deadlock, must be resolved by expert determination.

PART 4 - PROBLEM MANAGEMENT

10. Problem Management

10.1 Overview 10.1.1 This section covers the following:

- (a) OFM;
- (b) faults within the UCLF Service; and
- (c) interference.

10.2 OFM

Overview

10.2.1 Chorus has a web-based fault management system (OFM). OFM allows Access Seekers to:

- (a) create a new trouble ticket;
- (b) retrieve a trouble ticket;
- (c) update a trouble ticket; and
- (d) report basic faults.

Terms of Provision

10.2.2 In relation to the UCLF Service, OFM is a Chorus System provided by Chorus in accordance with the UCLF General Terms, the SLA and this Manual.

Training and Support

10.2.3 Chorus will provide reasonable initial set up training on OFM.

10.2.4 "Reasonable initial set up training" in this context consists of a workshop held at a Chorus location. The workshop will address:

- (a) overview of forms for fault reporting;
- (b) basic details of the OFM system (including demonstration of the system); and
- (c) Q&A.

10.2.5 Access Seekers will ensure that a reasonable number of staff (up to a maximum of 10) attend any training provided to the Access Seeker in respect of OFM.

10.2.6 Any additional training required by the Access Seeker beyond reasonable initial set up training will be charged for by Chorus in accordance with the UCLF Price List.

Additional Functionalities or Enhancements to OFM

- 10.2.7 Where Chorus creates any additional functionality within OFM or makes any enhancement to it, Chorus will give Notice to the Access Seeker. The Access Seeker will modify its own fault systems and its own operational procedures to the extent required. Chorus must consult with the Access Seekers before notifying Access Seekers of any additional functionality or enhancements to OFM which affect the use of OFM in relation to the UCLF Service.
- 10.2.8 The Access Seeker will utilise the additional functionalities or enhancements to OFM as notified by Chorus from the date specified in Chorus' Notice (at the latest).

Costs

Chorus Costs

- 10.2.9 Chorus will be solely responsible for Chorus' costs of designing and developing OFM, including any modifications and enhancements.

Access Seeker's Costs

- 10.2.10 Access Seekers will be solely responsible for the costs of modifying their processes to work with OFM and their systems to interface with OFM (if applicable).

OFM Fees

- 10.2.11 Chorus will charge a monthly licence fee for OFM as set out in the UCLF Price List.

Terms of Use

Use of OFM

- 10.2.12 The Access Seeker must only use OFM for purposes authorised by Chorus.

Availability

- 10.2.13 Chorus will use all reasonable endeavours to ensure that OFM is available to Access Seekers 24 hours a day, 7 days a week.
- 10.2.14 Although Chorus intends to take reasonable steps to prevent the introduction of viruses or other distinctive features to OFM, Chorus does not guarantee that it is free of such viruses or other distinctive features.

10.3 Faults within the UCLF Service

Responsibility for faults

- 10.3.1 Chorus is only responsible for faults that are within Chorus' responsibility, as set out in section 23 of the UCLF General Terms. If Chorus investigates and no fault is found or no fault for which Chorus is responsible is found, Chorus will charge the Access Seeker the No Fault

Found fee as set out in the UCLF Price List. Where Chorus is responsible for the fault, no No Fault Found fee will be charged.

- 10.3.2 When the Tie Cable Service is being provided Chorus is not responsible for any fault in the Tie Cable (regardless of whether or not Chorus supplied the Tie Cable).

Initial Diagnosis by the Access Seeker

- 10.3.3 It is the Access Seeker's responsibility to provide initial fault diagnosis on all faults reported to it by its End Users.
- 10.3.4 The requirements for this initial fault diagnosis are set out in section 24 of the UCLF General Terms.

