To whom it may concern,

I am writing regarding to the merger acquisition by Evergreen of ACMNZ.

I am oppose of this this as this would create a monopoly in the Cash In Transits industry in New Zealand.

If this merger acquisition happens between these parties, this would create an anti competitive market.

As seen lately from other counties which has a monopoly, especially in Australia, in which the monopoly provider has brought the insecurity of money supply into question to.

Even though the physical money has decreased, the fundamental sense of security for the general public, business, finical institution and Government is;

One has access to physical cash availability.

There are times when electronic systems fail, natural disasters, man made disasters, technical issues, which requires physical cash payments.

Thank you

Kind reards
