Central Park - Wilton B reconductoring Listed Project application

Dear Kade

Please find our Central Park – Wilton B reconductoring Listed Project application attached for consideration.

This application requests that the Commerce Commission increase our RCP2 Base Capex annual allowances by a total of \$12.4 million, being our estimated cost to undertake the Central Park – Wilton B reconductoring, including contingencies.

This is our first Listed Project application. We trust it complies with the requirements of the Capex IM and includes all of the information the Commerce Commission require for approval.

We look forward to the Commission's consideration of our application and would be happy to answer any questions that the Commission may have.

Yours sincerely

Hunter Humphries
Commercial Manager