Reporting Faults to Chorus

- 10.3.5 Subject to clause 10.3.6 the Access Seeker must use OFM for reporting all faults regarding the UCLF Service. If the Access Seeker uses any other method to report a fault, the relevant Service Levels as defined in the SLA will not apply to that fault.
- 10.3.6 Where Chorus advises the Access Seeker OFM is unavailable, the Access Seeker must submit fault reports to Chorus by calling the 0800 fault reporting service number provided by Chorus . Chorus must use all reasonable endeavours to advise Access Seekers immediately upon becoming aware that the OFM is unavailable.
- 10.3.7 Once the Access Seeker has provided initial fault diagnosis, complied with section 24 of the UCLF and determined that it requires Chorus' assistance to resolve the fault, the following information is required when reporting a fault:
- (a) confirmation that the initial fault diagnosis has been completed;
 - (b) contact name and phone number of the Access Seeker staff member logging the fault;
 - (c) contact name, phone number, and alternate phone number of the End User experiencing the fault (where appropriate);
 - (d) End User's circuit/line number/ASID that is experiencing the fault (where appropriate);
 - (e) fault type and description;
 - (f) time the fault occurred;
 - (g) address and contact details for the site of the fault (where appropriate); and
 - (h) any other relevant information.

- 10.3.8 If any of the above information is not provided, the relevant Service Levels in the SLA will not apply.

Irregularities

- 10.3.9 Chorus will waive immaterial irregularities and process fault reports where the intention is unambiguous. Examples of such irregularities include:
- (a) use of different conjunctions (e.g. "&" instead of "and");
 - (b) improper application or omission of apostrophes;
 - (c) variations in letter case;
 - (d) use of initials instead of first names, or vice versa; and
 - (e) names where letters have been accidentally transposed but the meaning is still clear (e.g. Dominoin = Dominion).

Hours of Operation

- 10.3.10 Faults can be logged 24 hours a day, seven days a week.
- 10.3.11 Faults that are Chorus' responsibility will be fixed by Chorus representatives during Fault Restoration Hours. If a fault is logged outside of those hours, it is possible Chorus will only start working on the fault as from 7.00am the following day. Extended fault restoration hours apply for emergency faults.
- 10.3.12 For the purpose of determining whether Chorus has met any relevant Service Levels for dealing with Faults, any Faults submitted to Chorus outside of Fault Restoration Hours will be deemed to have been received by Chorus in the first Fault Restoration Hour of the following day.

Fault Report Acknowledgement

- 10.3.13 When a fault report is received, Chorus will advise the Access Seeker, acknowledging receipt of the fault report.

Fault Tracking

- 10.3.14 All faults will be logged in OFM and the Access Seeker will be given a fault reference number and an expected fault restoration time. The expected fault restoration time will be provided in accordance with Chorus' fault prioritisation systems.
- 10.3.15 Chorus will use all reasonable endeavours to meet the notified expected fault restoration time as provided in clause 10.3.14.
- 10.3.16 Where Chorus has allocated an expected fault restoration time to a fault and it subsequently becomes apparent that the fault restoration time cannot be met, Chorus will advise the Access Seeker of a revised

fault restoration time. In that situation the Service Levels in the SLA will continue to apply to the originally notified expected restoration time, rather than the revised fault restoration time.

- 10.3.17 The Access Seeker will be able to check the progress of a fault via OFM. The fault reference number is to be used in all communications regarding the fault.

Chorus Contractor Work

- 10.3.18 If Chorus identifies the need to send a faults contractor, Chorus will update OFM.
- 10.3.19 The Access Seeker's helpdesk is responsible for coordinating site access and any required outage window with the End User.

Fault Closure

- 10.3.20 Once the fault has been resolved, Chorus will notify the Access Seeker via OFM (or other means) that the fault has been resolved, confirm the fault reference number and, where available, provide the cause of the fault and any actions taken to reach resolution.

Emergency Faults

- 10.3.21 Emergency faults reported to Chorus outside of the hours of operation set out in clause 10.3.11 will be treated on a case by case basis.
- 10.3.22 In the first instance, Chorus will propose a temporary solution. However, in the absence of a viable temporary solution, Chorus may schedule a callout to respond to emergency faults in relation to:
- (a) medical emergencies;
 - (b) where the End User provides an essential community service (e.g. police or a doctor's residence); or
 - (c) where there is a mass outage that has the potential to impact on 200 or more Customers across all Access Seekers, including Chorus.

Escalation Protocol

- 10.3.23 The Escalation Protocol is provided in Appendix B.

10.4 Interference

Overview

- 10.4.1 Chorus and the Access Seeker must comply with the Interference Management Plan.

Investigating Interference by Others

- 10.4.2 If the Access Seeker considers that their ability to fully utilise the UCLF Service is being materially impaired by a failure by another Access Seeker that is using the UCLF Service in the relevant Exchange to comply with the Interference Management Plan (**possible third party interference**) the Access Seeker may notify Chorus in writing.
- 10.4.3 That notice may request Chorus to ask the other relevant Access Seeker(s) to provide Chorus with any information reasonably required to assist Chorus to establish whether a breach of the Interference Management Plan by the other Access Seeker is causing the possible third party interference, and in the light of that information to investigate the cause of the possible third party interference.
- 10.4.4 Chorus will comply with any reasonable request under clause 10.4.3 and the Third Party Interference Investigation Charge set out in the UCLF Price List will apply. Chorus will advise the Access Seeker of the conclusion reached by its investigation.
- 10.4.5 If interference is found and was caused by any Access Seeker's equipment that breaches the UCLF Interference Management Plan, this Charge will apply to that Access Seeker that caused the interference. If interference is not found, or was caused by either any Access Seeker's equipment that does not breach the UCLF Interference Management Plan or equipment owned by another person who is not an Access Seeker, this Charge will apply to the Access Seeker that claimed there was interference.
- 10.4.6 Chorus will provide details of why its conclusion was reached if it is able to do so. Chorus will not be required to provide any details regarding the conclusion reached if to do so would require it to disclose confidential information of other Access Seekers.
- 10.4.7 If Chorus concludes as a result of its investigation that a failure by another Access Seeker (Defaulting Access Seeker) to comply with the Interference Management Plan when using the UCLF Service is causing the impairment, then Chorus must use all reasonable endeavours to ensure that the Defaulting Access Seeker remedies that failure and complies with the Interference Management Plan as soon as reasonably practicable.
- 10.4.8 "All Reasonable endeavours" in this context does not require Chorus to either enforce the UCLF Terms or to complain to the Commission in respect of the breach (the Access Seeker may do these things directly).

Investigation Assistance

- 10.4.9 An Access Seeker must provide (at its own cost) all information (including confidential information) and all other assistance reasonably required by Chorus to enable Chorus to determine whether the Interference Management Plan is being complied with by the Access Seeker.

Liability

- 10.4.10 For the avoidance of doubt, Chorus has no liability to the Access Seeker for any failure to comply with its obligations under the UCLF Terms when that failure is caused by another Access Seeker not complying with the Interference Management Plan.

PART 5 - TIE CABLING FOR REMOTE CO-LOCATION

11. Tie Cabling for Remote Co-location

- 11.1 Overview**
- 11.1.1 Where the Access Seeker's equipment used to provide access to and interconnection with the UCLF Service is located outside of a Chorus Exchange (whether in the Access Seeker's building or a third party's building), the Access Seeker can purchase the Remote Tie Cable Service. Under the Remote Tie Cable Service, copper Remote Tie Cable pairs will be used to connect the HDP block on Chorus' MDF and the remotely co-located Access Seeker equipment. The Remote Tie Cable Service installation and space rental charges set out in the UCLF Price List will apply.
- 11.1.2 An Access Seeker may supply its own Tie Cables or the Access Seeker may ask Chorus to supply the Tie Cables. In either case the Tie Cables must meet the specification set out in Chorus' Cable Specification document (located on Chorus 's website). Where Chorus supplies the Tie Cable the Access Seeker will purchase that Tie Cable from Chorus for a commercially agreed price.

11.2 Tie Cabling Pair

Identifier

- 11.2.1 As Tie Cables for remote co-location are external cables, designations (names) will be assigned by Chorus to each tie pair in accordance with the normal Chorus network practice. For instance, the normal Chorus network name ELL 102-099 identifies cable 102, pair 99 at the Ellerslie Exchange building and the related Remote Tie Cable equipment number assigned and specified on service requests would be:
- (a) LWC=ELL, tie pair=LR-102-0099. (LR means remote co-location Remote Tie Cable, 102 is the cable number and 0099 is the pair number padded to the maximum size with leading zeros).
- 11.2.2 The naming standard is contained in the Chorus document "Network Naming Standard for Local Loop Unbundling Requirements" (reference ND0459).

Chorus Responsibilities

- 11.2.3 Chorus will name all remote co-location cable pairs and record these in Chorus' system for managing copper inventory.
- 11.2.4 Chorus will identify the route that the Remote Tie Cable will take within the Exchange (including Chorus ducts and Chorus manhole) and install any required cable racking to support the Tie Cable.
- 11.2.5 Chorus will install the Remote Tie Cable between the Access Seeker's network cable and the HDP.
- 11.2.6 For Chorus supplied Remote Tie Cable, the Remote Tie Cable will be delivered to the Access Seeker outside and adjacent to Chorus' Exchange Entry Point. For Access Seeker supplied Remote Tie Cable, a

length of cable advised by Chorus will be received at Chorus' Exchange Entry Point. In either case, Chorus and the Access Seeker will work together to get cable from Chorus' Exchange Entry Point to the Access Seeker's manholes and ducts with Chorus performing any work in its Exchange Manhole.

- 11.2.7 Chorus will supply and record the necessary space on the HDP block.
- 11.2.8 Chorus will terminate Remote Tie Cable pairs on the HDP block.
- 11.2.9 Chorus is responsible for the repair and/or replacement of faulty termination at the HDP.

Access Seeker Responsibilities

- 11.2.10 The Access Seeker will deliver its (or a third party's) network cable to the Chorus Exchange Entry Point (with Chorus performing any work in its Exchange Manhole).
- 11.2.11 The Access Seeker will complete the joint between its network cable and the remote co-location Remote Tie Cable outside the Chorus Exchange Entry Point.
- 11.2.12 The Access Seeker will own the Remote Tie Cable and will be responsible for its maintenance. However, because Remote Tie Cables will be located within the Chorus Exchange, the Access Seeker must request Chorus to carry out any maintenance. Where an Access Seeker requests Chorus to carry out any maintenance on a Remote Tie Cable Chorus must do so and the Remote Tie Cable Maintenance Charge set out in the UCLF Price List will apply. If Chorus reasonably considers that any maintenance work needs to be carried out on a Remote Tie Cable Chorus may (after giving the Access Seeker prior notice of its intention to do so) carry out that work and apply the Remote Tie Cable Maintenance Charge.
- 11.2.13 The Access Seeker must maintain and be responsible for its own Remote Tie Cable inventory system. This system must be able to record the following:
 - (a) the termination of each Tie Cable pair;
 - (b) the Access Seeker's own assignments or reassignments of Remote Tie Cable pairs; and
 - (c) changes to Remote Tie Cable pairs when service has been transferred (e.g. for fault resolution).

Resolution of Inconsistency

- 11.2.14 Where Chorus' records and the Access Seeker's records differ with regard to the status of a Remote Tie Cable pair, the Access Seeker must

confirm the accuracy of the status of the Tie Cable pair in its inventory system.

11.2.15 If this does not resolve the difference, the Access Seeker must liaise with Chorus' Provisioning Manager.

11.2.16 After the Remote Tie Cable is jointed to the network cable by the Access Seeker and is terminated at the HDP by Chorus Chorus and the Access Seeker will jointly carry out end-to-end testing between the HDP and the Access Seeker's remote equipment location.

11.3 Recording and Data Management *Overview*

11.3.1 Where the Remote Tie Cable Service is being supplied, Access Seekers must ensure that information regarding their sub ducts and cabling is supplied to Chorus for recording. Access Seekers should check subsequent as-built records to ensure accuracy of detail. Chorus requires Access Seekers to mark or label cables/plant in the field.

11.3.2 Chorus will keep floor plans up to date with changes.

11.3.3 Access Seekers are to ensure that all connections made are recorded with Chorus including the:

- (a) location of cables within the Exchange;
- (b) connections made to the MDF, identified and coded for billing information on the Chorus Provisioning, Billings and Support systems; and
- (c) assignments/allocations of fibres within cable sheaths.

11.3.4 Information about Access Seeker connections is required to enable Chorus to manage the delivery of the UCLF Service. This information is Confidential Information under the UCLF General Terms.

PART 6 - BILLING

12. Billing

12.1 Overview

12.1.1 Billing is driven by Orders for the UCLF Service made by the Access Seeker.

12.1.2 This section covers:

- (a) invoicing; and
 - (b) billing enquiries.
-

12.2 Invoicing

12.2.1 Chorus will invoice the Access Seeker for all Charges on the basis specified in the UCLF Price List. Invoices will be in an electronic bill format (**eBill**). eBill will replace the provision of a paper invoice, except that a printed GST summary will be provided to the Access Seeker. A hard copy paper invoice will be available to Access Seekers at the price set out in the UCLF Price List.

12.2.2 Chorus will make eBill files available using a secure HTTPS gateway. eBills can be accessed via an HTTPS site through a web browser. Alternatively, the Access Seeker can arrange with the secure HTTPS gateway provider (as advised by Chorus) to write their own scripts and access the eBill through a script platform.

12.2.3 The Access Seeker will provide Chorus with the list of people that are authorised to download eBills. Chorus will set up access rights for these people on the HTTPS gateway.

12.2.4 Chorus will provide eBills and printed GST summaries to the Access Seeker free of charge.

12.2.5 Chorus will maintain one or more separate Access Seeker accounts for services provided to the Access Seeker. Chorus may alter the account structure as it considers appropriate.

12.3 Billing Enquiries

12.3.1 If the Access Seeker wishes to raise a billing enquiry, it may do so by emailing the Chorus billing team in the first instance at the billing email address supplied by Chorus under section 2 above.

12.3.2 The email must include the following information:

- (a) a header reading "Billing Query"; and
- (b) a completed "Billing Enquiry Form" (reference ASF-004).

12.3.3 Chorus will acknowledge the query and will use all reasonable endeavours to respond within the current billing period. Any billing

enquiries submitted without the use of a Billing Enquiry Form will be rejected.

- 12.3.4 Additional billing information, over and above that reasonable required to assist Access Seekers in interpreting invoices, will be charged in accordance with the UCLF Price List. The Access Seeker may require Chorus to provide a quote for any such request for further information.
- 12.3.5 The process set out in this clause is an informal enquiry process that does not limit the UCLF General Terms. If the Access Seeker wishes to initiate an Invoice Error Dispute in relation to an invoice, it must follow the procedure set out in section 16 of the UCLF General Terms.

PART 7 - REQUIREMENTS FOR END USER SITE VISITS

12.4 Arranging Time for End User Site Visits	12.4.1	Fault and provisioning related site visits will be arranged by appointment under OO&T and need not be confirmed. Chorus will not be required to consult the Access Seeker or End User when work at a site does not require entry to a premises or contact with an End User. Where entry to a premises or contact with an End User is required then the Access Seeker will make arrangements for the site visit with the End User and the relevant Chorus representative.
12.5 Field Force	12.5.1	Chorus representatives will carry Chorus identification and wear appropriate clothing.
12.6 Arriving on Time	12.6.1	The Chorus representative will use all reasonable endeavours to start all visits to an Access Seeker End User's site at the scheduled time.
12.7 Courtesy	12.7.1	When interacting with any Access Seeker End User, Chorus representatives will always act in a professional and courteous manner, and they will not use that interaction for sales and marketing purposes.
12.8 Confirming Details and Outcomes of Visit	12.8.1	At the completion of all site visits, the relevant Chorus representative will record the details in appropriate systems.
12.9 Abortive End User Site Visit Fee	12.9.1	When for any reason outside Chorus' control it is unable to complete a visit at the scheduled time (eg an End User is unavailable), Chorus will charge the Access Seeker an abortive End User Site Visit Fee in accordance with the UCLF Price List.

PART 8 – OTHER

13. Outages

- | | | |
|---------------------|--------|--|
| 13.1 General | 13.1.1 | The responsibilities and obligations in respect of outages are set out in section 23 of the Co-location General Terms. |
|---------------------|--------|--|

14. Tenure

- | | | |
|-------------------------|--------|--|
| 14.1 Termination | 14.1.1 | The rights of Chorus and the Access Seeker to terminate supply of the UCLF Service are set out under section 37 of the UCLF General Terms. |
|-------------------------|--------|--|

- | | | |
|----------------------------|--------|---|
| 14.2 Cabinetisation | 14.2.1 | The responsibilities and obligations arising from cabinetisation are set out in section 37 of the UCLF General Terms. |
|----------------------------|--------|---|

15. Notification of the availability of the UCLF Service

- | | | |
|--|--------|--|
| 15.1 Availability of the UCLF Service | 15.1.1 | Chorus will provide Access Seekers with an updated list of Distribution Cabinets and Exchanges from which the UCLF Service is available on a standalone basis or in combination with the UBA Service. Chorus will provide this updated list within 20 Working Days of any change to the availability of the UCLF Service. Chorus will publish the updated list on a publicly available Chorus website. |
|--|--------|--|

- | | |
|--------|--|
| 15.1.2 | An updated list will be required whenever there are changes in Chorus' network architecture, such as the installation of new Distribution Cabinets or the removal of the copper feeder between the Exchange and the Distribution Cabinet, which have an effect on the availability of the UCLF Service or particular UCLF Services received by the Access Seekers. |
|--------|--|

- | | | |
|---------------------------------------|--------|---|
| 15.2 Other notice requirements | 15.2.1 | Chorus will notify Access Seekers within 20 Working Days of any situation arising where the UCLF Service is not available on a standalone basis or in conjunction with the UBA Service. Chorus will also provide Access Seekers with the reasons explaining the particular circumstances of the non-availability of the relevant service. Chorus will publish the information required by this clause on a publicly available Chorus website. |
|---------------------------------------|--------|---|

- | | |
|--------|---|
| 15.2.2 | The reasons for the non-availability in the circumstances specified in clause 15.2.1 may extend to include: |
|--------|---|

- | | |
|-----|---|
| (a) | the absence of equipment catering for the UBA Service at the Distribution Cabinet, or the physical hard wiring of the broadband equipment to the voice equipment, makes the provision of the UCLF Service in combination with the UBA Service unfeasible; |
| (b) | the Distribution Cabinet, which does not have a copper connection to the Exchange, does not support the UCLF Service; |
| (c) | the copper feeder between the Exchange and the Distribution Cabinet, which is only used as an access copper bearer for the |

equipment in the Distribution Cabinet, does not support the UCLF Service.

- (d) certain other engineering purposes (eg order-wire) prevent the delivery of the UCLF Service from the Distribution Cabinet.
- (e) the Distribution Cabinet which has limited capacity on the copper feeder does not support the UCLF Service

15.3 Publications

15.3.1 Chorus may choose to publish the information required to be released under clause 15.1.1 and 15.2.2 in a single notice.

APPENDIX A – GLOSSARY

The glossary contains terms that are used in this document and are not defined in the UCLF General Terms.

ASID	Means Access Service Identifier.
B2B	Means Business to Business Web Services Interfaces.
BAU	Means Business as usual in relation to the UCLF Service.
BAU Forecast	Means a Forecast as described at clauses 6.1.11 to 6.1.14.
Binder	Means a group of MPFs bound (twisted) together in a cable.
Bulk Transfer	Has the meaning in clauses 6.1.5 to 6.1.8.
Bulk Transfer Forecast	Means An Access Seeker Forecast as described at clauses 6.1.9 and 6.1.10.
Bulk Transfer Plan	Has the meaning in clause 8.11.4.
Business Hours	Means 8:00am to 5:00pm on any Working Day.
Customer Authorisation	Means a valid authorisation for a Transfer Order by a customer or a customer's duly appointed agent that meets the requirements of the Customer Transfer Code.
Customer Transfer Code	Means the Code for the Transfer of Telecommunications Services ('The Customer Transfer Code') approved by the Commission on 12 October 2006 and any equivalent replacement Code.
eBill	Means Invoices will be in an electronic bill format (eBill). eBill will replace the provision of a paper invoice, except that a printed GST summary will be provided to the Access Seeker.
ETP	Means External Termination Point for telecommunications services at an End User's premises or, where there is no termination point external to the premises, either the first jack on the premises wiring or, alternatively, the building distribution frame.
Exception to BAU	Is described in clauses 6.1.15 and 6.1.16.
Exception to BAU Day Zero	Means the date the Access Seeker requests an Exception to BAU to commence.
Exception to BAU Forecast	Means a Forecast as described in clause 6.1.19 and 6.1.20.
Fault Restoration Hours	means 7:00am to 7:00pm, seven days a week and Fault Restoration Hour means one hour within this period.
Forecast	Means any or all (as the context requires) of the Forecasts required to be provided by the Access Seeker in this Manual.
Forecast Cluster	Means a group of Exchanges and distribution cabinets (which group has sufficient relationship to the management and deployment of field resource to enable Chorus to meet the UCLF Service Level Terms) in a geographic area as shown in the table in Appendix D.
Forecast Service Area	Means a group of Forecast Clusters as identified in Appendix D.

Forecasting Template	Means the template provided by Chorus with a separate worksheet for each Forecast type.
HDP	Means Handover Distribution Point on the Exchange MDF.
Losing Service Provider	Means the Access Seeker or Other Service Provider (as the case may be) that is losing the telecommunications service (from the point of view of a customer).
MDF	Means a main distribution frame, being the place where copper lines from customers are laid out in an array to enable transmission equipment to be connected.
Metallic Path Facility (MPF)	Means a circuit comprising a pair of twisted copper conductors between a demarcation point at the End User's premises and an Exchange.
MPF Day Zero	Means the date the Access Seeker requests a Bulk Transfer to commence.
MPF Move Address	Means an MPF Move Address is where the End User requests the relocation of their Access Seeker telecommunications services to another physical address. It involves the moving of the customer end termination of the jumper from one MPF to another (where an existing service lead into the building and a spare or intact MPF back to the Exchange exists). It may be in the same Exchange or another.
MPF New Connection	Means the establishment of a new service instance of the MPF Service (i.e. there is no MPF Transfer or Other Service to MPF Transfer). The service is established from spares or intact circuits with an existing service lead into the building. That is, it utilises an existing MPF that is not currently used for the provision of telecommunications services.
MPF Pair Change or Re-termination	Means an MPF pair change or re-termination requiring the changing of jumpers/pair change at the Handoff Distribution Point (HDP) to effect a port change.
MPF Relinquishment	Means where the Access Seeker terminates supply of the MPF Service in respect of a particular End User. This entails Chorus updating its records and billing. Chorus may either physically disconnect the MPF at any point between the Exchange and the End User's premises or leave the MPF circuit intact.
MPF Service	Consists of provision of an MPF for access to End Users and is described in the UCLF Service Description.
MPF Transfer	Means the transfer of the MPF Service connected to an End User's premises from one Access Seeker to another, as authorised by the End User.
Order	Means any order for the UCLF Service.
Order Month	Means the month in which Orders are actually made.
Other Service to MPF Transfer	Means the transfer of an End User from services (other than the MPF Service) provided over Chorus' Local Loop Network to an MPF Service, as authorised by the End User.
Possible third party interference	Has the meaning in clause 10.4.2.

Pre-qualification	Has the meaning in clause 8.4.1.
Remote Tie Cable Service	Means the Tie Cable Service as described in the UCLF Service Description and as outlined in more detail in section 11 of this Manual.
RFS	Means Ready For Service
RFS Date	Means the date advised by Chorus in accordance with clause 8.2.10.
Service Provider	Means a provider of telecommunications services.
SLA	Means the Service Level Terms set out as schedule 3 of the UCLF General Terms.
Tie Cable	Means collectively the Intra-Exchange Tie Cable and the Remote Tie Cable.
Transfer Order	Means an MPF Transfer Order, an Other Service to MPF Transfer Order and/or a Bulk Transfer Order as the context requires.
UCLF General Terms	Means the general terms that form part of the standard terms determination made by the Commission under section 30M of the Act in relation to Chorus' unbundled copper low frequency network service, excluding the schedules to those terms.
UCLF Co-location Operations Manual	Means the Operations Manual contained in the UCLF Standard Terms Determination.
UCLF MPF New Connection Orders	Means MPF New Connection Orders that are made under the UCLF STD.
UCLF MPF Transfer Orders	Means MPF Transfer Orders that are made under the UCLF STD.

APPENDIX B - ESCALATION PROTOCOL

<i>Rule No.</i>	<i>Escalation Rule</i>	<i>Further Explanation</i>
1	Identify correct escalation path.	Before any issue is escalated, sufficient investigation should be undertaken to ensure that the functional group that will most likely be responsible for resolving the issue has been correctly identified.
2	Attempt to resolve issues at BAU level before escalating them.	Every effort should first be made to resolve an operational issue at the BAU level, i.e. direct communication between the originator and the recipient.
3	First escalation should be via e-mail.	In the first instance an escalation at BAU level should be received via e-mail and clearly labelled as such with the email subject line beginning with "ESCALATION". The email should contain the relevant history of the issue, including the escalation history and when applicable the customer name, ASID/circuit numbers and fault/service order numbers.
4	Level One and Two escalations shall be peer to peer.	If an operational issue cannot be resolved at the BAU level it must first be raised by the team member with their own team leader/manager. If the team leader/manager agrees that the issue warrants being escalated to the other party they shall contact their peer in the other organisation and endeavour to resolve the issue between them - this would normally be the level one escalation point. Under no circumstance should this step in the escalation path be bypassed unless every reasonable attempt to communicate with their peer in the other organisation has failed. Only then should the level one contact in party A attempt to escalate the issue to the level two contacts in party B. Subject to the above, level two escalations should also be peer to peer.
5	A mutually agreed plan of action to resolve an issue shall not be interfered with by other individuals.	If a plan of action to address an escalated issue has been agreed to by both parties then no other individual from either organisation should attempt to interfere with that agreement. If another individual has a concern with an already agreed plan of action they should raise it in the first instance with the person in their own organisation that was party to the original agreement.
6	People who do not follow the above rules will be redirected to the correct point of escalation.	If, as part of an escalation, an individual is contacted by a person from the other company and it is discovered that that person has not followed the protocol described above, then that individual can at their discretion respectfully redirect that person to the correct escalation contact person.

APPENDIX C - REJECTION CRITERIA

<i>Reject Code</i>	<i>Description</i>	<i>Explanation</i>
011	Open service order	There is an existing open service order in relation to the relevant service / line / circuit
012	Disconnection pending	A disconnection of the relevant service / line / circuit is pending
014	Invalid account number	The customer account number specified on the form is incorrect or does not match the information in Chorus' records
015	Invalid line or address	The customer line number or address specified on the form is incorrect or does not match the information in Chorus' records
020	Incomplete information	The form does not contain all of the required information
021	Corrupt or unreadable	The form is wholly or partially corrupted or unreadable
023	Other incorrect information	The form contains other information that is incorrect or that does not match the information in Chorus' records
030	Disconnected line	The relevant line / circuit has been disconnected
043	Number not compatible	Number provided is not the main phone number for the customer's line
047	Contact details	No site contact or contact details
099	Not otherwise specified	Rejection does not fit into specific codes above
[TBA]	MPF Line has already been transferred	The requested line has already been transferred to the Access Seeker
[TBA]	Incorrect MPF Order type	The incorrect MPF Order type has been used.

APPENDIX D – FORECAST CLUSTERS AND FORECAST SERVICE AREAS

<i>Exchange Name</i>	<i>Forecast Cluster</i>	<i>Forecast Cluster Name</i>	<i>Forecast Service Area</i>	<i>FSA Name</i>
AIREDALE STREET	FC06	AK CBD	CSA08	Auckland Central
AUCKLAND CENTRAL	FC06	AK CBD	CSA08	Auckland Central
AVONDALE	FC07	AK Central	CSA08	Auckland Central
